

Fleet Compliance Management: DVIR, HOS, IFTA

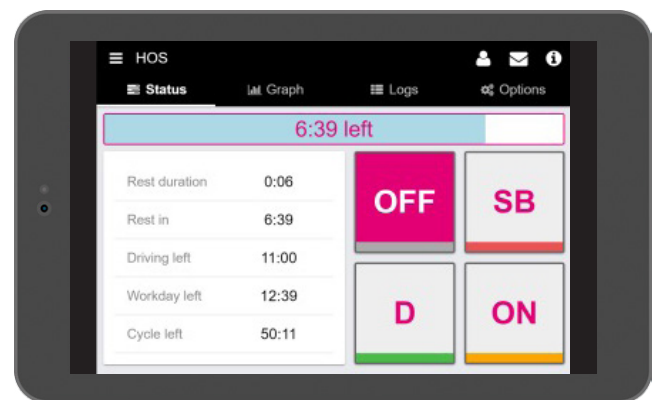

Business Integration

SyncUP FLEET™ seamlessly integrates compliance tools such as Hours of Service and DVIR into a cost-effective software suite that includes driving safety, productivity and fleet maintenance management. This incorporated approach is essential for any business to see the big picture in operations.

Driver Vehicle Inspection Reporting (DVIR)

- Complete end-to-end inspection workflow
- Drivers can flag vehicle issues for needed repairs
- Reported issues can be tracked along with user data, notes and repair logs
- Reports in MySyncUP FLEET can be sorted to show all DVIRs, or just those with flagged vehicle issues, those that have been repaired and those that have been certified as repaired, offering great visibility to the health of the fleet

Hours of Service (HOS)

SyncUP FLEET users can manage driver log reports and vehicle inspection data all in one, user-friendly platform. HOS regulations aim to improve safety by keeping fatigued drivers off the road. Fleets that meet the compliance requirements may lower their chances of accidents, injuries and fatalities related to operating commercial motor vehicles.

The Compliance Advantage

Benefits

- Help reduce paperwork
- Help cut administration costs
- Minimize violations
- Help improve driver safety and efficiency
- Deliver near real-time access to information
- Provide up-to-date logbook information to law enforcement/DOT

Set up and operate with ease

- Support off-the-shelf Android and iOS tablets
- Plug-and-Play ease of installation (no roof-mounted antennas needed)
- Open and flexible platform for adding and removing rulesets as regulations change
- Automated software and firmware updates
