

Construction and Heavy Equipment

Fleet Management Solutions

Stay on time and on budget with SyncUP FLEET

Construction operations are dynamic, with multiple job sites, diverse assets, and crew who are on the go. T-Mobile® SyncUP FLEET™ helps you track and maintain your construction and heavy equipment vehicle assets and provides key data insights to help streamline your operations and help you maximize profitability.

The SyncUP FLEET advantage

- ③ Track your workforce, assets, and fuel costs
- ③ Track idling trends
- ③ High-performance GPS technology
- ③ Dashboard reports
- ③ Open platform for easy data integration

SyncUP FLEET management solutions

SyncUP FLEET gives you data you can use to:

Boost productivity and control costs

- Improve asset utilization
- Live tracking of fleet vehicles
- Operator coaching tools
- Risk and safety reports
- Driver feedback

Help manage compliance

- Improve worksite compliance
- HOS and DVIR (vehicle inspections)
- Electronic logs for reduced paperwork
- Set policy rules and alerts

Cut fuel costs and optimize fleet

- Reduce speeding and unnecessary idling
- Reduce after-hours usage
- Route optimization (review planned vs. actual)
- Detect engine issues
- Predictive maintenance

SyncUP FLEET device

- Fast GPS acquisition time
- Rich telematics and reporting data
- Accurate engine diagnostics
- Self-calibrating accelerometer
