Optimize Your Fleet and Fuel Efficiency

Fleet Management Solutions

**Improve fuel efficiency**

From fuel usage to fuel fill-ups, T-Mobile® SyncUP FLEET™ reports help you identify and reduce unproductive miles. With a GPS tracking system, fleet managers can improve fleet fuel efficiency by better managing routes, vehicle speed, idling time, and vehicle maintenance.

**Manage vehicle maintenance**

Active diagnostic faults and other engine-derived information available through SyncUP FLEET can be used to prioritize your vehicles in need of maintenance. Quickly identify core problem areas and help reduce your maintenance costs by focusing on predictive engine health.
Reduce fuel costs
SyncUP FLEET offers extensive reports and metrics to help you reduce your fuel consumption. With SyncUP FLEET’s reports you can improve your fleet’s fuel economy and observe side-by-side fuel data that will allow you to monitor any driving behavior that is linked to increased fuel costs.

Dashboard
As a manager, you understand the importance of making fast and accurate decisions when it comes to managing and growing your business. Leveraging the power of the SyncUP FLEET dashboard gives you visibility into idle cost savings and speeding reports, and helps you understand which vehicles are being utilized effectively to ensure you are driving costs down and productivity up. With SyncUP FLEET dashboard reporting, you can effectively manage fuel consumption, driver behavior, and asset utilization to ensure your business is reducing operation expenses and increasing profitability.

Idle reporting
T-Mobile SyncUP FLEET idle reporting uses data to make comparisons between drivers or vehicles to target fuel efficiency. You can keep track of the driving behaviors that are negatively impacting your fleet’s fuel economy.

Detect engine issues in advance
By managing your vehicle fault code information, you can proactively attend to engine issues early before they turn into costly repairs or vehicle downtime. These vehicle codes quickly identify and locate the engine issue, helping you save on vehicle inspection time and costs.
