

Sensor Solutions for Healthcare

When it comes to managing your healthcare facilities, it is important to keep track of all aspects of your operation. Effective monitoring can have a big impact on the safety and efficiency of your business, helping to avoid costly downtime, damage, and other issues.

However, monitoring your people, situations, and assets can be a challenge. Manual checks can be time consuming, expensive, and prone to error.

Sensor Solutions from T-Mobile for Business allows you to monitor a wide variety of situations from one system, so you can ensure your operations run smoothly and your people and assets are protected.

This solution provides:

- 24/7 remote monitoring
- Instant alerts for issues
- Actionable data and reports
- Mix and match sensors
- Quick and easy setup
- Web-based portal

Select and combine sensor applications, including:

Temperature Monitoring

Meet regulatory compliance and maintain proper safety with 24/7 automated temperature monitoring for pharmaceuticals, vaccines, blood, food storage, and more.

Room Airflow

Continuously measure patient room pressure to verify proper airflow and pressure and reduce the risk of environmental infection. This helps healthcare facilities ensure patient safety.

Leak Detection

Avoid costly repairs due to water damage. Receive alerts when water is detected in areas such as water heaters, sinks, utility closets, and bathrooms.

Indoor Air Quality

Create an optimal facility environment with indoor air quality monitoring. Protect patient and employee health and meet indoor air quality regulations.

Indoor Asset Tracking

Easily track valuable medical equipment at any time with on-demand location reporting to improve business efficiency, save time, and reduce operating costs.

Push Button Alert System

Ensure at-risk worker safety in healthcare facilities by providing wearable buttons that can be used to alert security in case of an emergency and accurately report location.

HVAC Monitoring

Know when it's the right time to replace HVAC filters to ensure proper air quality and ventilation in facilities. Optimize your HVAC system while reducing operating costs.

Waste/Bin Monitoring

Designed for bin status detection, this wireless sensor retrofits to your existing bins. It detects and alerts on statuses for full/empty bins, flame risk, or inclined (fall).

Ambient Room Monitoring

Spikes in temperature and humidity can cause damage to equipment, materials, and goods. Monitor ambient conditions of ORs to ensure inventory protection.

A scalable, end-to-end remote monitoring solution for healthcare

Choose from a variety of easy-to-deploy sensors that connect wirelessly to a single gateway to create a custom solution that answers the operational needs of your healthcare facility and allows you to build on your investment.
