

## Spireon CamCoach™

Take driver safety to the next level with visual context and enhanced driver coaching with CamCoach. This AI dashcam fully integrates with the Spireon FleetLocate fleet management solution.

## Enhance driver safety with in-vehicle cameras.

Spireon CamCoach is a dual-camera dashcam that leverages AI to detect unsafe driving and trigger in-cab driver alerts. The advanced technology provides visual context into driver actions as well as documentation for incidents.

### Encourage safer driving.

Help keep your drivers more attentive and cautious on the road with automatic alerts to notify them of any risky behavior.

### Gain context and visual evidence.

View actions inside and outside the vehicle to better establish causation and liability in the case of an accident or determine the cause of risky driving like swerving and hard braking.

### Protect against fraudulent claims.

Gain the ability to go back and verify what actually happened in the event of a claim against your driver by another driver.

### Help reduce insurance premiums.

Get the opportunity to lower your insurance premium with an insurer that recognizes the benefits of a dashcam.
