

# Modernize federal agencies with T-Mobile® for Government solutions

---

## A trusted partner for digital transformation

Digital tools help federal agencies stay connected, improve efficiency, and streamline communications—contributing to the better management of information, people, and resources.

However, for these tools to support the complexities of federal networks, they need the foundation of a standardized, modern 5G network solution.

## Here's how T-Mobile for Government can assist your mission:

Our **advanced 5G network** leverages specific frequency bands to bring federal agencies dependable network access throughout operations. This improved connectivity supports the delivery of time-sensitive communications and information sharing. Our 5G network provides the infrastructure that enables IoT and innovative solutions to help improve outcomes, reduce workload strain, and save time for agency staff.

For federal agencies enrolled in the Wireless Priority Service program, **priority access and prevention** helps maintain the continuity of essential communications in the face of emergency. We'll not only move your calls to the front of the line, but we'll also drop non-essential calls in an emergency to make way for your critical alerts and communications.

**Stateside International Unlimited Calling and Texting** makes connecting with partners abroad simple, allowing your agency to send and receive unlimited texts to any country in the world where texting is available (except Cuba or Wallis Futuna). Talk to your T-Mobile for Government account leader to learn how to add unlimited calling from the U.S. to landlines in 70+ countries and destinations and mobile lines in 30+ countries and destinations—including discounted calling rates from the U.S. to all other countries and destinations.

**Mobile Without Borders** keeps your agency connected with unlimited talk and text between the U.S., Mexico, and Canada on mobile and landlines. Get up to 5GB of 4G LTE data (or a maximum of your plan's high-speed data allotment, whichever comes first) for on-phone data and mobile hotspot usage.

**High-speed data abroad** gives U.S. federal agencies no-charge texting, unlimited data, and discounted calling in 210 countries and destinations. Enjoy up to 5GB of high-speed data in 11 European countries plus 256kbps speeds in all other Simple Global countries or after 5GB is used—keeping teams connected during international travel to better serve citizens back home.

**T-Mobile In-Flight Connection** provides federal agencies with connectivity so teams can work optimally while traveling, even at 30,000 feet in the air. Limit disruptive gaps in communication and enjoy four full-flight Wi-Fi sessions per year, unlimited one hour Wi-Fi sessions, and unlimited texting where available.

**Our team of dedicated government experts** do more than answer routine account questions—they serve as collaborative advisors, from planning through execution. They can help your agency identify the most effective and feasible solutions to serve your citizens, as well as offer strategies to implement those technologies into your existing workflows and objectives.

**T-Mobile for Government has the largest, fastest 5G network, covering more of the U.S. than any other carrier. We're ready to serve alongside you as an invested, trusted partner and help deliver services and solutions to support your mission.**

**Let's discuss how T-Mobile for Government can modernize your federal agency's communications.**

Qualifying service required for certain features. Capable device required for 5G; coverage not available in some areas. Some uses may require certain plan or feature; see T-Mobile.com. Fastest: Based on median, overall combined 5G speeds according to analysis by Ookla® of Speedtest Intelligence® data 5G download speeds for Q1 2022. Ookla trademarks used under license and reprinted with permission. **Int'l Roaming:** Usage may be taxed in some countries. Calls from Simple Global countries, including over Wi-Fi, are \$.20/min. (no charge for Wi-Fi calls to U.S., Mexico and Canada); customers on consumer plans (e.g. some sole proprietors) pay an additional \$.05/min.
