

Global SIP Trunking

Traditional telephony is complicated and expensive, requiring multiple distinct networks to connect offices. SIP Trunking from T-Mobile can help you simplify your communications by offering voice, video, and data over an efficient, trusted IP network.

Eliminate expenses

Centralized, cloud-based system erases the need to operate multiple networks/bills and eliminates expensive, physical PRI connections.

Employee productivity

Allow your employees to use any IP device, and expand beyond voice with available integrated instant messaging, conferencing, employee presence information, and more.

Operational flexibility

Avoid missing calls with the **200% bursting capability** that provides elasticity for seasonal demand or an unexpected increase in call volumes.

Connectivity options

Connection is delivered over **high-quality T-Mobile MPLS Network, Dedicated Internet Access, or broadband** with geographically redundant data centers.
