

Wave Service

Meet network demands with Wave Service from T-Mobile. This premium point-to-point optical transport provides reliable and dedicated connectivity for your critical, high-capacity business applications.

Business continuity

Our high-capacity network offers **near 100% availability**, providing a reliable platform for your business.

Speed and productivity

Wave Service gives you the ability to carry large amounts of data over a geographically dispersed, nationwide footprint with **high-speed connectivity**.

Security and privacy

Help ensure corporate and customer data stays secure with a **dedicated, private network** for the transport of latency-sensitive applications.

Application support

10G, 40G, and 100G speeds support growing demand for **high-bandwidth applications**.

Visit t-mobile.com/wiredpartner to learn more.
