Charges and Terms Common to All Plans

One-time fees N/A

SIM Starter Kit \$25 (postpaid and no credit check); \$10 (prepaid)

Government Taxes and Fees, and Other Carrier Surcharges May Also Apply: Sales tax and regulatory fees included in monthly service price for T-Mobile ONE plans.

Performance - [Individual experience may vary](#). For performance information relating to specific geographic areas, see our [coverage map](#) or click [here](#).

4G LTE (On-Device)	4G LTE (Smartphone Mobile HotSpot/Tethering)	4G HSPA+	3G HSPA	2G
Typical¹ Speed	Typical¹ Speed	Typical² Speed	Typical² Speed	Typical² Speed
<i>7 – 40 Mbps (peaks up to 90 Mbps; min. expected speeds of less than .1 Mbps)</i>	<i>3 – 25 Mbps (peaks up to 90 Mbps; min. expected speeds of less than .1 Mbps)</i>	<i>2 – 6 Mbps downstream .5 – 1.8 Mbps upstream</i>	<i>400 – 700 kbps downstream 100 – 250 kbps upstream</i>	<i>40 – 200 kbps downstream 20 – 80 kbps upstream</i>

¹ LTE projections are based third-party, crowd-sourced data for the 25th and 75th percentiles of speed tests. Peak speed represents the 99th percentile.

² Non-LTE projections are based on internal testing and testing from third-parties.

<i>downstream</i> 4 – 20 Mbps (peaks up to 35 Mbps; min. expected speeds of less than .1 Mbps)	<i>downstream</i> 2 – 10 Mbps (peaks up to 35 Mbps; min. expected speeds of less than .1 Mbps)			
<i>upstream</i>	<i>upstream</i>			
Typical Latency	Typical Latency	Typical Latency	Typical Latency	Typical Latency
30 – 55 ms	30 – 55 ms	60 – 180 ms	100 – 450 ms	400 – 900 ms

Network Management

Application-specific network management practices?

Yes

T-Mobile utilizes streaming video optimization technology throughout its network, which improves overall data usage management of the network, resulting in greater network speeds and throughput for other customers using data because less network payload is dedicated to video. T-Mobile optimizes data by adjusting the delivery rate for streaming video to up to 1.5Mbps, which causes the video to lower resolutions and use less data. Learn more [here](#).

Subscriber-triggered network management practices?

Yes

T-Mobile employs a number of subscriber-triggered network management practices to provide the best possible experience for the most possible customers, including managing significant high-speed data usage through prioritization. On all plans, during congestion the top 3% of data users (currently over 32GB per month) may notice reduced speeds until the next bill cycle as a result of this prioritization policy.

Additionally, T-Mobile prioritizes on-device data over tethering data at times and at locations where there are competing customer demands for network resources, which may result in slower tethering speeds.

For T-Mobile ONE, T-Mobile ONE Plus and T-Mobile ONE Plus International customers: If a customer is in the top 3% of data users during a billing cycle and using their device for tethering for the majority of their use over an extended period of time, T-Mobile may contact them to discuss their plan and options.

T-Mobile also reserves the right to suspend, restrict, or terminate service, or take other actions as necessary based on a violation of its Terms and Conditions. Learn more [here](#).
