- **Wearables:** Add smartwatches and other wearables to T-Mobile ONE for \$5/month at 2G speeds. If a wearable is your only line, unlimited 2G data is \$15/month per line.
- **Stateside International Talk:** Add unlimited calling to landlines in 70+ countries and mobile numbers in 30 countries for \$15/month per line.
- **Smartphone Mobile Hotspot:** Add 5GB of high-speed tethering when you need it for \$15.
- **Higher-Definition Video:** T-Mobile ONE includes unlimited video at standard definition—typically DVD quality (480p)—from any service. Customers can get higher-definition video, up to 4k, for \$25/month per line.
- **High-speed International Data:** In addition unlimited text and data roaming and low flat-rate calling in 140+ countries included at no extra cost with Simple Global, high-speed international data passes are also available.

Who Gets It

- **New postpaid customers** will be able to get T-Mobile ONE starting Tuesday, September 6th.
- **New prepaid customers** will be able to get T-Mobile ONE in the future.
- **Current T-Mobile customers** can keep the plans they have or choose to sign up with T-Mobile ONE. It's their call.

Network Management

As with T-Mobile Simple Choice, customers using the most data, the highest 3% (currently those using more than 26GB of high-speed data/month) may see their data traffic prioritized behind other users once they cross that threshold during their billing month. As a result, they may notice relatively slower speeds but only at specific times and places that may experience high, competing network demand or congestion.

For more information on T-Mobile ONE, see www.t-mobile.com.

Plus taxes and fees. Pricing via bill credits while using AutoPay: prior month's payment must process successfully for discount next bill cycle. Not for extended international use; you must reside in the U.S. and primary usage must occur on our U.S. network. See T-Mobile.com/OpenInternet for details on data prioritization.
