

Let's get started

The SyncUP DRIVE® device plugs into the OBD-II (On-Board Diagnostics) port. Most cars and light-duty trucks that are model year 1996 or newer in the USA have an OBD-II port.

If you're still not sure of your vehicle's compatibility, you can check it here: www.syncupdrive.com

Download the app & install the device

The SyncUP DRIVE app is available on the Apple App Store and on Google Play. Search for "SyncUP DRIVE."

Follow the instructions in the app to install the device.

Helpful tip: Make sure you are running the latest version of your operating system and that your phone meets the minimum technical requirements to run the app.

Your SyncUP DRIVE device

- 1) OBD-II interface
- 2) Reset
- 3) LED 1 (Signal)
- 4) LED 2 (Power)

LED status lights

Approved firmware versions

This device will only operate with firmware versions that have been approved for use by your wireless carrier and the device manufacturer. If unauthorized firmware is placed on the device it will not function

Information about safeguarding devices

We encourage customers to take appropriate measures to secure their devices and invite them to take advantage of the features available on this device to help secure it from theft and/or other unauthorized access and use. This device has a locking function (e.g., user-defined codes or patterns) that can serve as a first line of defense against unauthorized use or access to stored information. Preloaded security applications that allow customers to track or locate misplaced devices can be found on several devices. Lost or stolen devices should be immediately reported to your wireless carrier so that proper measures can be taken to protect accounts. For additional information, visit your wireless carrier's Privacy Policy. P626820
