Dynamic Noise Suppression from Audience

Your phone is equipped with an advanced voice processing chip that delivers clear mobile calls by suppressing background noise, intermittent sounds (like a siren or nearby conversation), and echoes, allowing you to hear and be heard nearly anywhere.

How Does It Work?

Based on the intelligence of the human hearing system, the technology:

- Captures, evaluates and distinguishes all the sound signals surrounding your phone, and the person you're speaking with.
- Then isolates the primary voice in conversation and filters out the background noise - so the person you're calling hears only your voice, without disturbing background noise.
- Dynamically equalizes and adjusts voice volume to optimize your calling experience, so you can hear clearly and don't need to speak louder to overcome surrounding noise.

The noise suppression technology is built-in and already enabled in your new mobile phone. So it's ready to provide unsurpassed voice clarity with every call.

Index 165
Section 1: Getting Started

This section explains how to start using your phone. Start by configuring your hardware, activating your service, and then setting up your voice mail.

Understanding this User Manual

The sections of this manual generally follow the features of your phone. A robust index for features begins on page 165. Also included is important safety information that you should know before using your phone. This information is available near the back of the guide, beginning on page 130.

This manual provides navigation instructions according to the default display settings. If you select other settings, navigation may be different.

Unless otherwise specified, all instructions in this manual assume you are starting from the Home screen and using the available keys.

Note: Instructions in this manual are based on default settings, and may vary from your phone, depending on the software version on your phone, and any changes to the phone’s Settings.

Unless stated otherwise, instructions in this User Manual start with the phone unlocked, at the Home screen.

All screen images in this manual are simulated. Actual displays may vary, depending on the software version of your phone and any changes to the phone’s Settings.

Special Text

Throughout this manual, you’ll find text that is set apart from the rest. These are intended to point out important information, share quick methods for activating features, to define terms, and more. The definitions for these methods are as follows:

- **Notes**: Presents alternative options for the current feature, menu, or sub-menu.
• **Tips**: Provides quick or innovative methods, or useful shortcuts.
• **Important**: Points out important information about the current feature that could affect performance.
• **Warning**: Brings to your attention important information to prevent loss of data or functionality, or even prevent damage to your phone.

**Text Conventions**

This manual provides condensed information about how to use your phone. To make this possible, the following text conventions are used to represent often-used steps:

- Arrows are used to represent the sequence of selecting successive options in longer, or repetitive, procedures.
- **LSK** Left Softkey (indicates the feature is available by pressing the left softkey).
- **RSK** Right Softkey (indicates the feature is available by pressing the right softkey).

**Example**: “From the Home screen, press **Menu Key** (LSK) ➔ **Settings** ➔ **Bluetooth** ➔ **Turn Bluetooth on**.”

**Activating Your Phone**

When you subscribe to a cellular network, you are provided with a plug-in SIM card containing subscription details, such as your PIN, available optional services, and many other service features.

**Installing the SIM Card**

**Important!** The plug-in SIM card and its contacts information can be easily damaged by scratching or bending, be careful when handling, inserting, or removing this card. Keep all SIM cards out of reach of small children.

If necessary, switch off the phone by pressing and holding until the power-off image displays.

1. Remove the back cover by inserting a fingernail into the slot on the bottom of your phone (1), and lifting towards the top (2).
2. Lift and remove the battery.

3. Carefully slide the SIM card into the SIM card socket until the card locks into place (3). Make sure that the card’s gold contacts face into the phone and that the upper-left angled corner of the card is positioned as shown.

Note: If the card is not inserted correctly, the phone will not detect the SIM card. Remove the battery and re-orient the card back into the slot.

4. Replace the battery:
   - Insert the battery into the opening on the back of the phone, making sure the connectors align (1).
   - Press the battery down until it clicks into place (2).
5. Reinstall the battery cover by sliding it back onto the phone until you hear it securely click. Make sure the battery is properly installed before switching on the phone.

---

### Charging a Battery

Your phone is powered by a rechargeable Li-ion battery. A travel charger, used for charging the battery, is included with your phone. Use only approved batteries and chargers. Ask your local Samsung dealer for further details. Although you can use the phone while the battery is charging, doing so will require additional charging time.

**Note:** You should fully charge the battery before using your phone for the first time.

A standard battery allows up to 5.5 hours of talk time.

**Important!** Talk and standby times and other specifications are provided by the manufacturer and are approximate. Actual performance varies based upon features or services used, network configuration, signal strength, operating temperature, customer use, and other factors.

1. With the battery installed, temporarily remove the plastic cover on the right side of the phone and plug in the travel charger’s connector into the jack.
Important! Verify that the handset battery is installed prior to connecting the travel charger. If the battery is not installed and the travel charger is connected the handset will power cycle continuously preventing proper operation.

2. Plug the charger’s power plug into a standard AC wall outlet.

Note: The previous illustration displays the incorrect method for connecting the charger. If attempted, damage to the accessory port will occur therefore voiding the phone’s warranty.

3. When charging is finished, first unplug the charger’s power plug from the AC wall outlet and then disconnect the travel charger’s connector from the phone then resecure the plastic cover over the interface jack on the phone.

Warning! Failure to unplug the travel charger before you remove the battery, can cause damage to the phone.

Low Battery Indicator

When the battery is weak and only a few minutes of talk time remain; a warning tone sounds and the low battery message repeats at regular intervals on the display. In this condition, your phone conserves its remaining battery power, not by turning off the backlight, but by entering the dimming mode. When the battery level becomes too low, the phone automatically turns off.
Switching the Phone On or Off

1. Press and hold until the phone switches on.
2. If prompted to enter the phone password, use the keypad to enter your password and press Confirm (LSK) or .
3. If prompted to enter a PIN, use the keypad to enter the PIN and press Confirm (LSK) or . For further details, see “Check PIN code” on page 117.

The phone searches for your network and after finding it, the term “T-Mobile” displays on the upper left half of your screen. Now you can make or receive calls.

Note: The display language is preset to English at the factory. To change the language, use the Language menu. For more information, refer to “Language” on page 120.

4. When you wish to switch off the phone, press and hold until the power-off image displays.

Setting Up Your Voice Mail

For new users, follow the instructions below to set up voice mail:

1. From Home screen, press and hold on the keypad. You may be prompted to enter a password.
2. Follow the tutorial to create a password, a greeting, and your name.

Note: These steps may be different depending on your network.

Accessing Your Voice Mail

You can access your voice mail by either pressing and holding on the keypad or by using the phone’s menu.
Visual Voicemail

Visual Voicemail gives you a quick and easy way to access your voicemail. Now you can find exactly the message you are looking for without having to listen to every voicemail message first. This new feature periodically goes out to your voicemail, and gathers the caller information from all of the current voicemails.

Setting Up Your Visual Voicemail

Your device automatically transfers all unanswered calls to your voicemail, even if your device is in use or turned off. You should set up your voicemail and personal greeting as soon as your device is activated.

Enabling Your Visual Voicemail

1. From Home screen, press Menu ➔ Messaging ➔ Voicemail.
2. Press Yes (LSK) to setup your visual voicemail for the first time.
3. When connected to the online visual voicemail, select Enable Visual Voicemail and follow the onscreen prompts.

Accessing Your Visual Voicemail

- From Home screen, press Menu ➔ Messaging ➔ Voicemail.
Section 2: Understanding Your Phone

This section outlines some key features of your phone. It also displays the screen and the icons that are displayed when the phone is in use.

Features of Your Phone

Your phone is lightweight, easy-to-use and offers many significant features. The following list outlines a few of the features included in your phone.

- 1.3 Megapixel Camera with Camcorder
- 2.1 Bluetooth® Wireless Technology
- MP3 Music Player
- Visual Voicemail
- Pre-loaded games
- Picture and Text Messaging
- Web enabled
- Keypad
Open View of Your Phone

The following illustrations show the main elements of your phone:

Keys

The following list correlates to the illustrations.

1. **Speaker** allows you to hear the other caller and the different ring tones or sounds offered by your phone.

2. **OK (Select) key** allows you to accept the choices offered when navigating through a menu.

3. **Left Soft key** allows you to select soft key actions or menu items corresponding to the bottom left line on the display screen. It also provides quick access to the menu screen.

4. **Send key** allows you to make or answer a call. From Home screen, recalls the last number dialed or received when held down.

5. **Voice Mail key** allows you to quickly access your voice mail. Press and hold this key for two seconds to automatically dial your voice mail’s phone number.

6. **Special function keys** allow you to activate unique features while in Home screen. In Home screen, if you press and hold the `#` key, you can turn on the Vibration Mode. Press and hold the `*` key to insert a Pause (P).
7. Microphone is used during phone calls and allows other callers to hear you clearly when you are speaking to them. It is also used in making voice note recordings.

8. Alphanumeric keys allow you to enter numbers, letters, and some special characters.

9. Cancel/Clear key deletes characters from the display. In Menu mode, this key returns you to the previous menu level.

10. Power On/Off (Exit) key ends a call. Press and hold this key for two seconds to turn your phone on or off. While in the Menu mode, it returns the phone to Home screen and then cancels your input.

11. Right Soft key allows you to select soft key actions or menu items corresponding to the bottom right line on the display screen. It also provides quick access to web2go.

12. Navigation key scrolls through the phone’s menu options and acts as a shortcut key from standby mode. In Menu mode, scrolls through the phone’s menus and Phonebook. From Home screen:
   - Up key: allows you to directly access the Call history.
   - Down key: allows you to directly access the Contact list.
   - Left key: allows you to Create a Text message.
   - Right key: allows you to directly access the Voice recorder.

Tip: When entering text, use the Left or Right Navigation key to mark the position of the cursor.

13. Display shows all the information needed to operate your phone, such as the received signal strength, phone battery level, and time.
Closed View of Your Phone

The following illustrations show the external elements of your phone:

1. **Volume keys** allow you to adjust the Ring volume in standby mode (with the phone open) or adjust the Speaker volume during a call. When receiving an incoming call, if you press the volume key, you can mute the ring tone. If you press and hold the volume key, you can reject the call.

2. **Camera lens** as part of the built-in camera, you can take pictures and shoot videos.

3. **Front Display** shows can be configured to display either a Wallpaper (Clock or My image) or a Greeting message.

4. **Power/Accessory Interface connector** allows you to connect a power cable or optional accessories, such as a hands-free headset for convenient, hands-free conversations.

   **CAUTION!** Inserting an accessory into the incorrect jack may damage the phone.

5. **Camera key** lets you to take pictures when you are in camera mode.
Display Layout

Your phone’s display screen provides a wealth of information about your phone’s status and options. The display has 3 areas:

- **Icons**
- **Soft function keys**

Missed Messages Tab

When you receive new messages, icons display in two locations, on the phone’s screen, Missed Messages tab, and in the icon bar at the top of the screen.
**Icons**

This list identifies the symbols you’ll see on your phone’s display screen:

- ![Signal Strength](image1.png)
  - Shows the received signal strength. The greater the number of bars, the stronger the signal.

- ![EDGE Network](image2.png)
  - Displays when connected to the EDGE network.

- ![EDGE Communication](image3.png)
  - Displays when your phone is communicating with the EDGE network.

- ![3G Active](image4.png)
  - Displays that 3G data service is active.

- ![3G Active & Communicating](image5.png)
  - Displays that 3G data service is now active and communicating.

- ![Battery Level](image6.png)
  - Shows the level of your battery. The more bars you see, the more power remains.

- ![Call In Progress](image7.png)
  - Displays when a call is in progress.

- ![No Reception](image8.png)
  - Displays when the phone is not receiving a signal.

- ![Airplane Mode](image9.png)
  - Displays when the phone is in Airplane mode.

- ![Bluetooth Active](image10.png)
  - Displays when Bluetooth wireless technology is active.

- ![Muted Call](image11.png)
  - Indicates the current call is Muted.

- ![Unmuted Call](image12.png)
  - Indicates the current call is Unmuted.

- ![USB Communication](image13.png)
  - Displays when USB communication is active.

- ![Silent Mode](image14.png)
  - Displays when Silent Mode is active. All incoming sounds are turned off.

- ![Vibration Mode](image15.png)
  - Displays when Vibration Mode is active. The ringer is set to vibrate only.

- ![Missed Call](image16.png)
  - Displays in the View Tab when you missed a call.

- ![Missed Message](image17.png)
  - Displays in the View Tab when you missed a message.
Displays in the View Tab when you missed a voicemail message.
Displays when a new text message is received.
Displays when a new visual voicemail is received.
Displays when a new voicemail is received.
Displays when a new picture message or Audio postcard is received.
Displays when the Call Forwarding feature is active. For more details, see “Call Forwarding” on page 125.

**Backlight**

A backlight illuminates the internal display and the keypad. When you press any key, the backlight comes on. It goes off when no keys are pressed within a given period of time, depending on the setting within the **Backlight time** menu. The display turns off after one minute to conserve battery power.

The **On** setting is how long the keypad backlight is on. The **Dim** option is how much longer after the keypad backlight goes off that the display remains lit.

To specify the length of time the backlight is active, access the **Backlight time** menu:

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Personalize** ➔ **Display** ➔ **Backlight time** and press **Select** (LSK) or **OK**.
2. Select the **On** option. Choose from **5 sec**, **15 sec** or **30 sec** and press **OK**.
3. Select the **Dim** option. Choose from **Off**, **5 sec**, **15 sec**, or **30 sec** and press **OK**.
4. Press **Save** (LSK) to retain your new settings.
Display

Your phone has a display on the front of the phone (when closed). It indicates when you have an incoming call or message. It also alerts you at a specified time when you have set an alarm. The backlight turns on and the corresponding icon displays on the screen.

The display shows the current time on a digital clock.

Help

Help is designed to work with the browser to show you some of the unique features of your phone. You can search help files on the fly while traveling, at home or anywhere.

1. From Home screen, press Menu (LSK) → My Account.
2. The browser displays general help information such as Web, Downloads, and My Account.

For more information on browser options, see “web2go” on page 66.
Section 3: Call Functions

This section describes how to make or answer a call. It also explains the features and functionality associated with making or answering a call. For more information on ringtones see “Sound profiles” on page 108. For more information, refer to “Call Forwarding” on page 125.

Making a Call

- From the (LSK), enter the desired number and press .

Note: When you activate the Auto redial option (within the Call settings menu), the phone automatically redials up to 10 times when the recipient does not answer your call or is already on the phone, provided your call is not sent to voicemail. For more information, see “Auto redial” on page 123.

Correcting the Number

1. Press to clear the last digit displayed.
   - To clear any other digit in the number, press the Left or Right Navigation key until the cursor is immediately to the right of the digit to clear and then press . You can also enter a missing digit.

2. Press and hold to clear the entire display.

Ending a Call

- When you want to finish your call, briefly press .

Redialing the Last Number

The phone stores the numbers of the calls you’ve dialed, received, or missed if the caller is identified.

To recall any previously dialed numbers:

1. If you entered characters on the display, press to return to Home screen.

2. Press the Up Navigation key to display the Call history screen (calls are displayed in the order you dialed or received them).

Making an International Call

1. From the Home screen, press and hold . The + character displays.
2. Enter the country code, area code, and phone number.
3. Press to make the call.
3. Use the Up and Down Navigation keys to scroll through the numbers and highlight the number you want. With the entry highlighted from the Call history screen press Options (LSK) to display the following options:
   • Call: Places a call back to the number.
   • Send message: Allows you to send a Message.
   • Save to contacts: Allows you to save the selected phone number to the Contacts list.
   • Delete: Allows you to delete the selected number or all call records.

– or –

4. To view details of the highlighted number, press View ( ). Before you dial the number, you may also press Options (LSK) to display the following options:
   • Send message: Allows you to send a Message.
   • Save to contacts: Allows you to save the selected phone number to the Contacts list.
   • Delete: Allows you to delete the selected number or all call records.

5. Press to dial the number.

Making a Call from the Phonebook

You can store regularly used phone numbers into the phone’s memory or onto your SIM card. These entries are collectively called the Phonebook.

Once you have stored a number in Contacts, you can dial it by pressing only a few keys. You can also assign your most frequently-used numbers to number keys using the Speed Dial feature.

Adjusting the Call Volume

During a call, use the Volume keys on the left side of the phone, to adjust the speaker volume.

- Press the Up volume key to increase the volume level and Down volume key to decrease the level.

Tip: From Home screen, you can also adjust the ring volume using these keys.
Answering a Call

When somebody calls you, the phone rings and displays the incoming call image. The caller’s phone number, or name if stored in Contacts, is then displayed.

1. Press \(\text{ or Accept (LSK)}\) to answer the incoming call.
   - If the Any Key answer option is enabled within the Answer options menu (Menu \(\Rightarrow\) Settings \(\Rightarrow\) Call settings \(\Rightarrow\) Answering mode) you can press any key to answer a call except \(\) and Reject (RSK).

   **Note:** To reject an incoming call, press Reject (RSK) or \(\) .

2. Press \(\) to end the call.

   **Note:** You can answer a call while using the Contacts or menu features. After ending the call, the phone returns to the function screen you were previously using.

---

Call History

All missed, dialed and answered calls are listed in the Call history screen. This list of your call history is continually updated as new numbers are added to the beginning of the list and the oldest entries are removed from the bottom of the list.

- From Home screen, press Menu (LSK) \(\Rightarrow\) Call history.

   **Note:** While on the Home screen, press the Up Navigation key to scroll between the following Call history tabs: All calls, Missed calls, Dialed calls, Answered calls, and Voice mail.

---

All calls

This menu lets you view the 90 most recent calls you received, dialed, missed, or voicemail. The name or number, if already stored in your Contacts, displays with the number of occurrences for each number.

When you view the numbers in this list, the phone icon to the left of the number indicates the call type:
• **Answered**: Indicates any received calls that were answered.
• **Missed**: Indicates any missed calls.
• **Dialed**: Indicates all outgoing calls made from your phone.

**Answered Call**: Indicates any received calls that were answered.

**Missed Call**: Indicates any missed calls. These are routed to your voicemail.

**Dialed Call**: Indicates all outgoing calls made from your device.

**Voicemail**: Indicates any received calls that were not answered and sent directly to your voicemail.

**Note**: At any time while you are in the Call history menu, you may use the **Left** or **Right** Navigation keys to scroll between **All calls**, **Missed calls**, **Dialed calls**, **Answered calls**, and **Voice mail**.

**Note**: Recent Calls records only calls that occur while the phone is turned on. If a call is received while your phone is turned off, it will not be included in the phone’s call history. If you return a call from the voicemail menu, it will not be included in your phone’s history.

**Missed calls**

This menu lets you view the 30 most recent calls you received, but did not answer. The name and number, if already stored in your Contacts, displays with the number of occurrences for each number.

When you are unable to answer a call for any reason, you can find out who is calling you, if this service is available, so that you can call the person back.

The number of missed calls displays on the Home screen on the Missed Call/Messages tab, immediately after a call is missed.
To view a missed call immediately:

1. If the display is off, press the Volume key to activate the display.

2. Press View (LSK) or press OK. The number corresponding to the most recently missed call displays, if available. If only one missed call has occurred, the LSK reads Call.
   — or —
   Press the Up Navigation key to scroll through the missed calls.

3. While in the Call history screen, scroll through the missed calls, press the Up or Down Navigation key.

4. Press to call the displayed number.
   — or —
   Press View (OK) to display the call details.

5. Press Options (LSK) to access the following options:
   • Call: Places a call back to the number.
   • Send message: Allows you to send a Message or Audio postcard.
   • Save to contacts: Allows you to save the selected phone number to the Contacts list.

   • Delete: Allows you to delete the selected number or delete all call records.

Tip: You can press at any time to exit the Missed Call feature.

**Dialed calls**

This menu lets you view the most recent calls you dialed. The name and number, if already stored to Contacts, displays with the number of occurrences for each number.

**Answered calls**

This menu lets you view the 30 most recent calls you received. The name and number, time and date, displays with the number of occurrences for each number.

**Voicemail**

This menu lets you view the 30 most recent voicemail calls you received.
Delete all Call history entries

This menu allows you to delete all of the records in each call record separately, or you can delete all of your call records at one time.

1. From the Home screen, press the Up Navigation key to display Call history.
2. Press Options (LSK) → Delete → All.
3. Press Yes (LSK) to delete all files.

Vibration Profile

The Vibration audio profile is convenient when you wish to stop the phone from making any noise, in a theater for example.

From Home screen, press and hold # until the “Vibration profile on” message and ( presses. In this Vibration profile, instead of sounds, your phone vibrates. For more information, refer to “Sound profiles” on page 108.

To exit and reactivate the previous sound settings, press and hold # again until the “Normal profile on” message displays. The Vibration profile icon ( ) no longer displays.

Selecting Functions and Options

Your phone offers a set of functions that allow you to customize it. These functions are arranged in menus and sub-menus, accessed using the two soft keys. Each menu and sub-menu allows you to view and alter the settings of a particular function.

Soft Keys

The roles of the soft keys vary depending on the function you are currently using. The labels on the bottom line of the display just above each key indicate their current role. The two available keys are Left Softkey (LSK) and Right Softkey (RSK).
Selecting Options

To view the various functions and options available, you must press an available softkey and select an option by:

1. Press the appropriate soft key.
2. Press Select (LSK) to select the function or the highlighted option.
   – or –
   Press the Back soft key to move back up one level in the menu structure.
3. Press the Down Navigation key to view the next function or highlight the next option on a list.
   – or –
   Press the Up Navigation key to move back to the previous function or option on a list.
4. Press ✪ to exit the menu structure without changing the settings.
5. In some functions, you may be asked for a password or PIN. Enter the correct code and press the Confirm (LSK) or ✪.

When you access a list of options, your phone highlights the currently active option. If there are only two options, such as On/Off or Enable/Disable, your phone highlights the option that is not currently active, so you can select it.
Options During a Call

Your phone provides a number of control functions that are available for use during a call.

Switching off the Microphone (Mute)

You can temporarily switch your phone’s microphone off, so that the other person cannot hear you.

Example: You wish to say something to a person in the room but do not want the person on the phone to hear you.

To switch the microphone off temporarily:

- Press ( ). The other person can no longer hear you. The Mute icon ( ) at the left of the screen.

To switch the microphone back on:

- Press ( ). The other person can hear you again. The Unmute icon ( ) displays atop the current call information.

Putting a Call on Hold

You can place a current call on hold and make a new outbound call if your network supports this service.

To place a call on hold:

1. Press Options (LSK) \(
2. Press Resume (RSK) to reactivate the call whenever you want.

To make a new call while you have a call in progress:

1. While in a call, press Options (LSK) \( \rightarrow \) New Call to dial the second call. The first call is automatically placed on hold.

- or -

Press the Options (LSK) \( \rightarrow \) Hold. This places the currently active call on hold and allows you to make a new call.

2. Enter the new phone number that you wish to dial or look it up in the Contact list.

3. Make the second call in the normal way.

When you have both an active call and a call on hold, you may switch between the two calls by placing the current held call to active and then placing the other on hold.
To switch between the two calls:

1. Press the **Options** (LSK) ➔ **Swap**. The current active call is placed on hold and the call on hold is reactivated so you can continue talking.

2. Press 📞 to finish and end each call normally.

**Using the Speakerphone**

While on a call, you can use your Speakerphone by following these steps:

1. Press **Spkr on** (RSK).

2. Press **Spkr off** (RSK) to turn the Speakerphone off.

---

**Important!** For safety information related to speakerphone use, see “*Responsible Listening*” on page 145.

---

**Searching for a Number in Contacts**

You can search for a number in Contacts during a call.

1. During an active call, press **Options** (LSK) ➔ **Contacts**.

2. With the Contacts entries displayed, enter the name to locate in the field above the entries. If you enter the first few letters of the name, the Contact entries list starting with the first entry matching your input. – or –

   Use the **Up** or **Down** Navigation key to highlight a contact.

3. Press **View** (LSK) to display contact information for the highlighted entry.

For further details about the Contact feature, see “*Finding a Contact Entry*” on page 59.
Call Waiting
You can answer an incoming call while you have a call in progress, if this service is supported by the network and you must have previously set the Call waiting option to Activate. For more information, refer to “Call Waiting” on page 126.
You are notified of an incoming call by a call waiting tone.

To answer a new call while you have a call in progress:
1. Press either Accept (LSK) or to answer the incoming call. The first call is automatically placed on hold.
2. Press Options (LSK) ➔ Swap to switch between the two calls.
3. Press Options (LSK) ➔ End ➔ Held call option to end a call on hold.
4. Press to end the current or remaining call.

Making a Multi-Party Call
A multi-party call is a network service that allows up to six people to take part simultaneously in a multi-party or conference call.
For further details about subscribing to this service, contact T-Mobile customer service.

Setting up a Multi-Party Call

Note: A maximum of two callers can be joined to a single multi-party line. You cannot create two multi-party calls.

1. Call the first participant in the normal way.
2. Press Options (LSK) ➔ New call.
3. Enter the number of the second participant and press or press Call (LSK). The first call is automatically placed on hold.
4. To join the first participant to this multi-party call, press Options (LSK) ➔ Join.

Note: These first two calls are then grouped together on screen and displayed in the order in which the calls were made.
Having a Private Conversation With One Participant

When you have two participants in a multi-party session, you might be necessary to place one of those participants on hold so that a private conversation can be held with a single caller. While you are in a multi-party call:

1. While in a multi-party call, press **Options (LSK) ➔ Split**.
2. Highlight the number of the caller with which you want to talk privately and split and press **OK**. The remaining caller is placed on hold.
3. Start your private conversation with the selected caller.

**Note:** You can now talk privately to that person while the other participants can continue to converse with each other. If there is only one other participant, that person is then placed on hold.

4. To return to the multi-party call, press **Options (LSK) ➔ Join**. Each of the multi-party call participants can now hear each other again.

Dropping One Participant

1. While in a multi-party call, press **Options (LSK) ➔ End ➔ Select participant**.
2. Highlight the desired participant to drop and press **OK** to place a checkmark alongside their entry.
3. Press **Drop (LSK)** to drop the participant.
4. Press **End** to end the multi-party call.
Section 4: Menu Navigation

This section explains the menu navigation for your phone.

Menu Navigation

You can tailor the phone’s range of functions to your needs using menus and sub-menus. Menus and sub-menus can be accessed by scrolling using the Navigation keys or by using shortcuts.

Menu Design

The main menu displays as a Grid menu with three rows and three columns.

Accessing a Menu Function by Scrolling

1. In Home screen, press Menu (LSK).
2. Scroll using the Navigation keys to reach a Main menu (for example: Settings). To activate an onscreen option, press either Select (LSK) or OK.
3. If the menu contains sub-menus, (for example: Personalize). Press either Select (LSK) or OK to enter the menu. If the menu you selected contains further options, repeat this step.
4. Press the Up or Down Navigation keys to scroll through the menus.
5. Press either Select (LSK) or OK to confirm the chosen setting.
6. Press Back or to return to the previous menu level.
7. Press to exit the menu without changing the settings.
Using Shortcuts

The menu items, such as sub-menus, and options, are numbered and can be accessed quickly by using their shortcut numbers. Within the main menu’s Grid view, you can access any one of menus or sub-menus by pressing the number keys (1 to 0) corresponding to their location on the screen.

Example: Accessing the Security menu.

1. In Home screen, press **Menu** (LSK).
2. Press **Settings**.
3. Press **Personalize**.
4. Press **Phone settings**.
5. Press **Security**.
This section outlines how to select the desired text input mode when entering characters. This section also describes how to use the T9 predictive text system to reduce the number of key strokes associated with entering text.

### Changing the Text Input Mode

When using your phone, you often need to enter text, such as when storing a name in Contacts, creating your personal greeting or scheduling events on your calendar. You can enter alphanumeric characters by using your phone’s keypad.

Your phone has the following text input modes accessible via the right softkey (RSK):

- **ABC mode**: this mode allows you to enter letters by pressing the key labeled with the letter you want.
- **T9 (English)**: this mode allows you to enter words with only one keystroke per letter. Each key on the keypad has more than one letter; for example, pressing \[4\text{ GHI}\] can enter G, H, or I. However, the T9 mode automatically compares the series of keystrokes you make with an internal linguistic dictionary to determine the most likely word, thus requiring far fewer keystrokes than the traditional ABC mode.
- **Numeric**: this mode allows you to enter numbers.
- **Symbols**: this mode allows you to enter symbols, such as punctuation marks.

When you are in a field that allows characters to be entered, the text input mode indicator displays on the bottom right of the screen.

**Example**: Writing a text message.
1. Press (RSK) to change the text input mode.
2. Scroll to the mode you prefer and press Select (LSK) or . The text input mode indicator displays the new selection in the lower right corner of your display.

The following options are available:
- ABC
- T9 (English)
- Numeric
- Symbol

3. When the Text input mode indicator displays your selected mode, enter text within the text message.

**Using T9 Mode**

T9 is a predictive text input mode that allows you to enter any character using single keystrokes. This text input mode is based on a built-in dictionary.

**Entering a word in T9 mode**

1. When you are in T9 mode (T9 Eng), start entering a word by pressing the 2 to 9 keys. Press each key only once for each letter.

**Note:** Pressing the 1 key enters additional characters.

**Example:** To enter “Hello” in T9 mode, press the 4, 3, 5, 5, and 6 keys.
The word that you type displays on the screen and may change with each consecutive key press due to the internal linguistic dictionary.

2. Enter the whole word before editing or deleting the keystrokes.

3. When the word correctly displays, go to step 4.
   If the word doesn’t display correctly, press §* to display alternative letter choices for the current key you pressed.

**Example:** Both the words “Of” and “Me” use the 6 and 3 keys. The phone displays the most commonly used choice first.

4. Press OK to accept the currently displayed word, insert a space, and start entering the next word.

**Deleting characters in T9 mode**
- Press C once to delete a previous character.
  – or –
  Press and hold C to clear the display.

**Adding a new word into the T9 dictionary**
1. After pressing the keys corresponding to the word you want to add, press §* to display alternative words. If the last alternative word is not recognized by the dictionary, the screen displays Spell on the bottom left line.

2. Press Spell (LSK).

3. Enter the word you want to add using ABC mode. For more information, refer to “Changing the Text Input Mode” on page 33.

4. Press Add (LSK) or OK after you finish entering the new word.
   The word is added to the T9 dictionary and becomes a word for the associated keypress series.

**Note:** This feature may not be available for some languages. The 1 key has some emoticons associated with it. To enter other special characters within the T9 mode, press and hold §* to cycle through these characters.
**Entering additional T9 characters**

To enter periods, hyphens, apostrophes, and other special characters:

- Press `1` to cycle through these available characters (see “Keys” on page 37). T9 mode applies grammar rules to ensure that correct punctuation is used.

**To shift case in T9 mode:**

1. Press `1` to shift case in T9 mode. There are 3 cases: Initial capital (Abc), Capital lock (ABC), and Lower case (abc). The case displays in the upper, right corner of the screen.
2. Enter the next character using the new case. You can move the cursor by using the Navigation keys.

**To delete letters:**

- Press `C` once to delete a previous character.
- Press and hold `C` to clear the display.

---

**Using ABC Mode**

**To enter text in ABC mode:**

1. Press (RSK) to change the text input mode.
2. Scroll to the ABC mode and press Select (LSK) or OK. Use the 2 to 9 keys to enter your text.
3. Press the key labeled with the letter you want. Once for the first letter, twice for the second letter, and so on.

**To enter periods, hyphens, apostrophes, and other special characters:**

- Repeatedly press `1` to cycle through periods, hyphens, apostrophes, and other special characters. ABC mode applies grammar rules to ensure correct punctuation.

**To shift case in ABC mode:**

- Press `1` to shift case in ABC mode. There are 3 cases: Initial capital (Abc), Capital lock (ABC), and Lower case (abc). The case displays in the upper, right corner of the screen. You can move the cursor by using the Navigation keys.
To delete letters:
- Press \( \text{C} \) once to delete a previous character.
  - or -
  Press and hold \( \text{C} \) to clear the display.

**Note:** The cursor moves to the right when you press a different key. When entering the same letter twice or a different letter on the same key, just wait for a few seconds for the cursor to move to the right automatically, and then select the next letter.

**Keys**
By default, the first letter of an entry is capitalized and all consecutive letters are kept in lowercase (unless the Shift key is used). After a character is entered, the cursor automatically advances to the next space after two seconds or when you enter a character on a different key. Characters scroll in the following order (lowercase characters shown in parentheses):

- D E F 3 (d e f 3)
- G H I 4 (g h i 4)
- J K L 5 (j k l 5)
- M N O 6 (m n o 6)
- A B C 2 (a b c 2)
- P Q R S 7 (p q r s 7)
- T U V 8 (t u v 8)
- W X Y Z 9 (w x y z 9)
- 0 (press and hold)
- Symbol (press and hold)
- Shift (Toggles Lower/Uppercase)

### Using the Numeric Mode
The Numeric mode enables you to enter numbers into a text message.

**To enter text in Numeric mode:**
1. Press \( \text{RSK} \) to change the text input mode.
2. Scroll to the **Numeric** mode and press **Select** (LSK) or \( \text{OK} \). Use the 2 to 9 keys to enter your text.
3. Press the keys corresponding to the digits you want to enter.
Using Symbol Mode

Symbol mode enables you to insert symbols and punctuation marks into text. To display a list of symbols press and hold .

To enter text in Symbol mode:

1. Press \( \text{ (RSK) } \) to change the text input mode.
2. Scroll to the Symbol mode and press Select (LSK) or .
3. Use the Navigation key to select an onscreen symbol set and press the corresponding number key.
4. Press OK (LSK). The new symbol is inserted into your message. Each onscreen symbol set offers different symbols for each key.
5. To clear the symbol(s), press . When the input field is empty, this key returns the display to the previous mode.
Section 6: Messaging

This section describes how to send or receive different types of messages. It also explains the features and functionality associated with messaging.

Types of Messages

Your phone provides the following message types:

- Email Messages
- Text Messages
- Picture Messages
- Audio Postcard
- Voicemail

Display Icons for Messages

When your handset receives new messages, icons display on the screen in two locations: on the View Tab that displays on the lower portion of the screen, and on the top of the screen. The following table outlines the icons that appear within the Icon area and View Tabs:

<table>
<thead>
<tr>
<th>Icon area</th>
<th>View Tab area</th>
</tr>
</thead>
<tbody>
<tr>
<td>![Email Icon] A new text message was received.</td>
<td>![Call Icon] A call was missed. ![Message Icon] A new message was missed.</td>
</tr>
<tr>
<td>![Picture Icon] A new Picture message was received.</td>
<td>![Voicemail Icon] A new voicemail message was missed.</td>
</tr>
</tbody>
</table>

View Tab

The View Tab is an area that displays on the screen when a missed call, message, or voicemail is sent to the phone. The three View tabs that display icons are:

- New messages
- Missed calls
- New Voice mail messages
You can search through missed calls or unviewed messages by using the **Right** and **Left** navigation keys to select the associated message tab, then pressing the associated left softkey (**View**, **Call**, or **Dial**).

**Text Messages**

Short Message Service (SMS) allows you to send and receive short text messages to and from other mobile phones. In addition, your phone supports the Enhanced Messaging Service (EMS), which enables you to include simple graphics, melodies, and animated images in your messages. To use this feature, you must subscribe to T-Mobile’s message service.

The Message icon (✉️) displays in the icon area when you have received a new text message. When the memory is full, the message icon flashes on your phone and you cannot receive any new messages. You must delete a message before you can receive additional messages. This type of message must first be retrieved from T-Mobile’s message service before it can be viewed.

The ✉️ displays in your Message inbox list to indicate any unretrieved text messages that are stored on your SIM card.

The **View Tab** (displays Missed calls, Picture messages, or Voice messages)

**Icons**

- **View Tab**
- **Call**
- **Exit**

Use the **Options (LSK) ➔ Delete** function in each message box to erase obsolete messages.
Creating a Simple Text Message

1. From Home screen, press **Menu** (LSK) ➔ **Messaging** ➔ **Create message**.

2. Highlight the **To** field and enter a phone number.
   – or –

3. Highlight the **To** field and press (ok) to add a recipient and choose from one of the following:
   - **Recent recipients**: allows you to select from recipients of your previous messages.
   - **Contacts**: allows you to enter the phone number you want from Contacts.
   - **Groups**: allows you to select a group.
     - Highlight an option and press **Select** (LSK) or (ok).
     - Highlight and entry and press **Add** (LSK) or (ok) to place a checkmark alongside it.
   – or –

4. Highlight the **To** field and enter a phone number.

   – or –

Press the **Options** (LSK) and select one of the following:
   - **Add recipients**: allows you to add Recent recipients, Contacts, or a Group.
   - **Insert**: allows you to insert a Text template, a Text emoticon, Contacts, or Bookmarks into this message.
   - **Add attachment**: allows you to add an attachment such as: a File, Name card, Appointment, Anniversary event, Private, Holiday, Important, Tasks, Memo, or Bookmarks. When an attachment is detected, the message is changed into a picture message.
   - **Copy & Paste**: turns on the Text selection feature so you can copy and paste text.
   - **More**: allows you to configure one of the following:

**Note**: Your recipient must reside in Contacts before you can add the recipient to this message.

4. Highlight the text field and create your message.

**Note**: For further details about entering characters, see “Changing the Text Input Mode” on page 33.

5. Press **Options** (LSK) when you finish entering your message. The following options are available:
   - **Add recipients**: allows you to add Recent recipients, Contacts, or a Group.
   - **Insert**: allows you to insert a Text template, a Text emoticon, Contacts, or Bookmarks into this message.
   - **Add attachment**: allows you to add an attachment such as: a File, Name card, Appointment, Anniversary event, Private, Holiday, Important, Tasks, Memo, or Bookmarks. When an attachment is detected, the message is changed into a picture message.
   - **Copy & Paste**: turns on the Text selection feature so you can copy and paste text.
   - **More**: allows you to configure one of the following:
— **Add page**: allows you to add a page to this message. The message is then changed into a picture message.

— **Sending options**: allows you to set the Reply path or Request delivery report sending option.

— **Select language**: allows you to set the language for this message. Choices are: Français, or Español.

- **Save to**: saves this message to either the Drafts or Templates folder.

- **Exit composer**: exits the composer and displays the Create new screen.

**6. Press Send ( ) to send the current message.**

### Picture Messages

This menu allows you to use the Multimedia Message Service (MMS) to create a Picture messages.

Picture Messaging is a messaging service that provides delivery of personal picture messages from phone to phone or from phone to email. The Picture messaging icon ( ) displays in the icon area when you have received a new text message.

In addition to the familiar text content available via traditional text messages, picture messages can contain images, graphics, voice, and audio clips.

A Picture Messaging message is a multimedia presentation contained in a single file. It is not a text file with attachments. This type of message must first be retrieved from T-Mobile's message service before it can be viewed. The  displays in your Message inbox list to indicate any unretrieved picture messages. The Message icon ( ) displays once you have successfully retrieved and opened a new picture message.

Using the Picture Messaging feature, your phone can receive and send messages that contain multimedia files, such as photos, sounds and images that you downloaded from the Internet and voice notes you recorded. This function is available only if it is supported by your service provider. Only phones that offer picture messaging features can receive and display picture messages.
Creating and Sending a Picture Message

1. From Home screen, press Menu (LSK) ➔ Messaging ➔ Create message.

2. Highlight the To field and enter a phone number.
   – or –

3. Highlight the To field and press (ok) to add a recipient and choose from one of the following:
   • Recent recipients: allows you to select from recipients of your previous messages.
   • Contacts: allows you to enter the phone number you want from Contacts.
   • Groups: allows you to select a group.
   – or –

Press the Options soft key and select one of the following:
   • Add recipients: allows you to add Recent recipients, Contacts, or a Group.
   • Exit composer: exits the composer and displays the Create new screen.

Note: Your recipient must reside in Contacts before you can add the recipient to this message.

4. Highlight the text field and create your message.

5. Press the Down Navigation key, then use the Left and Right Navigation keys to add one of the following:
   • Record sound: record a voice note to attach to this message.
   • Add sound: attach a sound file or voice list from the Sounds folder.
   • Add picture: attach a photo from the Photos folder.
   • Take picture: activate the camera so you can take a picture and attach it to this message.
   • Add video: activate the camcorder so you can take a video and attach it to this message. You can also attach a video from the Videos folder.

Note: For more information about entering characters, see “Using ABC Mode” on page 36. You can enter up to 2000 standard Alphabet characters per page in your message. The message can be up to 20 pages in length.
6. After adding the attachment, press **Options** to set options for this message:
   - **Preview**: allows you to view the message prior to sending.
   - **Add recipients**: allows you to add Recent recipients, Contacts, Groups. or send this message to the Online album.
   - **Insert**: allows you to insert a Text template, Text emoticon, Contacts, or Bookmarks. The Text templates allow you to apply one of the preset message templates to the text. Select one of the 10 items stored in the Text templates menu. Text emoticon allows you to access a table of emoticons and choose. Contact allows you to add names and phone numbers to your message. Bookmarks allows you to add Internet addresses to your message.
   - **Add attachment**: allows you to attach a File, Name card, Appointment, Anniversary, Private, Holiday, Important, Tasks, Memo, or Bookmarks to the message.
   - **Copy & Paste**: turns on the Text selection feature so you can copy and paste text.
   - **More**: allows you to Add a page, Add subject, Edit style, Sending options, or Select a language (Français, or Español) for this message.

7. Press **Send (OK)** to send the current picture message.

**Message Inbox**

The Message inbox stores received messages. You can tell what kind of message it is by the icon displayed. If the open envelope icon displays then the message was read, otherwise the closed envelope icon displays. The following types of messages may display in your Message inbox:
   - Text messages stored on the SIM card
   - Text messages stored on the phone
   - Picture messages
   - Audio Postcard
When you enter the Message inbox, the list of messages displays with the sender’s phone numbers, or names, if available in your Contacts. After you read the message, the open envelope icon displays.

**Note:** Press the **Left** or **Right** Navigation keys to scroll between **Message inbox**, **Sentbox**, **Drafts**, and **My folders**, and **Templates** (Text and Picture message templates).

- From Home screen, press **Menu** (LSK) ➔ **Messaging** ➔ **Message inbox**.

**Viewing a Text Message from the Message inbox**

1. From Home screen, press **Menu** (LSK) ➔ **Messaging** ➔ **Message inbox**.
2. Select a text message from the list and press **View** ( ) to view the contents.
   - or –
   From the message list, press **Options** (LSK) and select one of the following:
   - **Reply**: allows you to send a reply to the sender by sending a message.
   - **Call sender**: Places a call back to the number.
   - **Forward**: allows you to forward the text message to another person.
   - **Save to Contacts**: saves the selected contact information to Contacts.

**Note:** The **Save to Contacts** feature displays only if the contact information is not already saved to Contacts.

- **Delete**: deletes the selected text message, multiple messages, or all messages.
- **More**: provides the following additional options:
  - **Move to phone/SIM card**: allows you to move the message from the SIM card into the phone’s memory or moves the message from the phone to the SIM card. Depends on where the current message was saved.
  - **Sort by**: allows you to sort messages by Read/Unread, Date, Sender, Type, Subject, Size, or Lock/Unlock.
3. Press **Reply (OK)** to send a reply message.
   – or –

Press **Options** (LSK) while reading a text message to display the following:

- **Call sender**: places a call back to the number.
- **Forward**: allows you to forward the message to another number.
- **Save to contacts**: saves the selected contact information to Contacts.
- **Delete**: deletes the selected text message, multiple messages, or all messages.
- **Save to templates**: allows you to save the selected message as a Text Message template.
- **More**
  - **Move to phone/SIM card**: allows you to move the message from the SIM card into the phone’s memory or from the phone onto the SIM card. Depends on where the current message was saved.
  - **Print via Bluetooth**: allows you to print the message using a Bluetooth enabled printer.

---

**Viewing a Picture Message from the Message inbox**

1. From Home screen, press **Menu (LSK) ➔ Messaging ➔ Message inbox**.

2. Highlight a retrieved (opened) picture message from the list and press **View (OK)** to view the contents.
   – or –

From the message list, press **Options** (LSK) and select one of the following:

- **Reply**: send a reply to the sender by sending a message.
- **Call sender**: call the sender of the message.
- **Forward**: forward the message to another number.
- **Delete**: delete the Selected, Multiple, or All messages.
- **Lock/Unlock**: lock the picture message to prevent deletion or unlock it to allow deletion.
- **More**:
  - **Move to my folder**: move the picture message to a personal folder.
  - **Properties**: shows you information about the message, such as Subject, Received date, From, To, Cc, Size, and Priority.
3. Press **Play/Pause** (OK) to play or pause the multimedia message. Press **Stop** (LSK) to stop the playback.

– or –

Press **Options** (LSK) while reading a text message to display the following:

- **Reply**: send a reply to the sender by sending a message.
- **Call sender**: allows you to call the sender back.
- **Forward**: allows you to forward the message to another number.
- **Replay**: allows you to review the picture message.
- **Save to contacts**: saves the selected contact information to Contacts.
- **Delete**: deletes the selected picture message.
- **Save media**: allows you to save message media to your Image folder, Video folder, Sound folder, Card, Calendar. Note, or Other file folder.

- **Lock/Unlock**: allows you to protect the message from deletion or unlock it for deletion.
- **Save to templates**: allows you to save the selected message as a Text Message template.

**More**:

- **Move to my folder**: move the picture message to a personal folder.
- **Print via Bluetooth**: allows you to print the message using a Bluetooth enabled printer.
- **Properties**: shows you information about the message, such as Subject, Received date, From, To, Cc, Size, and Priority.
**Viewing a Picture Message When You Receive It**

When a new picture message comes in, the icon area displays the Picture Messaging Message icon (вшего).

**Note:** The message can also be displayed as a missed Picture message.

1. Press **View** (/date/ ) to view the picture message.
   – or –
   Press **Exit** (RSK) if you want to view the message later in the Message inbox.
   – or –
   Press **Options** (LSK) to access the various options previously described.

2. Press **Stop** when you are finished.

**Voicemail**

This menu helps you access your voice mailbox, if provided by your network. You can also setup Voicemail from this menu.

**Voicemail settings**

1. From Home screen, press **Menu** (LSK) ➔ **Messaging** ➔ **Voicemail**.

**Important!** You must have previously activated your account to use this feature.

2. Press **Options** (LSK) ➔ **Voicemail settings**.

3. Select **Record greeting**, **Change PIN**, or **Deactivate now**.
   – or –
   From the open message, press **Options** (LSK) and select one of the following:
   - **Hold**: allows you to put the voicemail call on hold and then resume.
   - **New call**: allows you to put the voicemail call on hold and make another call.
   - **Contacts**: allows you to access your contacts list.
• **Save to contacts**: allows you to save to contacts with 2 options, new or update.
• **Messaging**: allows you to access the Messaging menu.
• **web2go**: allows you to access the internet via web2go.
• **Send DTMF**: sends your phone number as DTMF tones to the other person on the call.
• **Calendar**: allows you to access your calendar.
• **Memo**: allows you to access the memo application.
• ***End call**: ends the voicemail call.

**Sentbox**

This message box stores unsent messages. When you enter this menu, the list of messages in the box displays with the recipients’ phone numbers or names, if available in your Phonebook.

1. From Home screen, press **Menu** (LSK) ➔ **Messaging** ➔ **Sentbox**.

**Note:** Press the **Left** or **Right** Navigation keys to scroll between **Message inbox**, **Sentbox**, **Drafts**, **My folders**, and **Templates**.

2. Select a message from the list and press **View** (OK) to view the message contents.
3. Press the **Up** or **Down** Navigation keys to scroll through the contents.

**Drafts**

This message box stores messages you may want to edit or send at a later time. When you enter this menu, the list of draft messages is displayed.

1. From Home screen, press **Menu** (LSK) ➔ **Messaging** ➔ **Drafts**.

**Note:** Press the **Left** or **Right** Navigation keys to scroll between **Message inbox**, **Sentbox**, **Drafts**, **My folders**, and **Templates**.

2. Highlight a message from the Drafts list and press **Options** (LSK) to select from the following options:
   • **Send**: allows you to send the draft message.
• **Preview**: allows you to preview the multimedia contents of an MMS message.

• **Delete**: deletes the Selected, Multiple, or All messages.

• **Lock/Unlock**: locks the selected message to protect it from deletion, or unlocks the message to allow deletion.

• **More**:
  - **Move to my folders**: the draft message to a personal folder.
  - **Sort by**: allows you to sort the messages stored in this folder by Date, Recipient, Type, Subject, Size, or Lock/Unlock.
  - **Properties**: shows you information about the message, such as Subject, Received date, From, To, Cc, Size, and Priority.
  - or –

    Press **Edit** (OK) and alter the message contents.

3. Press **Send** (OK) to send the message.

4. Press **Home** (OK) to return to the Home screen.

**Tip:** While viewing a draft message, press **Options** to choose different options. Options depend on the type of message.

---

**My folders**

Use My folders to manage and organize your messages and store them on your phone.

- From Home screen, press **Menu** (LSK)  ➔  **Messaging**  ➔  **My folders**.

**Creating a new folder**

1. Press **Create** (LSK).

2. Enter the title of the folder and press the **OK** (LSK) or .

The newly created folder displays on the My folders screen.

**Templates**

Besides entering message text using the keypad keys, you can speed message composition by including copies of stored text and/or image templates in your message.

- From Home screen, press **Menu** (LSK)  ➔  **Messaging**  ➔  **Templates**.

The following options are available:

- **Text templates**
- **Picture Message templates**

---
**Sending a Text Message Template**

1. From Home screen, press **Menu (LSK) ➔ Messaging ➔ Templates ➔ Text templates.**
2. Select a template from the **Templates** list and press **Send** to send the message.
3. Press **Add ( )** and select from one of the following:
   - **Recent recipients**: allows you to select a number or an address from the last 10 destinations you entered.
   - **Contacts**: allows you to enter the phone number you want from Contacts.
   - **Groups**: allows you to send this message to a group.
4. Select the text message field to alter the template if desired.
5. Press **Send ( )** when you are finished.

**Creating a new Picture Message Template**

1. From Home screen, press **Menu (LSK) ➔ Messaging ➔ Templates ➔ Picture message templates.**
2. Press **Create (LSK)** to create a new template.
3. Highlight the **Subject** field and enter your text.
4. Highlight the text field and create your message.
5. Press the **Down Navigation key**, then use the **Left and Right Navigation keys** to add one of the following:
   - **Record sound**: record a voice note to attach to this message.
   - **Add sound**: attach a sound file or voice list from the Sounds folder.
   - **Add picture**: attach a photo from the Photos folder.
   - **Take picture**: activate the camera so you can take a picture and attach it to this message.
   - **Add video**: activate the camcorder so you can take a video and attach it to this message. You can also attach a video from the Videos folder.
6. Press **Save ( )** to store the new picture message template.
Sending a Picture Message Template

1. From Home screen, press Menu (LSK) → Messaging → Templates → Picture message templates.

2. Highlight a template from the Picture message templates list and press Options (LSK) → Send.

3. From the Create screen, highlight the To field, press Options (LSK) and select one of the following options:
   - Add recipients: allows you to select recipients from one of the following sources:
     - Recent recipients: allows you to select from recipients of your previous messages.
     - Contacts: allows you to enter the phone number you want from Contacts.
     - Groups: allows you to select a group.
     - Online album: allows you to select an online album entry.

4. Select the text message field to alter the template if desired.

5. Press Send (OK) when you are finished. The template message is sent to the selected recipient(s).

Settings

The Settings menu allows you to set various message options, delete messages by folder, or check your phone’s memory status.

- From Home screen, press Menu (LSK) → Messaging → Settings.

Messages settings

In this menu, you can set up a default text message or a picture message. The last setting you accessed is automatically activated for sending subsequent messages.

2. Select an available option and press Select (LSK) or OK.
   - Choose from: Text message, Text message center, Picture message, Voice mail, Push message or Emergency alert settings.
**Text message**

Centers around Text sending options. The following Sending Options are available:

- **Reply path**: allows the recipient of your message to send you a reply message using your message center, if your network supports this service.
  - **Request delivery report**: allows you to activate or deactivate the report function. When this function is activated, the network informs you whether or not your message was delivered.

**Text message center**

Sets the default method of text message transmission used by the Text message center. The options are:

- T-Mobile
- Center 2
- Center 3
- Center 4

---

**Picture message**

**Sending options**

- **Priority**: you can select the priority level of your messages. Selections are: Normal, High or Low.
- **Expiration**: allows you to select the length of time for your message to remain on the MMS server: Maximum, 1 day, 2 days, 1 week, 2 weeks, Custom time (Hour).
- **Message size**: allows you to set a size limit for your message: 30 KB, 100 KB, 300 KB, 600 KB, or 1M.
- **Request delivery report**: when enabled, the network informs you whether or not your message was delivered.
- **Request read report**: when enabled, the network informs you when your message is read.
- **Keep a copy**: when this option is enabled, a copy of your message is stored.
- **Add my name card**: allows you to add your name card to your message.
**Receiving options**

This option specifies the category of messages you want to receive and allows you to set the following:

- **Send read report**: when enabled, your phone sends a notification back to the recipient indicating that your message was received.
- **Send delivery report**: when enabled, the phone informs the network whether or not your message was received.
- **Reject anonymous**: automatically rejects messages with a category of anonymous.
- **Reject advertisement**: automatically rejects messages with a category of advertisement.

**Auto resize image**

- No Resize
- 100 KB
- 300 KB
- 600 KB
- 1MB

**Creation Mode**

- Free
- Warning
- Restricted

**Default style**

- Font color
- Font style (Small normal, Small bold, Small italic, Medium normal, Medium bold, Medium italic, Large normal, Large bold, or Large italic)
- Background color
- Page duration (2 seconds, 5 seconds, 10 seconds, or a Custom time)

**Voicemail**

This menu displays the default phone number used for access of phone’s remote voicemail.

**Push Message**

- **Receiving options**: you can specify whether to turn push message reception **On** or **Off**.
- **Service loading**: you can specify whether to load this service:
  - Always
  - Prompt
  - Never
**Emergency alert settings**

- **Emergency alerts:**
  - All alerts on
  - Extreme alerts only
  - Presidential alerts only

- **Ambert alert:** you can specify whether to turn On or Off.

**Delete by folder**

This menu allows you to delete all of the messages in each message box. Or, you can also delete all of your messages in all message boxes at one time.

---

**Important!** Once messages are deleted, they cannot be recovered.

---

1. From Home screen, press **Menu (LSK) ➔ Messaging ➔ Settings ➔ Delete by folder.**
2. Press the Up or Down Navigation key to select a message box to clear. To delete all of your messages, select the **All** option.
3. Highlight a message box to clear and press **OK** to place or remove a check mark next to your selection.
4. Press **Delete (LSK)** to delete the marked objects.

5. Press **Yes (LSK)** after you receive the **Delete? Locked messages?** confirmation.

**Memory status**

To view the memory status:

- From Home screen, press **Menu ➔ Messaging ➔ Settings ➔ Memory status** and press **Select (LSK)** or **OK**.

You can view the amount of the allocated memory and the memory available for picture messages. The display shows the total space including the used and free space. You can also view how much space and the number of messages currently occupying each message box type:

- **Picture message**
  - Message Inbox
  - Sentbox
  - Drafts
  - My folders
- **Text Message** (saved on the phone)
  - Phone
  - SIM card
  - Message inbox
  - Sentbox
  - Drafts
  - My folders
• Push message
  - Phone
  - Message inbox
  - My folders

• Configuration
  - Phone
  - Message inbox
  - My folders

• Voice mail
  - Inbox
Section 7: People

This section explains how to use and manage your Contacts list. You can save phone numbers to your phone’s memory or to your SIM card.

Using the Contacts List

Storing a Number in the Phone’s Memory

The default storage location for saving phone numbers to your contacts is your phone’s built-in memory. As soon as the SIM card is inserted into the handset, the phone synchronizes the Contacts (using the Mobile backup feature) to the T-Mobile network. Additional, new contact information stores directly to the phone’s memory and synchronizes with T-Mobile’s network during predetermined, timed intervals.

For information on how to change this setting, see “Save Contacts To” on page 63. Also, numbers that were stored on your SIM card can later be copied to your phone’s memory.

1. From Home screen, press Menu (LSK) ➔ People ➔ Add new contact.
2. Enter a first name in the First name text box. Press the Down Navigation key to tab to the next box. For further details about how to enter characters, see “Using ABC Mode” on page 36.
3. Enter a last name in the Last name text box.
4. Highlight a number type by pressing the Up or Down Navigation key, then enter a number in the text box. The following options are available:

- **Mobile**: assigns the number entered to the Mobile entry.
- **Home**: assigns the number entered to the Home entry.
- **Work**: assigns the number entered to the Office entry.

Note: When storing a Contacts list entry into your SIM card, note that only the Name, and Number are saved. To save additional information for a particular contact, such as notes, e-mail, etc., it is important to save that Contact into your phone’s onboard memory.

Note: When you copy a phone number from your SIM card to your phone, the number displays twice in your Contact list.
• **Others**: allows you to enter an additional phone number for this entry.
• **Email**: allows you to enter the email address for the contact.
• **Group**: allows you to assign this contact to a group.
• **Picture ID**: allows you to add a Picture ID assigned to the contact.
• **Ringtone**: allows you to assign a Ringtone by choosing from one of the following locations: Voice list, Sounds, or Music.
• **Birthday**: allows you to enter the contact’s birthday.
• **Address**: allows you to enter the address for the contact.
• **Notes**: allows you to enter additional information about the contact. Up to 100 characters are allowed.

5. Press **Save** (OK) to store your selections. The number saves to your selected destination and the new contact information displays.

6. Press **Home** ( microSD card ) to return to the Home screen.

---

**Copying a Contact Number**

The default storage location for saving phone numbers to your Contacts list is your phone’s built-in memory. To save a number to your SIM card, you need to change the Default saving option first.

**Note:** When you copy a phone number from your SIM card to your phone (or vice versa), the number displays twice in your Contact list. Only the icon adjacent to the Contacts entry indicates where the entry is stored (Phone or SIM).

1. From Home screen, press **Menu** ( LSK ) ➔ **People** ➔ **Contacts**.
2. Highlight a Contacts entry and press **Options** ( LSK ) ➔ **Copy to SIM card** ➔ **Selected/Multiple**. The SIM storage location is then indicated as a value (Ex: 6/250).
   – or –

   Highlight a Contacts entry and press **Options** ( LSK ) ➔ **Copy to phone** ➔ **Selected/Multiple**.
3. Press **Home** ( microSD card ) to return to the Home screen.
Finding a Contact Entry

You can store phone numbers and their corresponding names onto either your SIM card or phone’s built-in memory. They are physically separate but are used as a single entity, called Contacts.

**Note:** A Phone icon appears to the left of a Contact entry stored on the phone. A SIM card icon appears to the left of an entry stored on the SIM card.

1. From Home screen, press **Menu** (LSK) → **People** → **Contacts**.
2. Enter the first few letters of the name in the text box. The Contacts entries are listed, starting with the first entry matching your input.
   – or –
   Press the **Up** or **Down** Navigation key until the entry you want is highlighted.
3. Once you locate the desired entry, press **to dial** the number.
   – or –

Press **Options** (LSK) to access the following options:

- **Edit**: allows you to edit the Name and number for the selected contact.
- **Send**: allows you to send a message to the selected number.
- **New contact**: takes you to the Create contact menu.
- **Call**: places the call to the selected phone number.
- **Copy to phone/SIM card**: copies the selected or all of the contacts to the phone or SIM card. Depends on where the contact was previously saved.
- **Assign speed dial**: allows you to assign a speed dial key number to the selected Contacts entry.
- **Send namecard via**: allows you to send your name card by way of Message or Bluetooth enabled devices.
- **Delete**: allows you to delete the selected or multiple names and numbers from your Contacts or delete all numbers. You are asked to confirm your name and number deletion by pressing the **Yes** (LSK). To cancel, press the **No** (RSK).
- **Print via Bluetooth**: sends the contents of the selected contact to a Bluetooth enabled printer.
- **Mobile backup**: allows you to view the Last sync you performed, or view the About mobile backup information.
4. Press **View** ( ) to view contact information and select one of the following options:

- **Edit**: allows you to edit the name and number fields in the entry. You can also add an email address and notes.
- **Send**: allows you to send a message to the selected number.
- **Copy to phone/SIM card**: copies the selected or all of the contacts to the phone or SIM card. Depends on where the contact was previously saved.
- **Send namecard via**: allows you to send your name card by way of Message or Bluetooth enabled devices.
- **Delete**: allows you to delete the selected or multiple names and numbers from your Contacts or delete all numbers. You are asked to confirm your name and number deletion by pressing the **Yes** (LSK). To cancel, press the **No** (RSK).
- **Print via Bluetooth**: sends the contents of the selected contact to a Bluetooth enabled printer.

5. Press **Call** ( ) to dial the selected number.

---

**Dialing a Number from Contacts**

Once you store phone numbers in People, you can dial them easily and quickly by using the location numbers assigned to them and listed in the Contacts.

**Note:** If you cannot remember a location number, you must go into the **Contacts** menu in the **People** menu to search for the entry by name. For more information, refer to “Finding a Contact Entry” on page 59.

1. From Home screen, press **Menu** (LSK) ➔ **People** ➔ **Contacts**.

2. Enter the location number for the contact you want to dial. For more information, refer to “Finding a Contact Entry” on page 59.
Caller Groups

Adding a New Caller Group
1. From Home screen, press Menu (LSK) ➔ People ➔ Groups.
2. Press Options (LSK) ➔ Add new group.
3. Enter a name for the new group in the New group field and press Options (LSK) ➔ Save.

Configuring the Caller Groups Settings
1. Highlight the newly created group and press .
2. Press Options (LSK) ➔ Group settings.
3. Highlight the Picture field and press Select (LSK) or to create a Picture ID for this new caller group. Select from one of the following options:
   - Wallpapers: allows you to select a wallpaper image to use as a Picture ID.
   - Downloaded images: displays a list of downloaded images from which to select as a Picture ID.
4. Highlight the Ringtone field and press Select (LSK) or to create a ringtone for this new caller group. Select from one of the following options:
   - Sounds: displays a list of sounds from which to select as a ringtone.
   - Voice list: displays a list of voice messages from which to select as a ringtone.
5. Press Options (LSK) ➔ Save when you are finished.
6. Press to return to Home screen.

Editing a Caller Group
1. From Home screen, press Menu (LSK) ➔ People ➔ Groups.
2. Scroll through the group list and highlight the group you want.
3. Press Options (LSK) ➔ Rename group. Modify the text in the Name text box.
   – or –
   Press Options (LSK) ➔ Delete group. Delete the selected group.
   – or –
   Press Options (LSK) ➔ Group settings.
4. With Group settings enabled, highlight the Picture field and press Change (✓) to alter the Picture ID for this caller group. The following options are available:
   - Wallpapers: allows you to select a wallpaper image to use as a Picture ID.
   - Downloaded images: displays a list of downloaded images from which to select as a Picture ID.

5. Highlight the Ringtone field and press Change (✓) to alter the ringtone. The following options are available:
   - Sounds: displays a list of sounds from which to select as a ringtone.
   - Voice list: displays a list of voice messages from which to select as a ringtone.

6. Press Options (LSK) ➔ Save when you are finished.

7. Press  to return to Home screen.

**Speed Dialing**

Once you store phone numbers from your Contacts list, you can set up to 8 speed dial entries and then easily dial them whenever you want, by pressing the associated numeric key.

- From Home screen, press and hold the speed dial numbers assigned to keys (2 to 9).

**Setting Up Speed Dial Entries**

1. From Home screen, press Menu (LSK) ➔ People ➔ Speed dial.

2. Use the Navigation key to select an available keypad number key to where you wish to assign the new speed-dialing number, select from the 2 to 9 keys.

3. Press Assign (LSK) or ✓.  

4. Highlight a contact entry number from the list and press Select (LSK) or ✓. You receive a Speed dial assigned confirmation and the Speed dial menu is displayed with the number assigned to the number key highlighted.

5. Press  to return to the Home screen.
Note: Memory location 1 is reserved for your Voice mail server number and this speed dial location can not be changed.

Management
The Management menu allows you to select where your contacts are saved, copy your SIM contacts to your phone and phone contacts to your SIM card, sort by contacts, delete your contacts, or check your memory status.

- From Home screen, press Menu (LSK) → People → Management.

View Contacts From
This option allows you filter the displayed contacts and to select the location from which you displayed available contacts SIM card, Phone, or the Phone and SIM card.

Note: The Phone and SIM card option from the Menu → People → Management → View contacts from → Phone and SIM card option must be selected in order to access all Contacts.

Save Contacts To
This option allows you to assign the default storage location for new contacts. Choose from: Phone, SIM card, Ask on saving.

Copy All To
You can copy all Contact entries from their current location to either the Phone’s memory or the SIM card.

1. From Home screen, press Menu (LSK) → People → Management → Copy all to.
2. Highlight Phone or SIM card the press the Select (LSK) or OK. By default, all the entries in the Contacts list on the Phone or SIM card are selected.
3. Highlight each contact you want to copy and press OK to place a check mark next to the entry or place a check mark alongside All to copy all entries.
4. Press Copy (LSK) to copy the selected contacts to the Phone or SIM card.
**Delete All**

This option allows you to delete all your contacts from the Contacts by selecting All, Phone or SIM card.

---

**Important!** Once contact entries are deleted, they cannot be recovered.

---

**Deleting all of the Contact Entries**

Perform the following procedure to delete all your entries from your phone’s memory.

---

**Important!** Once contact entries are deleted, they cannot be recovered.

---

1. From Home screen, press **Menu** (LSK) ➔ **People** ➔ **Management** ➔ **Delete all**.
2. Select **All** and when the **Delete?** confirmation message displays, press **Yes** (LSK) to delete or press **No** (RSK) to cancel.
3. Press **Home** to return to the Home screen.

---

**Memory status**

You can check how many names and numbers are stored in the Contacts, within the Phone, SIM and FDN. You can also see the current storage capacity of the memory.

1. From Home screen, press **Menu** (LSK) ➔ **People** ➔ **Management** ➔ **Memory status**.
2. Select an available category (Phone, SIM, or FDN) and free space by navigating to the submenus and deleting unnecessary information.
3. Press **Home** to return to the Home screen.

---

**My number**

This function is a memory aid, which you can use to edit or remove your own phone number. You can also edit the default name assigned to your phone number.

1. From Home screen, press **Menu** (LSK) ➔ **People** ➔ **My number**.
2. Highlight the **Name** field and enter in desired text to name your phone. Press and hold **Clear** to erase any current entry.
3. Press the **Down Navigation** to enter your phone number.
4. Press **Save (OK)** when finished.

**Note:** If you later need to edit the information in these fields, highlight a field and press **Options (LSK) ➔ Edit**.

### Service Dialing Numbers

You can view the list of Service Dialing Numbers (SDN) assigned by your service provider. These numbers include emergency numbers, customer service numbers and directory inquiries.

- From Home screen, press **Menu (LSK) ➔ People ➔ Service number**. The service numbers are displayed.
Section 8: Media

This section outlines the media features available on your phone such as the web2go browser, Games and Apps, photos, music, images, sounds, videos, and other types of files.

web2go

This section outlines the web2go features available on your phone. For more information, contact T-Mobile.

web2goSM is a WAP (Wireless Application Protocol) browser which provides you wireless access and navigation of the Web using your phone.

To access web2go via the menu, follow these steps:

■ From Home screen, press Menu (LSK) ➔ web2go.
  – or –
  From Home screen, press web2go (RSK).

Tip: From the Home screen you can also quickly press web2go (RSK) to bypass the need to access the main menu.

Important! To use the web2go feature, JavaScript must be enable from your phone’s browser settings menu (Menu ➔ web2go ➔ Browser settings ➔ Preferences and enable Run javascript).

The following options are available:

Home

Selecting this menu connects the phone to the network and loads the web2go homepage.

The content of the web2go startup homepage depends on your Wireless Web service provider. To scroll through the screen, use the Up and Down keys.

To go to the startup homepage from any other screen in the web2go, use the Home option. For more information on the web2go menus, see “Selecting and Using Menu Options” on page 67.

■ From Home screen, press Menu (LSK) ➔ Media ➔ web2go ➔ Home.
Exiting web2go

- To exit the browser at any time, press .

Navigating web2go

1. To scroll through browser items, press the Up or Down Navigation key.
2. To select browser items, press .
3. To return to the previous page, press Back (RSK).
4. Press Back (RSK) until the startup Home page displays.

Entering Text in web2go

When you are prompted to enter text, the currently active text input mode is indicated on the screen. The following modes are available:

- **Upper-case character mode (ABC)**: allows you to enter upper-case English characters.
- **Lower-case character mode (abc)**: allows you to enter lower-case English characters.
- **Number mode (123)**: allows you to enter numbers.

To change the text input mode, use the following procedures:

1. Press Right soft key (RSK) one or more times.
2. To enter a space, press .
3. To edit text, set the cursor to the right of the character(s) to be corrected.
4. To delete current characters, press as required.
5. Enter the correct character(s).

Selecting and Using Menu Options

Various menus are available when you are using web2go to navigate the Wireless Web.

To access the browser options menu:

Note: The menus may vary, depending on your version of web2go.

1. From an active page, press Options (LSK) and select from the following options:
   - **Reload**: reloads the current page.
   - **Page size**: allows you to manually resize the page by choosing Large, Normal or Small.
   - **Forward**: pages forward one page
• **Go to**: navigates to the URL address, Homepage, Bookmarks, History, or Saved page.
• **Save**: allows you to save the Image or Page.
• **Add to bookmarks**: adds the current URL to Bookmarks.
• **Send URL via message**: sends the currently viewed URL to a recipient as a message.
• **Page details**: allows you to view details about the current page such as: Title, Address, Size, MIME type, and Last updated.
• **Browser settings**: various settings are available, see “Browser Settings” on page 69.
• **Exit browser**: exits the browser page you are viewing and returns to the Home page.

**Enter URL**
This menu allows you to manually enter the URL address of a web site that you wish to access. For further details about entering characters, see “Entering Text” on page 33.

**Bookmarks**
This menu stores up to 15 URL addresses.

To store a URL address:

1. From Home screen, press **Menu** (LSK) ➔ **web2go** ➔ **Bookmarks**.
   
   or
   
   From Home screen, press **web2go** (RSK) ➔ **Options** (RSK) ➔ **Go to** ➔ **Bookmarks**.

2. Press **Options** (LSK) ➔ **Add bookmark** and press **Select** (LSK) or **OK**.

3. Enter a name for the bookmark in the **Title** text box and press the **Down** key.

4. Enter the address in the **URL** text box and press **Save** (OK).

5. Highlight the newly created bookmark and press **Options** (LSK) to access the following options:
   • **Edit bookmark**: allows you to edit the address.
   • **Delete**: allows you to delete the selected address or multiple addresses.
   • **Add bookmark**: allows you to enter a new bookmark URL.
• **Send URL via message:** allows you to send the selected bookmark as a text message.

• **Set as homepage:** allows you to set the selected bookmark as a homepage.

6. Select a URL and press **Go (OK).** Your browser displays the site.

**Saved Pages**
This option displays a list of the pages that were saved while navigating the browser.

**History**
This option provides you with a list of the most recently visited web sites. You can use these entries to return to previously visited, but not bookmarked, web pages.

**Browser Settings**
Various settings are available when you are using the web2go browser to navigate the wireless web. Choose from the following options:

**Clear cache**
You can clear the information stored in the cache, which is the phone’s temporary memory and stores the most recently accessed Web pages.

- Press **Yes (LSK)** to confirm the deletion. Otherwise, press **No (RSK).**

**Cookies**
Use this option to select cookie mode or to delete cookies.

• **Cookie mode:** this mode allows you to Accept all cookies, Reject all cookies, or Prompt you when a site wants to deposit a cookie.

• **Delete cookies:** deletes all currently stored cookies. Cookies identify who you are when you visit favorite web sites; however, they can also be used to track your web surfing habits.

To delete cookies:

- Highlight **Delete cookies** and press **Select (LSK) or ➔ Yes (LSK) at the Delete cookies? prompt.**

**Preferences**
The Preferences option allows you to set web2go preferences such as Run JavaScript, Display images, Play sound, and View mode.

**About Browser**
About Browser displays information about the browser such as the type and version.
Games and Apps

Use Games and Apps to download MIDlets (Java applications that run on mobile phones) from various sources using the browser and store them in your phone.

- From Home screen, press Menu (LSK) ➔ Media ➔ Games and Apps.

When you access the Games and Apps menu, the list of default games displays. Once you download new games, they are added to the list.

Find Great Games

You can download more games from the T-Mobile website by using the Find Great Games option.

- From Home screen, press Menu (LSK) ➔ Media ➔ Games and Apps ➔ Find Great Games.

Note: When downloading games, charges may apply. MIDlet game options differ depending on the MIDlet selected.

The Best Apps

You can download the best T-Mobile applications from the T-Mobile website using this feature.

- From Home screen, press Menu (LSK) ➔ Media ➔ Games and Apps ➔ The Best Apps.

Note: When downloading applications, charges may apply.

Photos

Use the Photos option, to manage photos saved on your phone.

1. From Home screen, press Menu (LSK) ➔ Media ➔ Photos. When you access this menu, your phone displays the photos in Line view (column), which shows them as small images. Use the Navigation keys to scroll through the photos.

2. To view the photos on the full screen, press View ( ). To go back to Line view, press Back (RSK).
**Photos Options**

1. While viewing the image, press the Options (LSK) to display these options:
   - **Send to My Album**: allows you to send the selected photo to My Album.
   - **Send via**: allows you to send the selected photo as a Message, or to a Bluetooth enabled device.
   - **Set as**: allows you to set the photo as a Wallpaper, or as a Picture ID.
   - **Default destination**: allows you to Remove or Change the destination folder for your photos.
   - **Delete**: allows you to delete the currently active image.
   - **Rename**: allows you to rename the photo.
   - **Edit image**: allows you to edit the current image by selection Options and choosing from features such as: Effects (Filter, Style, Warp, or Partial Blur), Adjust (Brightness, Contrast, or Color), Transform (Resize, Rotate, or Flip), Crop, and Insert (Frames, Clip art, Emoticon, or Text).
   - **Bluetooth visibility**: allows you to enable the photo so it is visible to other Bluetooth devices. This option is available for a single photo you are viewing, not selected or multiple photos.
   - **Slide show**: allows you to display all available images as part of an onscreen slideshow where the images are cycled.
   - **Print via Bluetooth**: allows you to send the selected photo to a Bluetooth enabled printer.
   - **Lock/Unlock**: allows you to lock the image to protect it from deletion, or unlock it to allow deletion.
   - **Properties**: allows you to view Basic details about the selected image.

**Deleting a Photo**

You can delete photos one by one or all at one time.

1. From the Photos menu, highlight the photo you want to delete.
2. Press Options (LSK) ➔ Delete.
3. Select an available option: Selected, Multiple, or All.
4. Press Yes (LSK) to confirm the deletion.
5. Press when you are finished.

---

**Note:** The Bluetooth visibility option appears for photos stored within the Phone and not on the SIM card.
My Album

My album is a private online picture album that you can use to store and share pictures, videos, voice messages, and text. When you take a photo, the phone prompts with Send to: My Album Online?

Note: When accessing My Album, charges may apply.

1. From Home screen, press Menu (LSK) → Media → Photos → My album.
2. In your browser, select the Inbox Album link and press Select (LSK) or OK.
3. Use the Up or Down key to highlight a particular image and press OK to view the photos.
4. Press when you are finished.

Camera

Use your phone’s Camera to take photos of people or events while on the move. Additionally, you can send these photos to other people in a Picture Messaging message or set a wallpaper or picture ID image.

For more information about using the Camera and features, see “Using the Camera” on page 100.

Images

In this menu, you can view the list of images downloaded from the web server, taken with the built-in camera, or received in messages. You can set an image as the current background image.

- From Home screen, press Menu (LSK) → Media → Images. Choose from either: Fresh Wallpaper, Wallpapers, or Downloaded images.

Fresh wallpaper

Using the Fresh Wallpaper option, allows you to access the T-Mobile website and download new images to use as wallpaper using the browser.

- Highlight Fresh Wallpaper and press Connect (OK).

Note: When downloading wallpapers, charges may apply.
**Wallpapers**

Allows you to access the local default wallpaper images.

1. **Select Wallpapers.**
2. Press either **View (OK)** to open the selected image full screen
   – or –
   Press **Options (LSK)** to select from available onscreen options.

   - **Set as**: sets the image as Wallpaper, or as a Picture ID.
   - **Take Photo**: allows you to take a photo and use it as a wallpaper.
   - **Create folder**: creates a new folder in which to contain your own images.
   - **Sort by**: lists the images by Date, Type, Name, or Size.
   - **Properties**: displays the Image name, Format, Resolution, Size, Forwarding, Date created, and Location.

**Downloaded images**

This menu allows you to access your downloaded images on your phone.

- With the image highlighted within the list, press the **Options (LSK)** to choose from the following options:
  - **Send to My Album**: sends the selected image to My Album.
  - **Send via**: creates a message to send the image as a Message, Email, Audio postcard, or to another Bluetooth device.
  - **Set as**: allows you to set the image as a Wallpaper, or Picture ID.
  - **Delete**: erases the current image.
  - **Move**: moves the Selected, or Multiple images to another location.
  - **Copy**: copies the Selected, or Multiple images to another location.
  - **Default destination**: Remove or Change the default destination for images.
  - **Rename**: renames the image.
• Take Photo: allows you to take another photo with the camera.
• Create folder: allows you to create a new folder in which to store images.
• Sort by: lists images by Date, Type, Name, or Size.
• Bluetooth visibility: allows you to enable the image so it is visible to other Bluetooth devices. This option is available for a single image you are viewing, not selected or multiple images.

Note: The Bluetooth visibility option appears for downloaded images stored within the Phone and not on the SIM card.

• Print via Bluetooth: sends the selected image to a Bluetooth printer.
• Lock/Unlock: locks the image to protect it from deletion, or unlocks it to allow deletion.
• Properties: displays Basic details or Media Information about the image.

Music
Your phone’s Music features allow you to play and manage the music files stored on your phone.

2. Select a music file and press Options (LSK) to choose from the following options:
   • Send via: allows you to send the selected music file via Message or to a Bluetooth enabled device.
   • Set as: allows you to set the music file as a Ringtone, Individual ringtone, Alarm tone, or as a Calendar reminder.
   • Delete: allows you to delete the Selected, Multiple, or All music files.
   • Move: allows you to move the Selected music file or Multiple music files to another location or folder.
   • Copy: allows you to copy the Selected music file or Multiple music files to another location or folder.
   • Rename: allows you to rename the selected music file.
   • Create folder: allows you to create a folder in which to store the selected music file.
• **Sort by:** allows you to sort the music by Date, Type, Name, or Size.

• **Bluetooth visibility:** allows you to select one or multiple music files to share with other Bluetooth devices.

• **Lock/Unlock:** allows you to lock the music file to protect it from deletion or unlocks it to allow deletion.

• **Properties:** displays Basic details about the selected music file such as Name, Format, Size, Forwarding, Date created, and Location.

**Music Player**

Use **Music Player** to add music files or play music stored in your playlist.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Music** ➔ **Music player**.

2. Select All tracks, Artists, Albums, or Playlists and press **Open** (LSK).

3. Highlight a music file, then press **Options** (LSK) and select one of the following options:

   • **Add to Playlist:** allows you to add the Selected, Multiple, or All music files to a playlist.

   • **List by:** allows you to display music files by category such as: Recently added, My rating, or Title.

   • **Delete:** allows you to delete the Selected, Multiple, or All music files.

   • **Send via:** allows you to send this music file as a Message or to a Bluetooth device.

   • **Set as:** allows you to set the music file as Individual ringtone, Alarm tone, Message tone, or as a Calendar reminder.

   • **Properties:** displays Basic details about the selected music file.

   • **Settings:** set Background playing, and choose Sound effects, such as Normal, Rock, Pop, Dance, Classic, Jazz, Dynamic and Surround.
4. Select a music file and press OK to play the music. During playback, press Options (LSK) for playback options:
   - **Transfer to Bluetooth stereo headset**: sends audio via Bluetooth to a Bluetooth stereo headset.
   - **Set as**: allows you to set the music file as Individual ringtone, Alarm tone, or as a Calendar reminder.
   - **Send via**: allows you to send this music file as a Message or to a Bluetooth device.
   - **Rate track**: select a rating of 0 to 5 stars for the track.
   - **Add to Playlist**: allows you to add the current track to a playlist.
   - **Properties**: displays Basic details about the music file.
   - **Settings**: set Background playing, and choose Sound effects, such as Normal, Rock, Pop, Dance, Classic, Jazz, Dynamic and Surround.
   - **Shortcuts**: view keypad and navigation key shortcuts.

**Music Player Shortcut Keys**

While playing a music file you can use one of the following shortcut keys to control the player.

2. Select a music file and press OK to play the music.
3. While playing a music file, the following keys act as shortcuts:

   - **OK key**: Plays or pauses the music file, depending on which mode is active.
   - **Up** Navigation key. One press accesses the Music player listing of songs.
   - **Down** Navigation key stops the playback of the music file.
   - **Left** Navigation key plays the previous music file in the playlist. Press and hold to scrub back through the current song.
   - **Right** Navigation key plays the next music file in the playlist. Press and hold to scrub forward through the current song.
***Up Volume key***: Press to increase playback volume.

***Down Volume key***: Press to decrease playback volume.

Press to Rate the track, in stars (0-5). Each time you press, the star rating increases.

Press to change the Sound effects presets: NORM (Normal), ROCK, POP, DANC (Dance), CLAS (Classical), JAZZ, WIDE, DYNA (Dynamic sound), or SURR (Surround sound).

Press to toggle Shuffle mode On or Off.

Press to toggle Player modes:
- **Normal**: songs are played in the order they appear in the current list.
- **Repeat one**: repeats the current track, until you stop playback.
- **Repeat all**: repeats all songs in the current playlist, until you stop playback.

4. Press \( \text{Home} \) to exit and return to Home screen.

---

### Playlists

There are ten available playlists. You can add music files to any one of these playlists, and you can customize the playlists by renaming them. You cannot, however, add a new playlist or delete a playlist.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Music** ➔ **Music player**.

2. Highlight a playlist and press \( \text{OK} \) to open the playlist.

### Creating a Playlist

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Music** ➔ **Music player** ➔ **Playlists**.

2. Select **Create playlist**, enter a name for the playlist and press **Save** (LSK).

### Renaming a playlist

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Music** ➔ **Music player** ➔ **Playlists**.

2. Highlight a playlist and press **Options** (LSK) ➔ **Rename**.

3. Press \( \text{Back} \) to delete the previous name.

4. Enter a new name for this playlist and press **Save** (LSK) or \( \text{OK} \).
Adding Music Files to a Playlist

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Music** ➔ **Music player**.
2. Highlight the playlist in which you want to add a music file and press **OK**.
3. Press **Options** (LSK) ➔ **Add** ➔ **Tracks**.
4. Locate and highlight a music file then press **OK** to place a check mark next to the file(s) you want to add to this playlist.
5. Press **Add** (LSK) to add the music file(s).

**Sounds**

In this menu, you can view the list of sounds downloaded from the web server or received in picture messages. You can also set a downloaded sound as the current ring tone.

- From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Sounds**.

**Hottest Ringtones**

In this menu, you can view a list of the Hottest Ringtones offered by T-Mobile.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Sounds** ➔ **Hottest Ringtones**. A list of ringtones and other downloads display.
2. Select a category of ringtones, select a ringtone, then follow the prompts to download or purchase the ringtone.

**Browse CallerTunes**

In this menu, you can view a list of CallerTunes and download them for your phone.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Sounds** ➔ **Browse CallerTunes®**.
2. A list of **CallerTunes** display.
3. Follow the prompts to download and purchase CallerTunes.
**Sounds**
Use Sounds to manage sounds on your phone.
- Highlight an item in the Sounds menu and press **Options** (LSK). The following options are available:
  - **Set as**: allows you to set the sound as an Individual ringtone, Alarm tone, or Calendar reminder.
  - **Create folder**: allows you to create a new folder to contain sounds.
  - **Sort by**: allows you to sort sound files by: Date, Type, Name, or Size.
  - **Properties**: displays the sound Name, Format, Size, Forwarding, Date created, and Location.

**Voice list**
The Voice list contains your recorded audio messages.
- Highlight an item and press **Options** (LSK). The following options are available:
  - **Send via**: allows you to send this voice file as a Message, or to a Bluetooth enabled device.
  - **Set as**: allows you to set the voice file as Individual ringtone, Alarm tone, or Calendar reminder.
  - **Delete**: deletes Selected, Multiple, or All voice files.
  - **Move**: moves Selected or Multiple voice files to another folder.
  - **Copy**: copies Selected or Multiple voice files to another folder.
  - **Rename**: allows you to rename the selected voice file.
  - **Create folder**: allows you to create a new folder for voice files.
  - **Sort by**: sorts the voice files by Date, Type, Name, or Size.
  - **Bluetooth visibility**: makes Selected or Multiple voice files visible to a Bluetooth device.
  - **Lock/Unlock**: locks the voice file to protect it from deletion, or unlocks the voice file to allow deletion.
  - **Properties**: displays basic details about this voice file such as: Name, Format, Size, Forwarding, Date created, and Location.
Videos

In this menu, you can record a video, or view a list of videos downloaded from the web server or received within multimedia messages. You can also view a video saved to your Videos folder or memory card.

1. From Home screen, press Menu (LSK) ➔ Media ➔ Videos.

2. Highlight a video clip from your Videos folder and press Play ( ) to play it.
   – or –

Before you play the video, press Options (LSK) and select one of the following:

- **Send via**: sends the video using a Message or to a Bluetooth enabled device.
- **Delete**: deletes the Selected, Multiple, or All video files.
- **Move**: allows you to move the Selected or Multiple videos to another location.
- **Copy**: allows you to copy the Selected or Multiple videos to another location.
- **Rename**: changes the name of the video.
- **Create folder**: allows you to create a new folder to contain your videos.
- **Sort by**: allows you to sort and view videos by Date, Type, Name, or Size.
- **Bluetooth visibility**: allows you to enable Bluetooth to share the selected video or multiple videos with other Bluetooth devices.
- **Lock/Unlock**: locks the video file to protect it from deletion, or unlocks the video file to allow deletion.
- **Properties**: shows properties of the video, such as Name, Format, Resolution, Size, Forwarding, Date created, and Location.

Recording a Video

Use your phone’s Camcorder to take videos of people or events while on the move. You can send these videos in a message or to another Bluetooth device. For more information on how to record a video, see “Recording and Sending a Video” on page 104.
Other Files

In Other Files, you can view or store other types of files without corruption, various document files and files stored in the phone’s memory, or on a memory card.

Available file formats are Microsoft Word, Adobe PDF, or Plain text.

1. From Home screen, press Menu (LSK) ➔ Media ➔ Other files.

2. Highlight a file and press the Options (LSK) to choose from the following options:
   - Create folder: allows you to create a new folder in which to contain other files.
   - Sort by: allows you to sort files by Date, Type, Name, or Size.
   - Properties: allows you to view Basic details about the selected file.

Memory Status

With Memory Status, you can check the amount of memory being used and memory remaining for Photos, Music, Images, Sounds, Videos, Other files, or Games and Apps.

1. From Home screen, press Menu (LSK) ➔ Media ➔ Memory status.
Section 9: Organizer

This section outlines the various applications that are available on your phone.

Organizer

The Organizer allows you to set alarms, schedule appointments, view the calendar, create tasks, perform simple math calculations, check world time, perform unit conversions, set a timer, and use a stopwatch.

Calendar

With the Calendar feature, you can:
- Consult the calendar by month, week, or day.
- Set schedules and note anniversaries
- Write memos to keep track of your schedule.
- Set an alarm to act as a reminder, if necessary.
- Check your memory status.

To navigate to the Calendar:
- From Home screen, press Menu (LSK) → Organizer → Calendar.

When you select the Calendar menu, the following options are available:

Month view

This is the default view for the Calendar application, the calendar displays the selected month with today’s date highlighted.

- In Month view, press Options (LSK) for choose any of these options:
  - View: displays the selected date view.
  - View by: displays the Day view or Week view for the selected day.
  - Create: allows you to create an Appointment, Anniversary, Holiday, Important, or Private event.
  - Go to: takes you to the Today’s date or the date you entered.
  - Event list: displays a list of selectable events such as: Appointments, Anniversaries, Holidays, Important, or Private.
  - Delete: allows you to delete all events for a selected date, for a specified period, for this month, or before a date. You can also delete all events.
• **Settings**: allows you to configure calendar viewing settings such as the Starting day (of the week) and View by (Month, Week or Day).

• **Missed alarm events**: displays a list of missed alarm events.

• **Memory status**: displays the number of calendar events you presently have and how many events you can create for each category. For example: 0/50 means you used zero of fifty available events for this category.

**Week view**

When you select this option, the calendar displays the selected week with today’s date and time highlighted.

1. From Home screen, press **Menu (LSK) → Organizer → Calendar → Options (LSK) → View by → Week**.

2. In Week view, press **Options (LSK)** for choose any of these options:
   - **View by**: takes you to the Day view or Month view for the selected day.
   - **Create**: allows you to create an Appointment, Anniversary, Holiday, Important, or Private event.
   - **Go to**: takes you to today’s date or the date you entered.

• **Event list**: displays a list of selectable events such as: Appointments, Anniversaries, Holidays, Important, or Private.

• **Delete**: allows you to delete all events for a selected date, for a specified period, for this week, or before a date. You can also delete all events.

• **Settings**: allows you to configure calendar viewing settings such as the Starting day (of the week) and View by.

• **Missed alarm events**: displays a list of missed alarm events.

• **Memory status**: displays the number of calendar events you presently have and how many events you can create for each category. For example: 0/50 means you used zero of fifty available events for this category.

**Day view**

When you select this option, you are taken to the Day view of the selected day with any events listed.

1. From Home screen, press **Menu (LSK) → Organizer → Calendar → Options (LSK) → View by → Day**.

2. In Day view, highlight the event and press **Options (LSK)** for choose any of these options:
   - **View**: displays the details of an event highlighted on the Day view.
• **View by**: takes you to the Week view or Month view for the selected day.

• **Create**: allows you to create an Appointment, Anniversary, Holiday, Important, or Private event.

• **Send via**: allows you to send this event information as an attachment via Message, or to a Bluetooth enabled device.

• **Event list**: displays a list of selectable events such as: Appointments, Anniversaries, Holidays, Important, or Private.

• **Delete**: allows you to delete the selected event, or delete all events.

• **Save in Other files**: allows you to save this event information to Other files.

• **Print via Bluetooth**: allows you to send this event information to a Bluetooth enabled device.

• **Settings**: allows you to configure calendar viewing settings such as the Starting day (of the week) and View by.

• **Missed alarm events**: displays a list of missed alarm events.

• **Memory status**: displays the number of calendar events you presently have and how many events you can create for each category. For example: 0/50 means you used zero of fifty available events for this category.

3. Press **View (OK)** to view the information about the selected event.

### Appointments

This option allows you to set appointments.

1. From Home screen, press **Menu (LSK) ➔ Organizer ➔ Calendar**.

2. Press **Options (LSK) ➔ Event list ➔ Appointment**.

3. Press **Options (LSK) ➔ Create**.

4. Enter the occasion in the **Title** text box then press the **Down** Navigation key.

5. Continue to enter other information including Details, Start date, Start time, End date, End time, Location, Alarm, Before, Alarm tone, and Repeat.

6. Press **Save (OK)** to save the Appointment event to the Calendar.

### Anniversaries

This option allows you to record anniversaries in your calendar. You can also set an alarm to remind you of important anniversaries.

1. From Home screen, press **Menu (LSK) ➔ Organizer ➔ Calendar**.
2. Press **Options** (LSK) ➔ **Event list** ➔ **Anniversary**.
3. Press **Options** (LSK) ➔ **Create**.
4. Enter the occasion in the **Title** text box then press the **Down** Navigation key.
5. Continue to enter other information including Details, Date, Alarm, Before, Alarm tone and Repeat every year.
6. Press **Save** ( ) to save the Anniversary event to the Calendar.

**Holidays**

This option allows you to record holidays in your calendar. You can also set an alarm to remind you of important anniversaries.

1. From Home screen, press **Menu** (LSK) ➔ **Organizer** ➔ **Calendar**.
2. Press **Options** (LSK) ➔ **Event list** ➔ **Holiday**.
3. Press **Options** (LSK) ➔ **Create**.
4. Enter the occasion in the **Title** text box then press the **Down** Navigation key.
5. Continue to enter other information including Details, Date, and Repeat every year.
6. Press **Save** ( ) to save the Holiday event to the Calendar.

**Important**

This option allows you to record important dates in your calendar. You can also set an alarm to remind you of important dates.

1. From Home screen, press **Menu** (LSK) ➔ **Organizer** ➔ **Calendar**.
2. Press **Options** (LSK) ➔ **Event list** ➔ **Important**.
3. Press **Options** (LSK) ➔ **Create**.
4. Enter the occasion in the **Title** text box then press the **Down** Navigation key.
5. Continue to enter other information including Details, Start date, Start time, End date, End time, Location, Alarm, Before, Alarm tone, and Repeat.
6. Press **Save** ( ) to save the Important event to the Calendar.
**Private**

This option allows you to record private dates in your calendar. You can also set an alarm to remind you of important dates.

1. From Home screen, press **Menu (LSK) → Organizer → Calendar**.
2. Press **Options (LSK) → Event list → Private**.
3. Press **Options (LSK) → Create**.
4. Enter the occasion in the **Title** text box then press the **Down** Navigation key.
5. Continue to enter other information including Details, Start date, Start time, End date, End time, Location, Alarm, Before, Alarm tone, Repeat, Daily and Until.
6. Press **Save ( )** to save the Private event to the Calendar.

**Missed alarm events**

You can display all the events where an alarm was set, but was not turned off.

1. From Home screen, press **Menu (LSK) → Organizer → Calendar**.
2. Press **Options (LSK) → Missed alarm events**.
3. To view event information, highlight an event and press **OK**. The missed alarm event information displays.
4. To acknowledge and remove the event, press **Confirm (LSK) or OK**. The event is removed from the **Missed alarm events** menu.

**Memory status**

This menu item shows the number of calendar events that are stored on the handset as well as the total number of available events. Example: 2/100 means that currently there are two alarm events scheduled out of a possible 100.

1. From Home screen, press **Menu (LSK) → Organizer → Calendar**.
2. Press **Options (LSK) → Memory status**.
Alarm

This feature allows you to:

- Set up to 3 alarms to ring at specified times.
- Set the phone to switch on automatically and ring the alarm even if the phone is switched off.

The following options are available:

- **Alarm 1**: set the Name, Alarm activation, Alarm time, Alarm type, Alarm tone, Alarm volume, Day, Snooze, and Repeat for this alarm.
- **Alarm 2**: set the Name, Alarm activation, Alarm time, Alarm type, Alarm tone, Alarm volume, Day, Snooze, and Repeat for this alarm.
- **Alarm 3**: set the Name, Alarm activation, Alarm time, Alarm type, Alarm tone, Alarm volume, Day, Snooze, and Repeat for this alarm.
- **Auto power**: alarm rings at the specified time even if the phone is turned off. If the option is set to **Off**, the alarm does not ring.

**To set the alarm:**

1. From Home screen, press **Menu (LSK) ➔ Organizer ➔ Alarm**.
2. Select an alarm and press the **Select (LSK)** or **OK**.
3. Highlight the **Name** field, press and hold **C** to backspace and erase the text, then enter a new name for this alarm (if desired).
4. Highlight the **Alarm activation** field and press the **Right Navigation key** to select **On**.
5. Highlight the **Alarm time** option. Enter the time you want the Alarm to sound.
6. Press the **Down Navigation key** to highlight the **Alarm type** option and press **Edit (OK)**. Select one of the following alarm types and press **OK (LSK)**:
   - **Melody**: the alarm rings using the selected ring melody.
   - **Increasing melody**: the volume of the melody increases.
   - **Vibration**: the phone vibrates but does not play a tone.
   - **Vibration then melody**: the phone vibrates 3 times and then starts playing a melody.
   - **Vibration and melody**: the phone vibrates and plays the melody simultaneously.
   - **Vibration and increasing melody**: the phone vibrates and increases the volume of the melody.
7. Highlight the **Alarm tone** field, press **Edit (OK)** to display a list of tones from which to choose, then press **Select (LSK)**.

8. Highlight the **Alarm volume** field and press the **Left** or **Right** Navigation key to decrease or increase the volume.

9. Highlight the weekday check boxes. Press **Edit (OK)** to display a list of days.

10. Press **OK** to place a checkmark (Mark) next to one of the following selections: Everyday, Once only, Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, or Saturday. Press **OK** to place or remove a check mark (Unmark).

11. Press **OK (LSK)** to confirm your selections.

12. Highlight the **Snooze** field and press the **Right** Navigation key to select one of the following times: Off, 1 min, 3 min, 5 min, 7 min, or 10 min.

13. Highlight the **Repeat** field and press the **Right** Navigation key to select one of the following times: 1 time, 2 times, 3 times, 5 times, or 10 times.

14. Press **Save (OK)** to confirm and store your new settings.

15. Press the **key to return to Home screen.

16. To stop the alarm when it rings, press any key or press the **Snooze** (RSK).

**Voice Recognition**

This feature is used to activate a wide variety of functions on your phone. You can use your phone’s built-in automatic speech recognition (ASR) software to dial a phone number in your Contacts or to launch phone functions. All you have to do is to talk into the phone, and your phone will recognize your voice and complete tasks by itself.

The screen displays and says “**Say a command.**” The phone prompts you to say the name of the command you want to use. To complete your task, simply follow the voice prompts.

- **Call <Name or #>** to call an entry in your Contacts list or a spoken phone number. (For more information, refer to “Making a Voice Call” on page 90.)

- **Send message <Name or #>** to launch text messaging on your phone and specify a recipient for a new message. (For more information, refer to “Sending a Message” on page 90.)
• **Lookup** <Name> to lookup a Contacts entry name from your current list of available contacts.

• **Go To** <App> to jump directly to menu items or applications. (For more information, refer to “Opening Menus using Voice Recognition” on page 92.)

• **Check** <Item> to check your phone’s status. (For more information, refer to “Checking Phone Status” on page 92.)

**Note:** Use ASR in a quiet environment so it can accurately recognize your commands. Voice Dial works best in quieter environments. When saying a name, speak at a normal speed and say the name clearly. There is no need to pause between the first name and last name.

1. From Home screen, press **Menu** (LSK) ➔ **Organizer** ➔ Voice recognition.

2. When the Voice Dialer says the “**Say a command**” prompt, say one of the following commands:
   • “Call Steve Smith”
   • “Call Steve Smith at home,...”
   • “Call (888) 555 5555”
   • “Send message Steve Smith”
   • “Lookup Steve Smith”
   • “Go to [Application]”
   • “Go to Calendar”
   • “Check Missed calls”

3. A menu prompts you to confirm your selection. If you said a name with more than one match in Contacts, or if you stored more than one number for the contact, you are prompted to select from multiple options.

**Tips for Using Voice Dial**

Voice recognition works best in quieter environments. When saying a name, speak at a normal speed and say the name clearly. There is no need to pause between the first name and last name.
Making a Voice Call

2. When the application says the “Say a command” prompt, say “Call”.
3. If you hear “Say the name or number,” say a name or a phone number.
4. If you hear “Which number?,” say a number type (for example, “Mobile1”).

Note: You can skip steps 3 and 4 by saying a name and location after “Call” without pausing (for example, “Call Steve Smith mobile”).

Note: If the voice recognition does not recognize the name or number, it will find the most likely matches and display a list of up to three names or numbers. You will hear “Did you say…” followed by the name or number. You can confirm by saying “Yes.” Say “No” to change the selection.

Sending a Message

To send a message:

2. When the application says the “Say a command” prompt, say “Send message”.
3. If you hear “Say the name or number,” say a name or phone number of the recipient. For example, say “Steve Smith” or “9725555555.” The entry information for the specified contact is displayed. Use the name of a person in your Contacts list and, optionally, the type of number (Mobile1, Home1, etc.) you want to send it to. For example, say “Send Message Steve Smith Mobile1.”
4. If the phone did not properly recognize the command, it prompts you with “Did you say, send text message to?”
5. Respond by saying one of the following: Yes or No.
6. Use the keypad to enter text and press Send (OK) to complete the message and deliver it. For more information, refer to “Entering Text” on page 33.
Note: If you want to create a multimedia message, follow steps 7 and 8.

7. Press the Down navigation key and select Add picture.
8. After adding the attachment, press Options to set options for this message:
   - Preview: allows you to view the message prior to sending.
   - Add recipients: allows you to add Recent recipients, Contacts, Groups. or send this message to the Online Album.
   - Insert: allows you to insert a Text template, Text emoticon, Contacts, or Bookmarks. The Text templates allow you to apply one of the preset message templates to the text. Select one of the 12 items stored in the Text message templates menu. Contact allows you to add names and phone numbers to your message. Bookmarks allows you to add Internet addresses to your message.
   - Add attachment: allows you to attach a File, Name card, Appointment, Anniversary, Private, Holiday, Important, Tasks, Memo, or Bookmarks to the message.
   - More: allows you to Add a page, Add subject, Edit style, Sending options, or Select a language (Français, or Español) for this message.
   - Save to: save the message to your Drafts or Templates folder.
   - Exit composer: exits the composer and displays the Create new screen.
9. Press Send ( ) to send the current picture message.

Looking up an Existing Contact

This feature is used to search through your existing Contact entries for a desired phone number using Voice Recognition.

2. When the application says the “Say a command” prompt, say “Lookup”.
3. If you hear “Say the name”, say the name of an existing entry on your Contact list. The Contacts’ details will be displayed on-screen.
Opening Menus using Voice Recognition

2. When the application says the “Say a command” prompt, say “Go to”. A list of valid destinations is displayed and you are prompted with “Which shortcut?”

3. If the list is too long to fit on one screen, you can say the name of a destination.

4. Examples can include: web2go, Calendar, Media, Tasks, Contacts, Voicemail, Games and Apps.

5. Say the name of the application you want the phone to activate.

Checking Phone Status

You can use voice recognition to obtain information about your phone such as Status, Messages, Missed calls, Time, Signal strength, Network, Battery, My phone number, and Volume.

2. When the application says the “Say a command” prompt, say “Check”.

3. When you hear “Which status item?”, speak an item.

Voice Recognition Settings

Voice recognition settings consist of the following options:

- Confirmation
- Adaptation
- Audio modes
- Speakerphone
- About
Configuring Voice Recognition Options

To change the confirmation:

2. From the “Say a command” prompt, press Settings (RSK) ➔ Confirmation.
3. Select one of the available options:
   - **Automatic** to always provide you with options if there was an issue registering the command, confirm any commands, and then announce any actions.
   - **Always Confirm** to always confirm any command actions before they are done, even if it was properly registered.
   - **Never Confirm** to never confirm any command operations. The phone will always act on what it registers as the current command, even if it is incorrect and without notifying you.

To adapt the system to your voice:

2. Hold the phone so that the microphone is approximately six inches away from your mouth and you can clearly read the onscreen number sequences.
3. Repeat either the digits or words shown onscreen using a normal tone of voice.
   - If the phone cannot recognize your words, it will continue to display the same information onscreen.
4. Repeat the previous step for the remaining sets of digits or words.
5. When you are finished with a full session, you will reach a screen that reads, “Adapting.”
6. Press OK to save.
To reset the adaptation
2. Press Yes to reset the voice recognition parameters or No to exit.

To enable and disable Audio Modes:
You can customize whether the voice recognition feature displays either a list of top voice recognition choices or automatically dials the first number without displaying a choice list.
2. From the “Say a command” prompt, press Settings (RSK) ➔ Audio modes.
3. Select one of the following:
   • Expert mode displays both a selectable list of matching entries and if the first entry is not correct, the phone will continue to read out each available option until it detects either a confirmation (Yes) or rejection (No).
   • Prompt mode displays a selectable list of available dialing options and only reads out the entry name. You are required to touch an onscreen option to activate a command.
   • Readout mode reads out every onscreen menu and option selected.

To enable and disable Speakerphone:
You can control the speakerphone behavior while using voice recognition.
2. From the “Say a command” prompt, press Settings (RSK) ➔ Speakerphone.
3. Select one of the following: Automatic, Always on, or Always off.

To display information about voice recognition
Tasks
This feature allows you to enter a task list.

1. From Home screen, press Menu (LSK) ➔ Organizer ➔ Tasks.
2. Press Options (LSK) ➔ Create to create a new task.
3. Enter a short description of the task in the Title field then press the Down Navigation key.
4. Enter a short description in the Details field and press the Down Navigation key.
5. Continue to enter other information including Start date, Due date, Alarm, Alarm date, Alarm time, Alarm tone and Priority.
6. Press Save (OK) when you are finished. Your Task list saves to the Calendar.

Editing the Tasks List
When you select the Tasks list menu, the current contents display with a status checkbox and a priority marker.
If the item was done, a check displays in the checkbox.
High priority items display a “1” triangle icon, Normal priority items display a “2” triangle icon, and Low priority items display a “3” triangle icon.

1. From Home screen, press Menu (LSK) ➔ Organizer ➔ Tasks.
2. Highlight a task from the list and press View (OK).
3. Highlight a field to edit and press Edit (OK).
4. Edit the items you wish to change and press Save (OK) when your edits are complete.

Memo
This option allows you to create notes to add to your events.

1. From Home screen, press Menu (LSK) ➔ Organizer ➔ Memo.
2. Press Options (LSK) ➔ Create to create a new memo. A blank Memo screen displays.
3. Enter your text and press Save (OK) to save.
**Calculator**

With this feature, you can use the phone as a calculator. The calculator provides the basic arithmetic functions; addition, subtraction, multiplication, and division.

1. From Home screen, press **Menu (LSK) → Organizer → Calculator**.
2. Enter the first number using the numeric keys.
3. Use the Navigation keys to select the calculation method, according to the illustration on the display.
4. Enter the second number using the numeric keys.

**Note:** Press the **Left** soft key to insert a decimal point, or press it multiple times to create brackets. Press **I** to move the cursor to the left or press **D** to move the cursor to the right within a number.

5. Press **OK** to view the result. Repeat steps 1 to 4 as many times as required.

**Tip calculator**

This feature calculates a tip amount by percentage, and divides the total bill by the number of payers.

1. From Home screen, press **Menu (LSK) → Organizer → Tip calculator**.
2. In the **Bill** field, enter the check amount.

**Note:** Press **D** to enter a decimal point for the exact dollar amount.

3. Highlight **Tip(%)** percentage. 15 is the default value but you can change this value. The **Tip($)** field value calculates according to the values entered.
4. Highlight the **# paying** field to change the number of people contributing to the bill.
5. The **You pay** field displays the total for each individual.
**World clock**

This feature allows you to see the current time in another part of world. There are two time lines available. You can set the first setting to your home city and use the second setting to check other city times.

1. From Home screen, press **Menu (LSK) → Organizer → World clock**.
2. Press **Options (LSK) → Add** to create a new time zone.
3. Press the **Left** or **Right** Navigation key until the desired GMT time zone displays in the field.
4. Press the **Down** Navigation key and press to place a check mark in the **Daylight saving** checkbox (if applicable).
5. Press **OK (LSK)** to confirm you settings.

**Converter**

The conversion menu provides the following conversion categories:
- Currency
- Length
- Weight
- Volume
- Area
- Temperature

To convert from one unit to another:

1. From Home screen, press **Menu (LSK) → Organizer → Converter**.
2. Scroll to the conversion category you wish to use and press **Select (LSK)** or .
3. Use the **Up**, **Down**, **Left**, and **Right** navigation keys to select the **From** and **To** units of measure for the quantity you want converted.

**Tip:** Press to enter a decimal point.

4. Press **Back (RSK)** to return to the **Converter** menu.
Timer

You can use this menu to set a timer. To enable the Timer, use the following options:

1. From Home screen, press Menu (LSK) ➔ Organizer ➔ Timer.
2. Press Set (LSK), enter the length of time as HH:MM:SS and press OK (LSK).
3. Press Start (OK) to start the timer.
   – or –
   Press Pause (OK) to pause the timer.
4. Press when you are finished.

Stopwatch

This feature allows you to use a stopwatch.

1. From Home screen, press Menu (LSK) ➔ Organizer ➔ Stopwatch.
2. Press Start or OK to start the stopwatch.
3. Press Lap (OK) to record each lap.
4. Press Stop (RSK) or OK to stop recording the lap time. You can view up to 50 lap times.

5. Press Reset (LSK) to erase all previously recorded stopwatch times.

RSS reader

The RSS reader feature allows you to receive up-to-date web pages, news, and other information (such as updates) distributed through an RSS feed.

Enter the RSS feed address in the RSS reader to create an entry, then periodically update the entry manually or automatically.

To set up the RSS reader feature:

1. From Home screen, press Menu (LSK) ➔ Organizer ➔ RSS reader.
2. Press Options (LSK) ➔ Add.
3. Enter a URL for the RSS feed, then press OK (LSK). The URL automatically retrieves.
4. Press Subscribe (LSK), to add the current RSS to your list of stored RSS feeds, or Cancel (RSK) to exit the application.
Configuring the RSS reader settings

1. From Home screen, press Menu (LSK) → Organizer → RSS reader.

2. Press Options (LSK) → Settings.

4. Highlight the next field and press the Right Navigation key to select the frequency the RSS reader updates:
   RSS reader launch, Daily, or Weekly.

5. Press Save (LSK) to confirm and save your selections.
Section 10: Camera

This section explains how to use the camera on your phone. You can take photographs by using the built-in camera functionality.

Using the Camera

Using the camera module in your phone, you can take photos of people or events while on the move. Additionally, you can send these photos to other people in a Picture Messaging message or set a wallpaper or caller ID image.

Note: Do not take photos of people without their permission. Do not take photos in places where cameras are not allowed. Do not take photos in places where you may interfere with another person’s privacy.

Take and Send

Your camera produces photos in JPEG format.

Note: When you take a photo in direct sunlight or in bright conditions, shadows may appear on the photo.

1. From Home screen, press Menu (LSK) ➔ Media ➔ Photos ➔ Camera.

Tip: Press the key on the right side of the phone to access the camera module.

2. Adjust the image by aiming the camera at the subject.

3. Press Menu (LSK) to access the camera options. For details, see “Configuring Camera Options” on page 102.

Note: You can use the keypad to quickly change the camera options.

4. Press or to take the photo. Send to: My Album Online? displays.

5. Press Yes (RSK) if you want to send the photo to your T-Mobile My Album Online service. The phone’s default destination is set to My Album Online. The photo is automatically saved to the Photos folder in the phone.

Camera 100
6. Press Options (LSK) to view the following options:
   - Take another: allows you to take another picture.
   - Send to: sends this image to Recent recipients, Contacts, Groups, or Online album.
   - Send via: attaches this photo to a new outgoing Message, or Bluetooth.
   - Default destination: allows you to remove or change the default destination for the location of photos. Options include: Recent recipients, Contacts, Online album or New number.
   - Print via Bluetooth: allows you to send the current picture to an external Bluetooth printer for reproduction.
   - Delete: allows you to erase the current image. Press Yes (LSK) to complete the deletion.

7. Press Options (LSK) ➔ Send via to send this image in a Message, or via Bluetooth.
   – or –

8. Press Options (LSK) ➔ Send to creates a Message, where you can choose to send the photo to Recent recipients, Contacts, Groups, or to an Online Album.
   – or –
   Press Options (LSK) and select Take another then press Select or OK to return to Capture mode.

Camera Options

Shortcut keys allow you to change some settings using the keypad, Navigation keys, and Volume key while in capture mode.

Note: These button functions also apply to the camera feature if it is accessed via Menu (LSK) ➔ Media ➔ Photos ➔ Camera.

- **OK** Takes the photograph.

**Navigation Keys**

- **Left** and **Right** navigation keys adjust the image brightness.
- **Up** and **Down** navigation keys zoom in and out.
- Allows you to switch between Camera and Camcorder modes, available only when you press the Camera key in the Idle screen.
- Toggles through the shooting modes.
- Cycles among the various timer modes (Off, 2 seconds, 5 seconds or 10 seconds).

Changes the viewfinder mode.

Configuring Camera Options

- Before taking a photo, press **Menu** (LSK) to access the following:
  - **Camera**: allows you to take a picture.
  - **Shooting Mode**: takes a photo in various modes. Once you change the mode, the corresponding indicator displays at the top left of the display.
    - **Single**: takes a single photo and allows you view it before returning to the shooting mode.
    - **Continuous**: takes a succession of photos.
    - **Smile shot**: focuses on the foreground or subject and not on the background.
  - **Night mode**: select On, to allow for better pictures in low light conditions, or Off.
  - **Size**: allows you to set the image size to either: 1280 X 960, 640 X480, 320X 240.
  - **White balance**: allows you to set this option from the following choices: Auto, Daylight, Incandescent, Fluorescent, or Cloudy.
• **Exposure meter**: choose how the camera measures the light source: Matrix, Center-weighted or Spot.

• **Effects**: choose how the image effects: None, Black and white, Sepia, Negative, and Watercolor.

• **Set default destination**: allows you to Remove a current destination location or Change the current location by establishing a new folder in which to place the photo(s). Select from Camera Shortcuts the following options: Recent recipients, Contacts, Online album, or New number.

• **Self timer**: choose the time delay before an image is taken: Off, 2 seconds, 5 seconds, or 10 seconds.

• **Viewfinder mode**: choose assign the way in which the camera image is displayed: Full screen view and indicator, Full screen view, Full screen view and guide, and Standard ratio view.

• **Settings**:
  — **Photo**: choose the Quality of new photos: Economy, Fine or Superfine.
  — **Setup**: configure the Review screen, Shutter sound, or view camera Shortcuts.

---

**Photo Options**

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Photos**. When you access this menu, your phone displays the photos in Line view, which shows them as small images. Use the Navigation keys to scroll through the photos.

2. Press **View** ( ) to view the photos on the full screen. Press **Back** to redisplay Line view.

3. With the image displayed in full screen, press **Options** (LSK) to use the following options:
   - **Send to My Album**: allows you to send your photos to My Album.
   - **Send via**: allows you to send the selected photo as a Message or to a Bluetooth enabled device.
   - **Set as**: allows you to set the photo as a Wallpaper or as a Picture ID.
   - **Default destination**: allows you to Change or Remove where your photos are sent after you take them.
   - **Delete**: allows you to delete the selected or multiple photos.
   - **Rename**: allows you to rename the photo.
   - **Edit image**: allows you to edit the selected image.
• **Bluetooth visibility**: allows you to enable the current photo so it is visible to other Bluetooth devices.

• **Slide show**: allows you to see all of your photos in a slide show presentation.

• **Print via Bluetooth**: allows you to send the selected photo to a Bluetooth enabled printer.

• **Lock/Unlock**: allows you to lock the selected photo to protect it from deletion, or unlock the photo to allow deletion.

• **Properties**: shows the properties of the photo, such as the file Name, Date, Format, Resolution, Size, and Lock/Unlock.

**Deleting a Photo**

You can delete photos one by one or all at one time.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Photos**. From the **Photos** menu, highlight the photo you want to delete.

2. Press **Options** (LSK) ➔ **Delete** and press the Right Navigation key.

3. Select a deletion of either the currently **Selected** image, **Multiple**, or **All** images and press **Select** (LSK) or **OK**.

4. Press **Yes** (LSK) to confirm the deletion.

5. Press **Return** when you finish.

**Using the Camcorder**

Use the camcorder module in your phone to record videos of people or events while on the move. You can send videos to other people in a message or via Bluetooth.

**Recording and Sending a Video**

**Tip:** For best results when shooting video in direct sunlight or in bright conditions, provide your subject with sufficient light by putting the light source behind you.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Videos** ➔ **Record video**.

2. Before recording the video, press **Menu** (LSK) to access camcorder options (see “Video Options” on page 107).

3. Adjust the image by aiming the lens at the subject.

**Tip:** You can use shortcuts to quickly change some camcorder settings. For more information, refer to “Camcorder Shortcuts” on page 106.
4. Press \[\text{ }\] or \(\text{OK}\) to begin shooting video.
5. Press \text{Stop} (RSK) or \text{Camera} key to stop the recording and save the video. Press \(\text{OK}\) to pause or resume recording.
6. After the video saves:
   - Press \text{Options} (LSK) for Video options. For more information, see “Video Options” on page 107.
   - The screen displays “\text{Send to: My Album Online?}” Press \text{Yes} (RSK) to send the highlighted video to your online album.
7. Press \text{Options} (LSK) ➔ \text{Send via} to send the video in a Message or to a Bluetooth device.
   – or –
   Press \text{Options} (LSK) ➔ \text{Send to}, to create a Message, where you can choose to send the video to Recent recipients, Contacts, Groups, or to an Online Album.
8. Press \(\text{EXIT}\) to return to the Home screen.

---

### Configuring the Camcorder

- Before taking a photo, press \text{Menu} (LSK) to access the camcorder options.
  - \text{Camcorder}: allows you to record a video.
  - \text{Mode}: limit the size of videos. Choose Normal or Limit for MMS.
  - \text{Size}: if Limit setting is Normal, displays either 320x240 or 176x144.
  - \text{White balance}: choose a setting to match conditions. Choose from Auto, Daylight, Incandescent, Fluorescent, or Cloudy.
  - \text{Exposure meter}: choose how the camera measures the light source: Matrix, Center-weighted or Spot.
  - \text{Effects}: apply special effects to the photo. Options include: None, Black and White, Sepia, Negative, or Watercolor.
  - \text{Default destination}: Remove a current destination location or Change the current location.
  - \text{Timer}: set a time delay between the time you press \(\text{OK}\) and the video starts to record. Select the length of delay, from Off, 2 seconds, 5 seconds, or 10 seconds.
  - \text{Viewfinder mode}: select Full screen view and guidelines. or Standard ratio view.
• **Settings:**
  
  — **Video:** set the Quality of the video, to Economy, Fine, or Superfine, and set Audio recording to On or Off.
  
  — **Setup:** configure the Review screen, or view camcorder Shortcuts.

**Camcorder Shortcuts**

Shortcut keys allow you to change some settings using the keypad, Navigation keys, and Volume key while in capture mode.

---

**Note:** These button functions also apply to the camcorder feature if it is accessed via **Menu (LSK) ➔ Media ➔ Videos ➔ Record video.**

---

![OK](ok.png)  
**Shots the video.**

**Navigation Keys**

- **Left** and **Right** navigation keys adjust the image brightness.
- **Up** and **Down** navigation keys zoom in and out.

![1](1.png)  
**Allows you to switch between Camera and Camcorder modes, available only when you press the Camera key in the Idle screen.**

![2](2.png)  
**Changes the size of the image being recorded.**

![3](3.png)  
**Cycles among the various timer modes (Off, 2 seconds, 5 seconds or 10 seconds).**

![4](4.png)  
**Changes the viewfinder mode.**
Video Options

1. With the video recording just stopped (capture mode), press Options (LSK) for these options:
   • **Record another**: returns to capture mode to record another video.
   • **Play**: plays back the current video.
   • **Send to**: creates a message to send this video in a message.
   • **Send via**: sends the selected photo in a Message, or to a Bluetooth enabled device.
   • **Default destination**: change where your videos are sent after recording. Choose from Recent recipients, Contacts, Online Album or New number.
   • **Delete**: delete the selected video.
   • **Properties**: displays information about the video, such as Name, Format, Resolution, Size, Forwarding, Date created, and Location.

My Album

My album is a private online picture album that you can use to store and share pictures, videos, voice messages, and text.

Use the following procedures to access My album.

**Note:** When accessing My album, charges may apply. The feature is not activated until you send your first image to the remote My album location.

1. From Home screen, press **Menu** (LSK) ➔ **Media** ➔ **Photos**.
2. Select **My album**. The web2go browser launches and the T-Mobile Web page displays.
3. Scroll to highlight an album and press **Select** (LSK) or **OK** to view the photos.
4. Scroll to view the photos in the album.
5. Press the **key** to exit the browser and return to the Home screen.
Section 11: Changing Your Settings

This section explains the sound and phone settings for your phone. It includes such settings as: display, security, memory, and any other settings associated with your phone.

Personalize your Phone

You can customize various phone settings such as sounds, the display, phone settings, messaging key, memory, language, greeting message, and time and date.

- From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize.

Sound profiles

You can choose and customize sound settings as part of sound profile.

Normal

Normal profile includes audible alerts and tones for incoming calls and messages, key presses, and powering on and off.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Sound profiles.

2. To customize the Normal profile settings, highlight Normal and press the press Options (LSK) ➔ Edit. Press the Navigation key left or right to select a new tab.

- **Incoming call**: highlight a setting and press Ok Edit to make a selection.
  - **Call alert type**: select an alert type for incoming calls, from Melody, Vibration, Vibration then melody, or Vibration and melody.
  - **Ringtone**: select a ringtone for incoming calls or from one of the listed folders.
  - **Ringtone volume**: choose a volume level between 1 and 7 for incoming call alerts.

- **New messages**: highlight a setting and press Ok Edit to make a selection.
  - **Message alert type**: select an alert type for new messages, from Melody, Vibration, Vibration and melody, or Mute.
- **Message alert tone**: choose an alert tone for new messages, from T-Mobile message, Message tone 1, Message tone 2, Message tone 3 or Message tone 4.
- **Message alert repetition**: choose an interval for repeating alerts for new messages, from Once, Every 1 minute, or Every 2 minutes.
- **Message tone volume**: choose a volume level between 1 and 7 for new messages alerts.

- **Phone sounds**: highlight a setting and press **Edit** (OK) to make a selection.
  - **Keypad tone**: select a tone for keypad presses, from Beep, Lucid or Off.
  - **Power on type**: choose a type of sound for the phone to play when powering on, from Melody, Vibration, Vibration and melody, or Mute.
  - **Power off type**: choose a type of sound for the phone to play when powering off, from Melody, Vibration, Vibration and melody, or Mute.
  - **Phone sound volume**: choose a volume level between 1 and 7 for phone sounds.

3. After making selections, press **Options** (LSK) ➔ **Save** or press the **Back** soft key, then press the **Yes** (LSK) soft key to confirm your settings.

### Silent

When set to Silent profile, your phone makes no sounds.

- From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Personalize** ➔ **Sound profiles** ➔ **Silent**.

Note: There are no settings to customize for the Silent profile.

### Vibration

When set to Vibration profile, your phone vibrates to alert you to incoming calls and messages.

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Personalize** ➔ **Sound profiles** ➔ **Vibration**.

2. To customize the Vibration profile settings, highlight Normal and press the press **Options** (LSK) ➔ **Edit**. Press the Navigation key right to select the New messages tab.
   - **New messages**: highlight a setting and press **OK** **Change** to change the selection.
Message alert repetition: choose an interval for repeating alerts for new messages, from Once, Every 1 minute, or Every 2 minutes.

**Note:** There is only one setting available for customization within the Vibration profile.

**Tip:** You can quickly activate Vibration profile from Home screen by pressing and holding the \# key until the “Vibration Profile on” message and the Vibration profile icon \ ([ ] ) displays.

To return to the previous sound profile, press and hold the \# key until the phone returns to the previous profile and the icon disappears.

---

**Driving**

You can customize the Driving profile to include audible alerts and tones for incoming calls and messages, key presses, and powering on and off.

1. From Home screen, press Menu (LSK) → Settings → Personalize → Sound profiles.
2. To customize the Driving profile settings, highlight Driving and press the press Options (LSK) → Edit. Press the Navigation key left or right to select a new tab.
   - **Incoming call**: highlight a setting and press Edit (OK) to make a selection.
   - **Call alert type**: select an alert type for incoming calls, from Melody, Vibration, Vibration then melody, or Vibration and melody.
   - **Ringtone**: select a ringtone for incoming calls, from the Music, Sounds, or Voice list folders on your phone, or from the optional memory card.
   - **Ringtone volume**: choose a volume level between 1 and 7 for incoming call alerts.
• **New messages**: highlight a setting and press **Edit (OK)** to make a selection.
  
  — **Message alert type**: select an alert type for new messages, from Melody, Vibration, Vibration and melody, or Mute.
  
  — **Message alert tone**: choose an alert tone for new messages, from T-Mobile message, Message tone 1, Message tone 2, Message tone 3 or Message tone 4.
  
  — **Message alert repetition**: choose an interval for repeating alerts for new messages, from Once, Every 1 minute, or Every 2 minutes.
  
  — **Message tone volume**: choose a volume level between 1 and 7 for new messages alerts.

• **Phone sounds**: highlight a setting and press **Edit (OK)** to make a selection.
  
  — **Keypad tone**: select a tone for keypad presses, from Beep, Lucid or Off.
  
  — **Power on type**: choose a type of sound for the phone to play when powering on, from Melody, Vibration, Vibration and melody, or Mute.

  — **Power off type**: choose a type of sound for the phone to play when powering off, from Melody, Vibration, Vibration and melody, or Mute.

  — **Phone sound volume**: choose a volume level between 0 and 7 for phone sounds.

3. After making selections, press **Options (LSK) → Save** or press the **Back** soft key, then press the **Yes** soft key to confirm your settings.

**Outdoor**

You can customize an Outdoor profile to include audible alerts and tones for incoming calls and messages, key presses, and powering on and off.

1. From Home screen, press **Menu (LSK) → Settings → Personalize → Sound profiles**.
2. To customize the Outdoor profile settings, highlight **Outdoor** and press the press **Options (LSK) → Edit**. Press the Navigation key left or right to select a new tab.

• **Incoming call**: highlight a setting and press **Edit (OK)** to make a selection.
– **Call alert type**: select an alert type for incoming calls, from Melody, Vibration, Vibration then melody, or Vibration and melody.

– **Ringtone**: select a ringtone for incoming calls, from the Music, Sounds, or Voice list folders on your phone, or from the optional memory card.

– **Ringtone volume**: choose a volume level between 1 and 7 for incoming call alerts.

**New messages**: highlight a setting and press **Edit** (OK) to make a selection.

– **Message alert type**: select an alert type for new messages, from Melody, Vibration, Vibration and melody, or Mute.

– **Message alert tone**: choose an alert tone for new messages, from T-Mobile message, Message tone 1, Message tone 2, Message tone 3 or Message tone 4.

– **Message alert repetition**: choose an interval for repeating alerts for new messages, from Once, Every 1 minute, or Every 2 minutes.

– **Alert tone volume**: choose a volume level between 1 and 7 for new messages alerts.

– **Phone sounds**: highlight a setting and press **Edit** (OK) to make a selection.

– **Keypad tone**: select a tone for keypad presses, from Beep, Lucid or Off.

– **Power on type**: choose a type of sound for the phone to play when powering on, from Melody, Vibration, Vibration and melody, or Mute.

– **Power off type**: choose a type of sound for the phone to play when powering off, from Melody, Vibration, Vibration and melody, or Mute.

– **Phone sounds volume**: choose a volume level between 1 and 7 for phone sounds.

3. After making selections, press **Options** (LSK) ➔ **Save** or press the **Back** soft key, then press the **Yes** soft key to confirm your settings.
Display settings

Use Display settings to change various settings for the display or backlight.

Wallpaper

Select a background image for display while in Home screen mode.

Note: Wallpapers can be assigned to either the Main or Front Display.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Display ➔ Wallpaper.
2. Browse for images from the Photos or Images folders on your phone, or from an optional memory card.
3. To set an image as the Wallpaper, highlight the image and press Select (LSK) or the OK key.
4. Preview the image, then press Set (LSK) to retain the wallpaper, or press the Back soft key to discard the change and choose another image.

Dialing display

Choose font and the background settings for the dialing display.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Display ➔ Dialing display.
2. Highlight a setting and press Select (LSK) to customize it:
   - Font type: choose Normal 1 or Normal 2, then press Save (LSK).
   - Font size: select Large, Medium or Small, then press Save (LSK).
   - Font color: select Basic (black and white), Monochrome, or Gradation. For Monochrome or Gradation, press the Down Navigation key and then scroll through the available colors. Press Save (LSK) to save your selection.
   - Background color: choose from the available colors, then press Save (LSK).
**Brightness**

Adjust the display brightness for better viewing in different lighting conditions.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Display ➔ Brightness.
2. Choose a brightness level between 1 and 5, then press Save (LSK) to save your changes.

**Backlight time**

Select the length of time that the screen backlight stays on and how long the backlight is dimmed before turning off.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Display ➔ Backlight time.
2. Highlight a setting and press Edit (OK) to select a time:
   - **On**: choose a length of time for the screen backlight to stay on, from 5 seconds, 15 seconds, or 30 seconds.
   - **Dim**: choose a length of time for the screen backlight to remain dim after the backlight setting, from Off, 5 seconds, 15 seconds, or 30 seconds.
3. Choose a time value, then press Save (LSK) to save your changes.

**Keypad light**

Choose settings for times of day when the keypad light turn on.

2. In the Set time field, choose **Use at any time** to have the keypad light turn on at any time of day, or **Use at custom time** to create a time window for keypad light by setting After time and Until time.
3. Press Save (LSK) to store your changes.
Phone settings

Use Phone settings to customize your phone’s operation to suit your needs.

Airplane mode

Airplane Mode allows you to use many of your phone’s features, such as Games, Voice Notes, etc., when you are in an airplane or in any other area where making or receiving calls or data is prohibited. When your phone is in Airplane Mode, it cannot send or receive any calls or messages, or access online information.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Phone settings ➔ Airplane mode.
2. Highlight On or Off and press Save (LSK).

HAC mode

This menu is used to activate or deactivate the Hearing Aid Compatibility feature.

Important! Hearing aid (HAC) mode works when the phone is open but is not accessible when the phone is closed.

Security

The Security settings allow you to restrict the use of your phone by others and to restrict dialed calls. Lock codes and passwords are used to protect the features of your phone.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Phone settings ➔ Security ➔ Lock phone.
2. Select Enable to have the phone prompt you for a user-defined code when you power on the phone. → or →

Lock phone

When the Lock phone setting is enabled, the phone locks automatically when powered on, and you must enter the phone password to use the phone. After entering the correct password, you can use the phone until you power it off.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Phone settings ➔ Security ➔ Lock phone.
2. Select Enable to have the phone prompt you for a user-defined code when you power on the phone. → or →
Select **Disable** to have the phone power on with no code required.

3. Press **Confirm** (LSK) to store your changes.

**Lock Applications**

Using this menu, you can lock your applications which provide access to information such as All, Call history, Messaging, Media (Sounds, Images, Videos, Music, Other files), Calendar, Tasks, Memo, Contacts, and Voicemail. Once you have locked the contents, you must enter the phone's password to access the associated menus.

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Personalize** ➔ **Phone settings** ➔ **Security** ➔ **Lock applications**.
2. Press **Mark** (✓) to place a check mark on a selected item.
   - Select **All** to lock all listed applications.
3. Press **Save** (LSK) to lock the selected applications.
4. Enter a security password and press **Confirm** (LSK).

**Change phone password**

The Change phone password setting allows you to change the current phone password to a new one. You must enter the current password to confirm the password change.

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Personalize** ➔ **Phone settings** ➔ **Security** ➔ **Change phone password**.
2. Enter a password in the **Current password** field and press **Confirm** (LSK). This password would have been previously setup, see “Lock phone” on page 115.
3. Enter the new password in the **New password** field and press **Confirm** (LSK).
4. Re-enter the same new password and press **Confirm** (LSK).

**Note:** If you change your password, be sure to record it and keep it in a safe place. If you forget your password, contact your Service Provider for assistance.
Check PIN code

When the Check PIN code feature is enabled, you must enter your PIN each time you switch on the phone. This means that any person who does not know your PIN cannot use your phone without your approval.

Note: You must enter the PIN code to enable or disable the Check PIN Code feature.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Phone settings ➔ Security ➔ Check PIN code.

2. Select Enable to have the phone prompt you for the PIN each time you power it on.
   – or –
   Select Disable to have the phone connect directly to the network when you power it on.

3. Press Save (LSK) to store your changes.

Change PIN code

This feature allows you to change your current PIN, provided that the Check PIN code feature is enabled. You must enter the current PIN before you can specify a new one.

Note: Pin lock must be enable before using this feature.

Once you enter a new PIN, you are asked to confirm the PIN number by re-entering it.

- From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Phone settings ➔ Security ➔ Change PIN code.

Set FDN mode

FDN (Fixed Dialing Number) mode, if supported by your SIM card, allows you to restrict your dialed calls to a limited set of phone numbers.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Phone settings ➔ Security ➔ Set FDN mode.

2. Choose one of the following options:
   – Disable: you can call any number.
   – Enable: you can only call phone numbers stored in Contacts.
     You must enter your PIN2 code. You can obtain your PIN2 from T-Mobile’s customer service.

3. Press Save (LSK) to store your changes.
**Change PIN2 code**

The Change PIN2 feature allows you to change your current PIN2 to a new one. You must first enter the current PIN2 (obtained from T-Mobile) before you can specify a new one. Once you enter a new PIN2, you are asked to re-enter the new PIN2 to as confirmation.

**Note:** Not all SIM cards have a PIN2. This menu does not display if your SIM card does not have the PIN2 feature.

**USB Mode**

Select the default method of communication when you connect your phone to a USB port on a PC to transfer files between your PC and phone.

1. From Home screen, press **Menu** (LSK) \(\rightarrow\) **Settings** \(\rightarrow\) **Personalize** \(\rightarrow\) **Phone settings** \(\rightarrow\) **USB mode**.
2. Choose one of the following options:
   - **Charging Only**: when enabled, your phone allows charging only.
   - **Media Transfer Only**: when enabled, your phone allows media transfer only.
3. Press **Save** (LSK) to store your changes.

**Note:** You are unable to connect to PC Studio when the Mass storage option is selected.

**Data Roaming**

This feature allows you to control the use of data services when your phone is in roaming area.

**Important!** Once data roaming is disabled, avoid applications that may reactivate the data roaming feature and charges incurred. Please contact your T-Mobile service center for details.

1. From Home screen, press **Menu** (LSK) \(\rightarrow\) **Settings** \(\rightarrow\) **Personalize** \(\rightarrow\) **Phone settings** \(\rightarrow\) **Data roaming**.
2. Select **Enable** to allow data roaming or **Disable**.
3. Press **Save** (LSK) to store your changes.
Memory Settings

Clear phone memory

From this menu you can clear the memory for Media, Messaging, Phonebook, Calendar, Tasks, or Memo. You can also select All to clear everything listed.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Memory settings ➔ Clear phone memory.

2. Highlight one of the applications to clear, or highlight All to clear all the memory settings and press OK. A checkmark displays next to each application to clear.

3. Press OK (LSK) to clear the application.

4. Enter your phone password in the Password field and press Confirm (LSK).

5. At the Clear? prompt, press Yes (LSK) to confirm your action or No (RSK) to cancel.

Memory status

You can check the amount of the memory being used and the memory remaining for Shared memory, Messaging, Media, Calendar, Tasks, Memo, and Contacts.

The display shows the total space including the used and free space. You can also view how much space is currently occupied by each message box.

You can also check how many names and numbers are stored on the Phone, on the SIM card, and the FDN list.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Memory settings ➔ Memory status.

2. Select a category from the menu and press OK to view the memory status for that category.
Language
Select the language for screen text and inputs.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Language.

2. Highlight the Screen text field and press Edit (OK), then select Automatic (based on the Input language), English, Français, or Español.

3. Highlight the Input language field and press Edit (OK), then select English, Français, or Español.

4. Press Save (LSK) to confirm your selections.

Greeting message
Enter a greeting to display briefly when the phone is powered on. For details about entering characters, see “Entering Text” on page 33

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Greeting message.

2. Press C to clear the default text and enter your own message.

3. Press Options (LSK) for these options:
   • Save: saves the currently entered greeting message.

   • Select language: select Français or Español as the language for displaying your message.

   • Edit style: configure the Font color, Font size, or Font type for this greeting message.

   • Cancel: exits the menu and return to the Personalize options.

4. Press OK to save your selections.

Time and date
This menu allows you to control how your phone determines and displays the current time and date.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Personalize ➔ Time and date.

2. Select any of the following options:
   • Time zone updating: allows you to receive time information from T-Mobile’s network.
     – Automatic: the phone automatically updates the time and date according to the current time zone using the network service.
     – Manual only: you need to manually set the time and date according to the current time zone using the Set time menu.
     – Prompt first: the phone asks for a confirmation before the update.
• **Home zone**: choose from a list of 30 time zones, if Manual only or Prompt first are selected.

• **Time**: allows you to change the hour and minute, if Manual only or Prompt first are selected.

• **Date**: allows you to enter the month, day, and year, if Manual only or Prompt first are selected.

• **Time format**: allows you to select whether the time displays in 12 hour or 24 hour format.

• **Date format**: allows you to select the display format for the date: MM/DD/YYYY, DD/MM/YYYY, YYYY/MM/DD, or YYYY/DD/MM.

3. Press **Save (LSK)** to store your changes.

### Bluetooth

#### About Bluetooth

Bluetooth is a short-range wireless communications technology capable of exchanging information over a distance of about 30 feet without requiring a physical connection.

You don’t need to line up the devices to beam information with Bluetooth. If the devices are within range, you can exchange information between them, even if they are located in different rooms.

- From Home screen, press **Menu (LSK) ➔ Settings ➔ Bluetooth**.

The following options are available:

**Turn Bluetooth On/Off**

**Turn Bluetooth On or Off:**

- Make a selection and press **Select (LSK) or OK**.

  When you turn Bluetooth on, your phone proceeds with searching for nearby Bluetooth devices.

**My devices**

This option allows you to search for new Bluetooth devices.

- Select **My devices ➔ Search new device**. The phone searches for available devices.

**My visibility**

When Bluetooth Visibility is turned on, your phone is wirelessly transmitting its phone name and status. This can be useful if you are attempting to connect to other Bluetooth devices.
devices. Making your phone visible can pose a security risk and invite unauthorized connection. This feature should be used with Bluetooth security options.

- Highlight the option (Off/On/Custom) and press Select (LSK) or .

**My phone name**

When your phone’s Bluetooth visibility is On, it identifies itself using the name entered into this text field. This name can be altered by selecting the pre-existing text and entering a new text string in its place. This feature should be paired with a Bluetooth security option.

1. Press and hold to erase the previous name.
2. Use the phone’s keypad to enter a new name. The default input entry method is Abc, where the initial character is Uppercase and each consecutive character in that same word is left as lowercase text.
3. Press Save ( ) to save the new name.

**Security mode**

When the Bluetooth Visibility is turned on, your phone is wirelessly transmitting its phone name and status. This transmission can pose a security risk and invite unauthorized connection to your phone. It is recommended that you activate your phone’s Bluetooth security.

- Highlight On or Off and press Select (LSK) or .

**Remote SIM mode**

This mode allows you to control whether a Bluetooth car kit can access the contact information stored on your phone’s SIM card.

- Press On or Off and press Select (LSK) or .

**Features**

The Bluetooth specification describes how Bluetooth short-range wireless technology works, and service profiles, or features, describe the services supported by individual devices. Profiles improve the chances that different devices can communicate.

Your phone supports these Bluetooth features:

- **Headset**: used to make incoming and outgoing calls via Bluetooth headsets.
- **Handsfree**: used to make incoming and outgoing calls via Bluetooth handsfree car kits.
- **Bluetooth stereo headset**: used to make calls and listen to music via Bluetooth stereo headset.
- **Basic printing**: used to print images, text, and personal data such as name cards and appointments via a Bluetooth printer.
- **File transfer**: used to transfer files to and from Bluetooth devices.
- **Object push**: used to exchange personal data such as name cards and Phonebook contacts between Bluetooth devices.
- **SIM access**: used to provide access to the SIM card through Bluetooth.
- **Phonebook access**: used to export phonebook data to Bluetooth devices.

**Help**
Launches the web2go browser and the T-Mobile Help menu for general help information.

**Call settings**
Use Call settings to customize your phone's call functions.

**Answering mode**
Answering Mode allows you to select how your phone answers incoming calls.

1. From Home screen, press **Menu** (LSK) → **Settings** → **Call settings** → **Answering mode**.
2. Highlight an option, then press **Save** (OK) to update your selection. Options include:
   - **Send key**: answers the call when the Send key is pressed.
   - **Open flip**: answers the call when the phone is opened.
   - **Any key**: answers the call when any key on the keypad is pressed.

**Auto redial**
You can have the phone automatically redial the last number if the call was cut off or did not connect.

1. From Home screen, press **Menu** (LSK) → **Settings** → **Call settings** → **Auto redial**.
2. Highlight a selection and press **Save** (LSK). Options include:
   - **Off**: the phone will not automatically redial the last number.
   - **On**: the phone will automatically redial the number.

**Show My Number**
Use the Show my number setting to control how your phone number is displayed when you make a call.
1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Show my number**.

2. Highlight an option and press **Save** (LSK). Options include
   - **Set by network**: uses the network’s settings to determine whether your phone number is displayed.
   - **Show number**: displays your information to the recipient.
   - **Hide number**: hides your information from the recipient.

**Auto block**

This feature allows you to block specific types of incoming and outgoing calls on your phone based on a phone number. This is useful if you allow someone to use your phone for a short period of time.

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Auto block**.

2. Highlight the **Activation** field and press the right Navigation key to enable the feature.

3. Highlight **Block list** and press **Edit** (OK).

4. Add or edit the current block list:
   - **Unknown blocks all incoming calls from unknown phone numbers**.
   - **Add additional numbers by pressing Options (LSK) ➔ Add new**.

5. Press **Save** (LSK) or OK to save the new numbers.
**Call Forwarding**

This network service enables incoming calls to re-route to a secondary number that you specify.

**Example:** You may wish to forward your business calls to a colleague while you are on holiday.

**To activate call forwarding:**
1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Call forwarding**.
2. Select an available option, then press **Select** (LSK).
   - **Always:** all calls are forwarded until this setting is changed.
   - **If busy:** calls are forwarded when you are already on another call.
   - **If no reply:** calls are forwarded when you do not answer the phone for a specified time period (set when you activate call forwarding).
   - **If out of reach:** calls are forwarded when you are not in an area covered by T-Mobile, or when your phone is switched off.
   - **Cancel all:** cancels all call forwarding settings.
3. In the **Forward to** field, enter the number to which calls should be forwarded. The current status displays. If the option was previously set, the Forward to number displays.

**Tip:** To enter an international code, press and hold the key until the + sign displays.

4. Press **Options** (LSK), then select **Activate**.
5. Press **Back** to go back to activate additional call forwarding options.

**To deactivate call forwarding:**
1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Call forwarding**.
2. Select an available option, then press **Select** (LSK).
   - **Always:** all calls are forwarded until this setting is changed.
   - **If busy:** calls are forwarded when you are already on another call.
   - **If no reply:** calls are forwarded when you do not answer the phone.
   - **If out of reach:** calls are forwarded when you are not in an area covered by T-Mobile, or when your phone is switched off.
• **Cancel all**: cancels all call forwarding settings.

3. Press **Options** (LSK), then select **Deactivate**.

### Call Barring (SIM Card Dependent)

Call Barring allows you to restrict specific types of incoming and dialed calls on your phone. This is useful if you allow someone to use your phone for a short period of time.

### Call Waiting

Call waiting is a network service which informs you when someone is trying to reach you during another call. You can specify individual call waiting options for voice calls and/or data calls.

To set your call waiting options:

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Call waiting**.
2. Press **Options** (LSK) ➔ **Deactivate** or **Activate**.
   – or –
   Press **Options** (LSK) ➔ **Check status** to confirm your current call waiting status.

### Call Status Tones

This option allows you to activate the phone to alert you to changes in call status.

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Call status tones**.
2. Press **OK** to check/uncheck the following options:
   • **Call connect tone**: an alert is played when the call is connected.
   • **Minute minder**: an alert plays at one-minute intervals.
   • **Call end tone**: an alert plays when the call is disconnected.
3. Press **Options** (LSK) ➔ **Save** or press the **Back** soft key.

### Alerts on Call

Specify whether the phone will use sounds to alert you to incoming messages or calls during a call.

1. From Home screen, press **Menu** (LSK) ➔ **Settings** ➔ **Call settings** ➔ **Alerts on call**.
2. Highlight **Off** or **On** and press **Save** (LSK) or **OK**.
**Auto Reply**
Create a text message to be sent to the caller when you choose to Reject an incoming call.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Call settings ➔ Auto reply.
2. In the Activation field, use the Left and Right Navigation keys to choose On or Off.
3. Use the Down Navigation key to move to the Reply to send field, then enter the text of the reply message.
4. Press Options (LSK) and select Save to store the message.

**Call History Management**
This menu allows you to manage your call history. You can view time logs for all calls dialed and received, as well as delete call history.

- From Home screen, press Menu (LSK) ➔ Settings ➔ Call settings ➔ Call history management.

**Call time**
This menu lets you view the time log for calls both made and received.

---

**Important!** The actual time invoiced by T-Mobile may differ from times displayed due to network features and service plan.

- From Home screen, press Menu (LSK) ➔ Settings ➔ Call settings ➔ Call history management ➔ Call time.

The following time logs are available:

- **Last call time**: shows the length of your last call.
- **Total incoming**: shows the total length of all calls you have received since the timer was last reset.
- **Total outgoing**: shows the total length of all calls you have made since the timer was last reset.
- **Life time**: shows the total length of time for all incoming and dialed calls. This information cannot be cleared.
Delete all history

This menu allows you to delete all of the call history, or you can delete missed calls, dialed calls, or answered calls.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Call settings ➔ Call history management.
2. Select Delete all history and press Select (LSK) or .
3. Highlight options, then press to place a check mark next to your selection(s).
   - All calls: deletes all call history.
   - Missed calls: deletes all missed call history.
   - Dialed calls: deletes all dialed call history.
   - Answered calls: deletes all answered call history.
   - Voice mail: deletes all voicemail history.
4. Press Delete to delete the selected records.

Advanced

Advanced settings allow you to select and manage your networks, update software, and reset all your settings.

Network

Use the Network setting select the network when roaming outside of your home area.

Note: You can select a network other than your home network only if there is a valid roaming agreement between the two.

To select a network:

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Advanced ➔ Network.
2. Select Search now.
3. Highlight a network and press Select (LSK) or .

To change your Default setup:

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Advanced ➔ Network.
2. Select Default setup.
3. Highlight an option and press Select (LSK) or :
   - Automatic: you are connected to the first available network when roaming.
Software Update

Use the Software Update setting to check for upgrades and upload them directly to your phone.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Advanced ➔ Software update.
2. Follow the on-screen instructions.

Reset settings

Use Reset settings to set phone settings to their default settings. The following options are available:

— All: Phone, Display, and Sound, are returned to default values.
— Phone settings: only phone settings are returned to default values.
— Display settings: only display settings are returned to default values.
— Sound profiles: only sound settings are returned to default values.

To reset your settings:
1. From Home screen, press Menu (LSK) ➔ Settings ➔ Reset settings ➔ Reset settings.
2. Highlight individual options or highlight All, and press Mark (✓) to mark selections.
3. Press Reset (LSK).
4. Enter your password and press Confirm.
5. At the Reset settings? prompt, press Yes (LSK) to reset the settings.

Master reset

From this menu you can reset your phone and sound settings to the factory default settings.

1. From Home screen, press Menu (LSK) ➔ Settings ➔ Reset settings ➔ Master reset.
2. Enter your phone password and press Confirm (LSK).
3. Press Yes (LSK) to reset your settings or No (RSK) to cancel. Once reset, the phone reboots.

My Account

This option provides you with account specific information such as your Current activity, Bill Summary, Plan & Services, My Downloads, MobileLife℠, Mobile for Me™, Store Locator, Support, and Help.

■ From Home screen, press Menu (LSK) ➔ My Account.
Section 12: Health and Safety Information

This section outlines the safety precautions associated with using your phone. The terms “mobile device” or “cell phone” are used in this section to refer to your phone. Read this information before using your mobile device.

Exposure to Radio Frequency (RF) Signals

The U.S. Food and Drug Administration (FDA) has published information for consumers relating to Radio Frequency (RF) exposure from wireless phones. The FDA publication includes the following information:

Do cell phones pose a health hazard?

Many people are concerned that cell phone radiation will cause cancer or other serious health hazards. The weight of scientific evidence has not linked cell phones with any health problems.

Cell phones emit low levels of Radio Frequency (RF) energy. Over the past 15 years, scientists have conducted hundreds of studies looking at the biological effects of the radio frequency energy emitted by cell phones. While some researchers have reported biological changes associated with RF energy, these studies have failed to be replicated. The majority of studies published have failed to show an association between exposure to radio frequency from a cell phone and health problems.

The low levels of RF cell phones emit while in use are in the microwave frequency range. They also emit RF at substantially reduced time intervals when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects.

The biological effects of radio frequency energy should not be confused with the effects from other types of electromagnetic energy.

Very high levels of electromagnetic energy, such as is found in X-rays and gamma rays, can ionize biological tissues. Ionization is a process where electrons are stripped away from their normal locations in atoms and molecules. It can permanently damage biological tissues including DNA, the genetic material.
The energy levels associated with radio frequency energy, including both radio waves and microwaves, are not great enough to cause ionization of atoms and molecules. Therefore, RF energy is a type of non-ionizing radiation. Other types of non-ionizing radiation include visible light, infrared radiation (heat), and other forms of electromagnetic radiation with relatively low frequencies.

While RF energy does not ionize particles, large amounts can increase body temperatures and cause tissue damage. Two areas of the body, the eyes and the testes, are particularly vulnerable to RF heating because there is relatively little blood flow in them to carry away excess heat.

**Research Results to Date: Is there a connection between RF and certain health problems?**

The results of most studies conducted to date say no. In addition, attempts to replicate and confirm the few studies that have shown a connection have failed.

The scientific community at large therefore believes that the weight of scientific evidence does not show an association between exposure to Radio Frequency (RF) from cell phones and adverse health outcomes. Still the scientific community has supported additional research to address gaps in knowledge. Some of these studies are described below.

**Interphone Study**

Interphone is a large international study designed to determine whether cell phones increase the risk of head and neck cancer. A report published in the International Journal of Epidemiology (June, 2010) compared cell phone usage for more than 5,000 people with brain tumors (glioma and meningioma) and a similar number of healthy controls. Results of this study did NOT show that cell phones caused brain cancer. In this study, most people had no increased risk of brain cancer from using cell phones. For people with the heaviest use of cell phones (an average of more than ½ hour per day, every day, for over 10 years) the study suggested a slight increase in brain cancer. However, the authors determined that biases and errors prevented any conclusions being drawn from this data. Additional information about Interphone can be found at [http://www.iarc.fr/en/media-centre/pr/2010/pdfs/pr200_E.pdf](http://www.iarc.fr/en/media-centre/pr/2010/pdfs/pr200_E.pdf).

Interphone is the largest cell phone study to date, but it did not answer all questions about cell phone safety. Additional research is being conducted around the world, and the FDA continues to monitor developments in this field.
International Cohort Study on Mobile Phone Users (COSMOS)
The COSMOS study aims to conduct long-term health monitoring of a large group of people to determine if there are any health issues linked to long-term exposure to radio frequency energy from cell phone use. The COSMOS study will follow approximately 300,000 adult cell phone users in Europe for 20 to 30 years. Additional information about the COSMOS study can be found at http://www.ukcosmos.org/index.html.

Risk of Brain Cancer from Exposure to Radio Frequency Fields in Childhood and Adolescence (MOBI-KIDS)
MOBI-KIDS is an international study investigating the relationship between exposure to radio frequency energy from communication technologies including cell phones and brain cancer in young people. This is an international multi-center study involving 14 European and non-European countries. Additional information about MOBI-KIDS can be found at http://www.creal.cat/programes-recerca/en_projectes-creal/view.php?ID=39.

Surveillance, Epidemiology, and End Results (SEER) Program of the National Cancer Institute
The National Cancer Institute (NCI) actively follows cancer statistics in the United States to detect any change in rates of new cases for brain cancer. If cell phones play a role in risk for brain cancer, rates should go up, because heavy cell phone use has been common for quite some time in the U.S. Between 1987 and 2005, the overall age-adjusted incidence of brain cancer did not increase. Additional information about SEER can be found at http://seer.cancer.gov/.

Cell Phone Industry Actions
Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the cell phone industry to take a number of steps, including the following:

- Support-needed research on possible biological effects of RF for the type of signal emitted by cell phones;
- Design cell phones in a way that minimizes any RF exposure to the user; and
- Cooperate in providing users of cell phones with the current information on cell phone use and human health concerns.
The FDA also is working with voluntary standard-setting bodies such as the Institute of Electrical and Electronics Engineers (IEEE), the International Commission on Non-Ionizing Radiation Protection (ICNIRP), and others to assure that safety standards continue to adequately protect the public.

**Reducing Exposure: Hands-Free Kits and Other Accessories**

**Steps to Reduce Exposure to Radio Frequency Energy**

If there is a risk from being exposed to radio frequency energy (RF) from cell phones - and at this point we do not know that there is - it is probably very small. But, if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your RF exposure.

- Reduce the amount of time spent using your cell phone;
- Use speaker mode or a headset to place more distance between your head and the cell phone.

**Hands-Free Kits**

Hands-free kits may include audio or Bluetooth® headsets and various types of body-worn accessories such as belt-clips and holsters. Combinations of these can be used to reduce RF energy absorption from cell phones.

Headsets can substantially reduce exposure because the phone is held away from the head in the user's hand or in approved body-worn accessories. Cell phones marketed in the U.S. are required to meet RF exposure compliance requirements when used against the head and against the body.

Because there are no known risks from exposure to RF emissions from cell phones, there is no reason to believe that hands-free kits reduce risks. Hands-free kits can be used for convenience and comfort. They are also required by law in many states if you want to use your phone while driving.

**Cell Phone Accessories that Claim to Shield the Head from RF Radiation**

Because there are no known risks from exposure to RF emissions from cell phones, there is no reason to believe that accessories which claim to shield the head from those emissions reduce risks. Some products that claim to shield the user from RF absorption use special phone cases, while others involve nothing more than a metallic accessory attached to the phone.
Studies have shown that these products generally do not work as advertised. Unlike “hands-free” kits, these so-called “shields” may interfere with proper operation of the phone. The phone may be forced to boost its power to compensate, leading to an increase in RF absorption.

**Children and Cell Phones**

The scientific evidence does not show a danger to any users of cell phones from RF exposure, including children and teenagers. The steps adults can take to reduce RF exposure apply to children and teenagers as well.

- Reduce the amount of time spent on the cell phone;
- Use speaker mode or a headset to place more distance between the head and the cell phone.

Some groups sponsored by other national governments have advised that children be discouraged from using cell phones at all. For example, The Stewart Report from the United Kingdom made such a recommendation in December 2000. In this report, a group of independent experts noted that no evidence exists that using a cell phone causes brain tumors or other ill effects. Their recommendation to limit cell phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

Additional information on the safety of RF exposures from various sources can be obtained from the following organizations (updated 10/1/2010):

- **FCC RF Safety Program:**
- **Environmental Protection Agency (EPA):**
  [http://www.epa.gov/radtown/wireless-tech.html](http://www.epa.gov/radtown/wireless-tech.html).
- **Occupational Safety and Health Administration (OSHA):**
  (Note: This web address is case sensitive.)
- **National Institute for Occupational Safety and Health (NIOSH):**
- **World Health Organization (WHO):**
- **International Commission on Non-Ionizing Radiation Protection:**
- **Health Protection Agency:**
Specific Absorption Rate (SAR) Certification Information

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the exposure limits for Radio Frequency (RF) energy set by the Federal Communications Commission (FCC) of the U.S. Government. These FCC RF exposure limits are derived from the recommendations of two expert organizations: the National Council on Radiation Protection and Measurement (NCRP) and the Institute of Electrical and Electronics Engineers (IEEE). In both cases, the recommendations were developed by scientific and engineering experts drawn from industry, government, and academia after extensive reviews of the scientific literature related to the biological effects of RF energy.

The RF exposure limit set by the FCC for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate (SAR). The SAR is a measure of the rate of absorption of RF energy by the human body expressed in units of watts per kilogram (W/kg). The FCC requires wireless phones to comply with a safety limit of 1.6 watts per kilogram (1.6 W/kg).

The FCC SAR limit incorporates a substantial margin of safety to give additional protection to the public and to account for any variations in measurements.

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum reported value. This is because the phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output of the phone.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the SAR limit established by the FCC. Tests for each model phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC. For body-worn operation, this phone has been tested and meets
FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the mobile device a minimum of 1.5 cm from the body.

Use of other accessories may not ensure compliance with FCC RF exposure guidelines. The FCC has granted an Equipment Authorization for this mobile phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. The maximum SAR values for this model phone as reported to the FCC is:

- Head: 0.63 W/kg.
- Body-worn: 0.59 W/kg.

SAR information on this and other model phones can be accessed online on the FCC’s website through http://transition.fcc.gov/oet/rfsafety/sar.html. To find information that pertains to a particular model phone, this site uses the phone FCC ID number which is usually printed somewhere on the case of the phone. Sometimes it may be necessary to remove the battery pack to find the number. Once you have the FCC ID number for a particular phone, follow the instructions on the website and it should provide values for typical or maximum SAR for a particular phone. Additional SAR information can also be obtained at http://www.fcc.gov/encyclopedia/specific-absorption-rate-sar-cellular-telephones.

**FCC Part 15 Information to User**

Pursuant to part 15.21 of the FCC Rules, you are cautioned that changes or modifications not expressly approved by Samsung could void your authority to operate the device.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,
which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Commercial Mobile Alerting System (CMAS)**

This device is designed to receive wireless emergency alerts from the Commercial Mobile Alerting System ("CMAS"); which may also be known as the Personal Localized Alerting Network ("PLAN")). If your wireless provider has chosen to participate in CMAS/PLAN, alerts are available while in the provider’s coverage area. If you travel outside your provider’s coverage area, wireless emergency alerts may not be available. For more information, please contact your wireless provider.

---

**Smart Practices While Driving**

**On the Road - Off the Phone**

The primary responsibility of every driver is the safe operation of his or her vehicle.

Responsible drivers understand that no secondary task should be performed while driving whether it be eating, drinking, talking to passengers, or talking on a mobile phone - unless the driver has assessed the driving conditions and is confident that the secondary task will not interfere with their primary responsibility. **Do not engage in any activity while driving a moving vehicle which may cause you to take your eyes off the road or become so absorbed in the activity that your ability to concentrate on the act of driving becomes impaired.** Samsung is committed to promoting responsible driving and giving drivers the tools they need to understand and address distractions.

**Check the laws and regulations on the use of mobile devices and their accessories in the areas where you drive. Always obey them. The use of these devices may be prohibited or restricted in certain areas. For example, only hands-free use may be permitted in certain areas.**
Before answering calls, consider your circumstances. Let the call go to voicemail when driving conditions require. Remember, driving comes first, not the call!

If you consider a call necessary and appropriate, follow these tips:

- Use a hands-free device;
- Secure your phone within easy reach;
- Place calls when you are not moving;
- Plan calls when your car will be stationary;
- Do not engage in stressful or emotional conversations;
- Let the person with whom you are speaking know that you are driving and will suspend the call if necessary;
- Do not take notes or look up phone numbers while driving;

Never mount this device in a manner that will obstruct the driver’s clear view of the street and traffic.

Never use wireless data services such as text messaging, Web browsing, or e-mail while operating a vehicle.

Never watch videos, such as a movie or clip, or play video games while operating a vehicle.

For more information, go to http://www.ctia.org.

**Battery Use and Safety**

**Important! Handle and store batteries properly to avoid injury or damage.** Most battery issues arise from improper handling of batteries and, particularly, from the continued use of damaged batteries.

- Do not disassemble, crush, puncture, shred, or otherwise attempt to change the form of your battery. Do not put a high degree of pressure on the battery. This can cause leakage or an internal short-circuit, resulting in overheating.
• Do not let the phone or battery come in contact with liquids. Liquids can get into the phone’s circuits, leading to corrosion. Even when the phone appears to be dry and appears to operate normally, the circuitry could slowly corrode and pose a safety hazard. If the phone and/or battery get wet, have them checked by your service provider or contact Samsung, even if they appear to be working properly.

• Do not place your battery in or near a heat source. Excessive heating can damage the phone or the battery and could cause the phone or the battery to explode. Do not dry a wet or damp battery with an appliance or heat source such as a microwave oven, hair dryer, iron, or radiator. Avoid leaving your phone in your car in high temperatures.

• Do not dispose of the phone or the battery in a fire. The phone or the battery may explode when overheated.

• Do not handle a damaged or leaking battery. Do not let leaking battery fluid come in contact with your eyes, skin or clothing. For safe disposal options, contact your nearest Samsung-authorized service center.

• Avoid dropping the cell phone. Dropping the phone or the battery, especially on a hard surface, can potentially cause damage to the phone and battery. If you suspect damage to the phone or battery, take it to a service center for inspection.

• Never use any charger or battery that is damaged in any way.

• Do not allow the battery to touch metal objects. Accidental short-circuiting can occur when a metallic object (coin, key, jewelry, clip, or pen) causes a direct connection between the + and - terminals of the battery (metal strips on the battery), for example when you carry a spare battery in a pocket or bag. Short-circuiting the terminals may damage the battery or the object causing the short-circuiting.

Important! Use only Samsung-approved batteries, and recharge your battery only with Samsung-approved chargers which are specifically designed for your phone.
WARNING!

Use of a non-Samsung-approved battery or charger may present a risk of fire, explosion, leakage, or other hazard. Samsung’s warranty does not cover damage to the phone caused by non-Samsung-approved batteries and/or chargers.

- Do not use incompatible cell phone batteries and chargers. Some websites and second-hand dealers not associated with reputable manufacturers and carriers, might be selling incompatible or even counterfeit batteries and chargers. Consumers should purchase manufacturer or carrier-recommended products and accessories. If unsure about whether a replacement battery or charger is compatible, contact the manufacturer of the battery or charger.

- Misuse or use of incompatible phones, batteries, and charging devices could result in damage to the equipment and a possible risk of fire, explosion, or leakage, leading to serious injuries, damages to your phone, or other serious hazard.

Samsung Mobile Products and Recycling

Samsung cares for the environment and encourages its customers to recycle Samsung mobile devices and genuine Samsung accessories.

Proper disposal of your mobile device and its battery is not only important for safety, it benefits the environment. Batteries must be recycled or disposed of properly.

Recycling programs for your mobile device, batteries, and accessories may not be available in your area. We've made it easy for you to recycle your old Samsung mobile device by working with respected take-back companies in every state in the country.

Drop It Off

You can drop off your Samsung-branded mobile device and batteries for recycling at one of our numerous Samsung Recycling Direct (SM) locations. A list of these locations may be found at:

http://pages.samsung.com/us/recyclingdirect/usactivities_environment_samsungrecyclingdirect_locations.jsp
Samsung-branded devices and batteries will be accepted at these locations for no fee.
Consumers may also recycle their used mobile device or batteries at many retail or carrier-provided locations where mobile devices and batteries are sold. Additional information regarding specific locations may be found at: http://www.epa.gov/epawaste/partnerships/plugin/cellphone/index.htm or at http://www.call2recycle.org/.

Mail It In
The Samsung Mobile Take-Back Program will provide Samsung customers with a free recycling mailing label. Just go to http://www.samsung.com/us/aboutsamsung/citizenship/usactivities_environment_samsungrecyclingdirect.html?INT=STA_recyle_your_phone_page and follow the instructions to print out a free pre-paid postage label and then send your old mobile device or battery to the address listed, via U.S. Mail, for recycling.
Dispose of unwanted electronics through an approved recycler.
To find the nearest recycling location, go to our website: www.samsung.com/recyclingdirect
Or call, (877) 278-0799.

Follow local regulations regarding disposal of mobile devices and batteries
Dispose of your mobile device and batteries in accordance with local regulations. In some areas, the disposal of these items in household or business trash may be prohibited. Help us protect the environment - recycle!

Warning! Never dispose of batteries in a fire because they may explode.

UL Certified Travel Charger
The Travel Charger for this phone has met applicable UL safety requirements. Please adhere to the following safety instructions per UL guidelines:

FAILURE TO FOLLOW THE INSTRUCTIONS OUTLINED MAY LEAD TO SERIOUS PERSONAL INJURY AND POSSIBLE PROPERTY DAMAGE.

IMPORTANT SAFETY INSTRUCTIONS - SAVE THESE INSTRUCTIONS.

DANGER - TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, CAREFULLY FOLLOW THESE INSTRUCTIONS.
FOR CONNECTION TO A SUPPLY NOT IN NORTH AMERICA, USE AN ATTACHMENT PLUG ADAPTOR OF THE PROPER CONFIGURATION FOR THE POWER OUTLET.

THIS POWER UNIT IS INTENDED TO BE CORRECTLY ORIENTED IN A VERTICAL OR HORIZONTAL OR FLOOR MOUNT POSITION.

**Display / Touch-Screen**

Please note the following information when using your mobile device:

**WARNING REGARDING DISPLAY**

The display on your mobile device is made of glass or acrylic and could break if your mobile device is dropped or if it receives significant impact. Do not use if screen is broken or cracked as this could cause injury to you.

**WARRANTY DISCLAIMER: PROPER USE OF A TOUCH-SCREEN MOBILE DEVICE**

If your mobile device has a touch-screen display, please note that a touch-screen responds best to a light touch from the pad of your finger or a non-metallic stylus. Using excessive force or a metallic object when pressing on the touch-screen may damage the tempered glass surface and void the warranty. For more information, please refer to the “Standard Limited Warranty”.

**GPS & AGPS**

Certain Samsung mobile devices can use a Global Positioning System (GPS) signal for location-based applications. A GPS uses satellites controlled by the U.S. Government that are subject to changes implemented in accordance with the Department of Defense policy and the 2008 Federal Radio navigation Plan (FRP). Changes may affect the performance of location-based technology on your mobile device.

Certain Samsung mobile devices can also use an Assisted Global Positioning System (AGPS), which obtains information from the cellular network to improve GPS performance. AGPS uses your wireless service provider’s network and therefore
airtime, data charges, and/or additional charges may apply in accordance with your service plan. Contact your wireless service provider for details.

**Your Location**

Location-based information includes information that can be used to determine the approximate location of a mobile device. Mobile devices which are connected to a wireless network transmit location-based information. Additionally, if you use applications that require location-based information (e.g. driving directions), such applications transmit location-based information. The location-based information may be shared with third-parties, including your wireless service provider, applications providers, Samsung, and other third-parties providing services.

**Use of AGPS in Emergency Calls**

When you make an emergency call, the cellular network may activate AGPS technology in your mobile device to tell the emergency responders your approximate location. AGPS has limitations and **might not work in your area**. Therefore:

- Always tell the emergency responder your location to the best of your ability; and

- Remain on the mobile device for as long as the emergency responder instructs you.

**Navigation**

Maps, directions, and other navigation-data, including data relating to your current location, may contain inaccurate or incomplete data, and circumstances can and do change over time. In some areas, complete information may not be available. **Therefore, you should always visually confirm that the navigational instructions are consistent with what you see before following them. All users should pay attention to road conditions, closures, traffic, and all other factors that may impact safe driving or walking. Always obey posted road signs.**

**Emergency Calls**

This mobile device, like any wireless mobile device, operates using radio signals, wireless and landline networks, as well as user-programmed functions, which cannot guarantee connection in all conditions, areas, or circumstances. Therefore, you should never rely solely on any wireless mobile device for essential communications (medical emergencies, for example). Before traveling in remote or underdeveloped areas, plan an alternate method of contacting emergency services personnel. Remember, to
make or receive any calls, the mobile device must be switched on and in a service area with adequate signal strength.

Emergency calls may not be possible on all wireless mobile device networks or when certain network services and/or mobile device features are in use. Check with local service providers.

To make an emergency call:
1. If the mobile device is not on, switch it on.
2. Key in the emergency number for your present location (for example, 911 or other official emergency number). Emergency numbers vary by location.
3. Tap 📞.

If certain features are in use (call blocking, for example), you may first need to deactivate those features before you can make an emergency call. Consult your User Manual and your local cellular service provider. When making an emergency call, remember to give all the necessary information as accurately as possible. Remember that your mobile device may be the only means of communication at the scene of an accident; do not cut off the call until given permission to do so.

Care and Maintenance
Your mobile device is a product of superior design and craftsmanship and should be treated with care. The suggestions below will help you fulfill any warranty obligations and allow you to enjoy this product for many years:

Keep your Samsung Mobile Device away from:

Liquids of any kind
Keep the mobile device dry. Precipitation, humidity, and liquids contain minerals that will corrode electronic circuits. If the mobile device does get wet, do not accelerate drying with the use of an oven, microwave, or dryer, because this may damage the mobile device and could cause a fire or explosion.

Do not use the mobile device with a wet hand. Doing so may cause an electric shock to you or damage to the mobile device.

Extreme heat or cold
Avoid temperatures below 0°C / 32°F or above 45°C / 113°F.
Microwaves
Do not try to dry your mobile device in a microwave oven. Doing so may cause a fire or explosion.

Dust and dirt
Do not expose your mobile device to dust, dirt, or sand.

Cleaning solutions
Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the mobile device. Wipe it with a soft cloth slightly dampened in a mild soap-and-water solution.

Shock or vibration
Do not drop, knock, or shake the mobile device. Rough handling can break internal circuit boards.

Paint
Do not paint the mobile device. Paint can clog the device’s moving parts or ventilation openings and prevent proper operation.

Responsible Listening

Caution! Avoid potential hearing loss.

Damage to hearing occurs when a person is exposed to loud sounds over time. The risk of hearing loss increases as sound is played louder and for longer durations. Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cell phones, at high volume settings for long durations may lead to permanent noise-induced hearing loss.

This includes the use of headphones (including headsets, earbuds, and Bluetooth® or other wireless devices). Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound, and distorted hearing. Individual susceptibility to noise-induced hearing loss and potential hearing problem varies. Additionally, the amount of sound produced by a portable audio device varies depending on the nature of the sound, the device settings, and the headphones that are used. As a result, there is no single volume setting that is appropriate for everyone or for every combination of sound, settings, and equipment.

You should follow some common sense recommendations when using any portable audio device:
• Always turn the volume down before plugging the earphones into an audio source.
• Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
• Be aware that you can adapt to higher volume settings over time, not realizing that the higher volume may be harmful to your hearing.
• When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
• Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-cancelling headphones to block out background environmental noise. By blocking background environment noise, noise cancelling headphones should allow you to hear the music at lower volumes than when using earbuds.
• Limit the amount of time you listen. As the volume increases, less time is required before you hearing could be affected.
• Avoid using headphones after exposure to extremely loud noises, such as rock concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
• Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech, or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.

You can obtain additional information on this subject from the following sources:

**American Academy of Audiology**
11730 Plaza American Drive, Suite 300
Reston, VA 20190
Voice: (800) 222-2336
Email: info@audiology.org
Internet: [http://www.audiology.org/Pages/default.aspx](http://www.audiology.org/Pages/default.aspx)
Operating Environment

Remember to follow any special regulations in force in any area, and always switch your mobile device off whenever it is forbidden to use it, or when it may cause interference or danger. When connecting the mobile device or any accessory to another device, read its user's guide for detailed safety instructions. Do not connect incompatible products.

Using Your Mobile Device Near Other Electronic Devices

Most modern electronic equipment is shielded from Radio Frequency (RF) signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless mobile device. Consult the manufacturer to discuss alternatives.
Implantable Medical Devices

A minimum separation of six (6) inches should be maintained between a handheld wireless mobile device and an implantable medical device, such as a pacemaker or implantable cardioverter defibrillator, to avoid potential interference with the device.

Persons who have such devices:

• Should ALWAYS keep the mobile device more than six (6) inches from their implantable medical device when the mobile device is turned ON;
• Should not carry the mobile device in a breast pocket;
• Should use the ear opposite the implantable medical device to minimize the potential for interference;
• Should turn the mobile device OFF immediately if there is any reason to suspect that interference is taking place;
• Should read and follow the directions from the manufacturer of your implantable medical device. If you have any questions about using your wireless mobile device with an implantable medical device, consult your health care provider.

For more information see: http://www.fcc.gov/oet/rfsafety/rf-faqs.html#.

Other Medical Devices

If you use any other personal medical devices, consult the manufacturer of your device to determine if it is adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information. Switch your mobile device off in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may be using equipment that could be sensitive to external RF energy.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle before using your mobile device in a motor vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Switch your mobile device off in any facility where posted notices require you to do so.

Potentially Explosive Environments

Switch your mobile device off when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion.
or fire resulting in bodily injury or even death. Users are advised to switch the mobile device off while at a refueling point (service station).

Users are reminded of the need to observe restrictions on the use of radio equipment in fuel depots (fuel storage and distribution areas), chemical plants, or where blasting operations are in progress. Areas with a potentially explosive atmosphere are often, but not always, clearly marked. They include below deck on boats, chemical transfer or storage facilities, vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as grain, dust, or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

**When your Device is Wet**

Do not turn on your device if it is wet. If your device is already on, turn it off and remove the battery immediately (if the device will not turn off or you cannot remove the battery, leave it as-is). Then, dry the device with a towel and take it to a service center.

**FCC Hearing Aid Compatibility (HAC) Regulations for Wireless Devices**

The U.S. Federal Communications Commission (FCC) has established requirements for digital wireless mobile devices to be compatible with hearing aids and other assistive hearing devices.

When individuals employing some assistive hearing devices (hearing aids and cochlear implants) use wireless mobile devices, they may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and mobile devices also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless mobile devices to assist hearing device users find mobile devices that may be compatible with their hearing devices. Not all mobile devices have been rated. Mobile devices that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not
be able to use a rated mobile device successfully. Trying out the mobile device with your hearing device is the best way to evaluate it for your personal needs.

**M-Ratings:** Wireless mobile devices rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than mobile devices that are not labeled. M4 is the better/higher of the two ratings. M-ratings refer to enabling acoustic coupling with hearing aids that do not operate in telecoil mode.

**T-Ratings:** Mobile devices rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than mobile devices that are not labeled. T4 is the better/higher of the two ratings. T-ratings refer to enabling inductive coupling with hearing aids operating in telecoil mode.

Hearing devices may also be rated. Your hearing aid manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise.

Under the current industry standard, American National Standards Institute (ANSI) C63.19, the hearing aid and wireless mobile device rating values are added together to indicate how usable they are together. For example, if a hearing aid meets the M2 level rating and the wireless mobile device meets the M3 level rating, the sum of the two values equals M5.

Under the standard, this should provide the hearing aid user with normal use while using the hearing aid with the particular wireless mobile device. A sum of 6 or more would indicate excellent performance.

However, these are not guarantees that all users will be satisfied. T ratings work similarly.

\[
\begin{align*}
M3 & \quad + \quad M2 & = & & 5 \\
T3 & \quad + \quad T2 & = & & 5
\end{align*}
\]
The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

**HAC for Newer Technologies**

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids.

It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

**Restricting Children's Access to Your Mobile Device**

Your mobile device is not a toy. Do not allow children to play with it because they could hurt themselves and others, damage the mobile device, or make calls that increase your mobile device bill. Keep the mobile device and all its parts and accessories out of the reach of small children.

**FCC Notice and Cautions**

**FCC Notice**

The mobile device may cause TV or radio interference if used in close proximity to receiving equipment. The FCC can require you to stop using the mobile device if such interference cannot be eliminated. Vehicles using liquefied petroleum gas (such as propane or butane) must comply with the National Fire Protection Standard (NFPA-58). For a copy of this standard, contact the National Fire Protection Association.

**Cautions**

Any changes or modifications to your mobile device not expressly approved in this document could void your warranty for this equipment and void your authority to operate this equipment. Only use approved batteries, antennas, and chargers. The use of any unauthorized accessories may be dangerous and void the mobile device warranty if said accessories cause damage or a defect to the mobile device.
Although your mobile device is quite sturdy, it is a complex piece of equipment and can be broken. Avoid dropping, hitting, bending, or sitting on it.

**Other Important Safety Information**

- Only qualified personnel should service the mobile device or install the mobile device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty applicable to the device.

- Ensure that any mobile devices or related equipment installed in your vehicle are securely mounted.

- Check regularly that all wireless mobile device equipment in your vehicle is mounted and operating properly.

- When using a headset in dry environments, static electricity can build up in the headset and cause a small quick static electrical shock. To minimize the risk of electrostatic discharge from the headset avoid using the headset in extremely dry environments or touch a grounded unpainted metal object to discharge static electricity before inserting the headset.

- Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the mobile device, its parts, or accessories.

- For vehicles equipped with an air bag, remember that an air bag inflates with great force. Do not place objects, including installed or portable wireless equipment near or in the area over the air bag or in the air bag deployment area. If wireless equipment is improperly installed and the air bag inflates, serious injury could result.

- Switch your mobile device off before boarding an aircraft. The use of wireless mobile devices in aircraft is illegal and may be dangerous to the aircraft’s operation. Check with appropriate authorities before using any function of a mobile device while on an aircraft.

- Failure to observe these instructions may lead to the suspension or denial of cell phone services to the offender, or legal action, or both.

- While using your device, leave some lights on in the room and do not hold the screen too close to your eyes.

- Seizures or blackouts can occur when you are exposed to flashing lights while watching videos or playing games for extended periods. If you feel any discomfort, stop using the device immediately.
• Reduce risk of repetitive motion injuries. When you repetitively perform actions, such as pressing keys, drawing characters on a touch screen with your fingers, or playing games, you may experience occasional discomfort in your hands, neck, shoulders, or other parts of your body. When using your device for extended periods, hold the device with a relaxed grip, press the keys lightly, and take frequent breaks. If you continue to have discomfort during or after such use, stop use and see a physician.

• If your device has a camera flash or light, do not use the flash or light close to the eyes of people or pets. [122011]
Section 13: Warranty Information

Standard Limited Warranty

What is covered and for how long?

SAMSUNG TELECOMMUNICATIONS AMERICA, LLC ("SAMSUNG") warrants that SAMSUNG’s handsets and accessories ("Products") are free from defects in material and workmanship under normal use and service for the period commencing upon the date of purchase by the first consumer purchaser and continuing for the following specified period of time after that date:

- Phone: 1 Year
- Batteries: 1 Year
- Case/Pouch/Holster: 90 Days
- Other Phone Accessories: 1 Year

What is not covered?

This Limited Warranty does not cover: (a) defects or damage resulting from accident, misuse, abnormal use, abnormal conditions, improper storage, exposure to liquid, moisture, dampness, sand or dirt, neglect, or unusual physical, electrical or electromechanical stress; (b) scratches, dents and cosmetic damage, unless caused by SAMSUNG; (c) defects or damage resulting from excessive force or use of a metallic object when pressing on a touch screen; (d) equipment that has the serial number or the enhancement data code removed, defaced, damaged, altered or made illegible; (e) ordinary wear and tear; (f) defects or damage resulting from the use of Product in conjunction or connection with accessories, products, or ancillary/peripheral equipment not furnished or approved by SAMSUNG; (g) defects or damage resulting from improper testing, operation, maintenance, installation, service, or adjustment not furnished or approved by SAMSUNG; (h) defects or damage resulting from external causes such as collision with an object, fire, flooding, dirt, windstorm, lightning, earthquake, exposure to weather conditions, theft, blown fuse, or improper use of any electrical source; (i) defects or damage resulting from cellular signal reception issues.
or transmission, or viruses or other software problems introduced into the Product; or (j) Product used or purchased outside the United States. This Limited Warranty covers batteries only if battery capacity falls below 80% of rated capacity or the battery leaks, and this Limited Warranty does not cover any battery if (i) the battery has been charged by a battery charger not specified or approved by SAMSUNG for charging the battery; (ii) any of the seals on the battery are broken or show evidence of tampering; or (iii) the battery has been used in equipment other than the SAMSUNG phone for which it is specified.

What are SAMSUNG's obligations?
During the applicable warranty period, provided the Product is returned in accordance with the terms of this Limited Warranty, SAMSUNG will repair or replace the Product, at SAMSUNG's sole option, without charge. SAMSUNG may, at SAMSUNG's sole option, use rebuilt, reconditioned, or new parts or components when repairing any Product, or may replace the Product with a rebuilt, reconditioned or new Product.

Repaired/replaced cases, pouches and holsters will be warranted for a period of ninety (90) days. All other repaired/replaced Products will be warranted for a period equal to the remainder of the original Limited Warranty on the original Product or for ninety (90) days, whichever is longer. All replaced Products, parts, components, boards and equipment shall become the property of SAMSUNG. Except to any extent expressly allowed by applicable law, transfer or assignment of this Limited Warranty is prohibited.

What must you do to obtain warranty service?
To obtain service under this Limited Warranty, you must return the Product to an authorized phone service facility in an adequate container for shipping, accompanied by the sales receipt or comparable proof of sale showing the original date of purchase, the serial number of the Product and the seller's name and address.

To obtain assistance on where to deliver the Product, please call SAMSUNG Customer Care at 1-888-987-4357. If SAMSUNG determines that any Product is not covered by this Limited Warranty, you must pay all parts, shipping, and labor charges for the repair or return of such Product.

You should keep a separate backup copy of any contents of the Product before delivering the Product to SAMSUNG for warranty service, as some or all of the contents may be deleted or reformatted during the course of warranty service.
What are the limits on SAMSUNG’s liability?

THIS LIMITED WARRANTY SETS OUT THE FULL EXTENT OF SAMSUNG’S RESPONSIBILITIES, AND THE EXCLUSIVE REMEDY REGARDING THE PRODUCTS.

ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL SAMSUNG BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT OR FOR, WITHOUT LIMITATION, COMMERCIAL LOSS OF ANY SORT; LOSS OF USE, TIME, DATA, REPUTATION, OPPORTUNITY, GOODWILL, PROFITS OR SAVINGS; INCONVENIENCE; INCIDENTAL, CONSEQUENTIAL OR PUNITIVE DAMAGES; OR DAMAGES ARISING FROM THE USE OR INABILITY TO USE THE PRODUCT. SOME STATES AND JURISDICTIONS DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, OR THE DISCLAIMER OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS AND DISCLAIMERS MAY NOT APPLY TO YOU.

SAMSUNG MAKES NO WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, STATUTORY OR OTHERWISE, AS TO THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE OR SUITABILITY OF ANY THIRD-PARTY SOFTWARE OR EQUIPMENT USED IN CONJUNCTION WITH THE PRODUCT, OR THE ABILITY TO INTEGRATE ANY SUCH SOFTWARE OR EQUIPMENT WITH THE PRODUCT, WHETHER SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG OR OTHERWISE. RESPONSIBILITY FOR THE QUALITY, CAPABILITIES, OPERATIONS, PERFORMANCE AND SUITABILITY OF ANY SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT RESTS SOLELY WITH THE USER AND THE DIRECT VENDOR, OWNER OR SUPPLIER OF SUCH THIRD-PARTY SOFTWARE OR EQUIPMENT.

Nothing in the Product instructions or information shall be construed to create an express warranty of any kind with respect to the Products. No agent, employee, dealer, representative or reseller is authorized to modify or extend this Limited Warranty or to make binding representations or claims, whether in advertising, presentations or otherwise, on behalf of SAMSUNG regarding the Products or this Limited Warranty.

This Limited Warranty gives you specific legal rights, and you may also have other rights that vary from state to state.
What is the procedure for resolving disputes?
ALL DISPUTES WITH SAMSUNG ARISING IN ANY WAY FROM THIS LIMITED WARRANTY OR THE SALE, CONDITION OR PERFORMANCE OF THE PRODUCTS SHALL BE RESOLVED EXCLUSIVELY THROUGH FINAL AND BINDING ARBITRATION, AND NOT BY A COURT OR JURY.
Any such dispute shall not be combined or consolidated with a dispute involving any other person’s or entity’s Product or claim, and specifically, without limitation of the foregoing, shall not under any circumstances proceed as part of a class action. The arbitration shall be conducted before a single arbitrator, whose award may not exceed, in form or amount, the relief allowed by the applicable law. The arbitration shall be conducted according to the American Arbitration Association (AAA) Commercial Arbitration Rules applicable to consumer disputes. This arbitration provision is entered pursuant to the Federal Arbitration Act. The laws of the State of Texas, without reference to its choice of laws principles, shall govern the interpretation of the Limited Warranty and all disputes that are subject to this arbitration provision. The arbitrator shall decide all issues of interpretation and application of this arbitration provision and the Limited Warranty.

For any arbitration in which your total damage claims, exclusive of attorney fees and expert witness fees, are $5,000.00 or less (“Small Claim”), the arbitrator may, if you prevail, award your reasonable attorney fees, expert witness fees and costs as part of any award, but may not grant SAMSUNG its attorney fees, expert witness fees or costs unless it is determined that the claim was brought in bad faith. In a Small Claim case, you shall be required to pay no more than half of the total administrative, facility and arbitrator fees, or $50.00 of such fees, whichever is less, and SAMSUNG shall pay the remainder of such fees. Administrative, facility and arbitrator fees for arbitrations in which your total damage claims, exclusive of attorney fees and expert witness fees, exceed $5,000.00 (“Large Claim”) shall be determined according to AAA rules. In a Large Claim case, the arbitrator may grant to the prevailing party, or apportion among the parties, reasonable attorney fees, expert witness fees and costs. Judgment may be entered on the arbitrator’s award in any court of competent jurisdiction. This arbitration provision also applies to claims against SAMSUNG’s employees, representatives and affiliates if any such claim arises from the Product’s sale, condition or performance.
You may opt out of this dispute resolution procedure by providing notice to SAMSUNG no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the Product. To opt out, you must send notice by e-mail to optout@sta.samsung.com, with the subject line: “Arbitration Opt Out.” You must include in the opt out e-mail (a) your name and address; (b) the date on which the Product was purchased; (c) the Product model name or model number; and (d) the IMEI or MEID or Serial Number, as applicable, if you have it (the IMEI or MEID or Serial Number can be found (i) on the Product box; (ii) on the Product information screen, which can be found under “Settings;” (iii) on a label on the back of the Product beneath the battery, if the battery is removable; and (iv) on the outside of the Product if the battery is not removable). Alternatively, you may opt out by calling 1-888-987-4357 no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the Product and providing the same information. These are the only two forms of notice that will be effective to opt out of this dispute resolution procedure. Opting out of this dispute resolution procedure will not affect the coverage of the Limited Warranty in any way, and you will continue to enjoy the benefits of the Limited Warranty.

Severability
If any portion of this Limited Warranty is held to be illegal or unenforceable, such partial illegality or unenforceability shall not affect the enforceability of the remainder of the Limited Warranty.

Precautions for Transfer and Disposal
If data stored on this device is deleted or reformatted using the standard methods, the data only appears to be removed on a superficial level, and it may be possible for someone to retrieve and reuse the data by means of special software. To avoid unintended information leaks and other problems of this sort, it is recommended that the device be returned to Samsung’s Customer Care Center for an Extended File System (EFS) Clear which will eliminate all user memory and return all settings to default settings. Please contact the Samsung Customer Care Center for details.

Important! Please provide warranty information (proof of purchase) to Samsung’s Customer Care Center in order to provide this service at no charge. If the warranty has expired on the device, charges may apply.
End User License Agreement for Software

IMPORTANT. READ CAREFULLY: This End User License Agreement (“EULA”) is a legal agreement between you (either an individual or a single entity) and Samsung Electronics Co., Ltd. for software owned by Samsung Electronics Co., Ltd. and its affiliated companies and its third party suppliers and licensors that accompanies this EULA, which includes computer software and may include associated media, printed materials, “online” or electronic documentation (“Software”).

BY CLICKING THE “I ACCEPT” BUTTON (OR IF YOU BYPASS OR OTHERWISE DISABLE THE “I ACCEPT”, AND STILL INSTALL, COPY, DOWNLOAD, ACCESS OR OTHERWISE USE THE SOFTWARE), YOU AGREE TO BE BOUND BY THE TERMS OF THIS EULA. IF YOU DO NOT ACCEPT THE TERMS IN THIS EULA, YOU MUST CLICK THE “DECLINE” BUTTON, AND DISCONTINUE USE OF THE SOFTWARE.

1. GRANT OF LICENSE. Samsung grants you the following rights provided that you comply with all terms and conditions of this EULA: You may install, use, access, display and run one copy of the Software on the local hard disk(s) or other permanent storage media of one computer and use the Software on a single computer or a mobile device at a time, and you may not make the Software available over a network where it could be used by multiple computers at the same time. You may make one copy of the Software in machine-readable form for backup purposes only; provided that the backup copy must include all copyright or other proprietary notices contained on the original.

2. RESERVATION OF RIGHTS AND OWNERSHIP. Samsung reserves all rights not expressly granted to you in this EULA. The Software is protected by copyright and other intellectual
property laws and treaties. Samsung or its suppliers own the title, copyright and other intellectual property rights in the Software. The Software is licensed, not sold.

3. LIMITATIONS ON END USER RIGHTS. You may not reverse engineer, decompile, disassemble, or otherwise attempt to discover the source code or algorithms of, the Software (except and only to the extent that such activity is expressly permitted by applicable law not withstanding this limitation), or modify, or disable any features of, the Software, or create derivative works based on the Software. You may not rent, lease, lend, sublicense or provide commercial hosting services with the Software.

4. CONSENT TO USE OF DATA. You agree that Samsung and its affiliates may collect and use technical information gathered as part of the product support services related to the Software provided to you, if any, related to the Software. Samsung may use this information solely to improve its products or to provide customized services or technologies to you and will not disclose this information in a form that personally identifies you.

5. UPGRADES. This EULA applies to updates, supplements and add-on components (if any) of the Software that Samsung may provide to you or make available to you after the date you obtain your initial copy of the Software, unless we provide other terms along with such upgrade. To use Software identified as an upgrade, you must first be licensed for the Software identified by Samsung as eligible for the upgrade. After upgrading, you may no longer use the Software that formed the basis for your upgrade eligibility.

6. SOFTWARE TRANSFER. You may not transfer this EULA or the rights to the Software granted herein to any third party unless it is in connection with the sale of the mobile device which the Software accompanied. In such event, the transfer must include all of the Software (including all component parts, the media and printed materials, any upgrades, this EULA) and you may not retain any copies of the Software. The transfer may not be an indirect transfer, such as a consignment. Prior to the transfer, the end user receiving the Software must agree to all the EULA terms.

7. EXPORT RESTRICTIONS. You acknowledge that the Software is subject to export restrictions of various countries. You agree to comply with all applicable international and national laws that apply to the Software, including the U.S. Export Administration Regulations, as well as end user, end use, and destination restrictions issued by U.S. and other governments.
8. TERMINATION. This EULA is effective until terminated. Your rights under this License will terminate automatically without notice from Samsung if you fail to comply with any of the terms and conditions of this EULA. Upon termination of this EULA, you must cease all use of the Software and destroy all copies, full or partial, of the Software.

9. THIRD-PARTY APPLICATIONS. Certain third-party applications may be included with, or downloaded to this mobile device. SAMSUNG makes no representations whatsoever about any of these applications. Since SAMSUNG has no control over such applications, Purchaser acknowledges and agrees that SAMSUNG is not responsible for the availability of such applications and is not responsible or liable for any content, advertising, products, services, or other materials on or available from such applications. Purchaser expressly acknowledges and agrees that use of third-party applications is at Purchaser's sole risk and that the entire risk of unsatisfactory quality, performance, accuracy and effort is with Purchaser. It is up to Purchaser to take precautions to ensure that whatever Purchaser selects to use is free of such items as viruses, worms, Trojan horses, and other items of a destructive nature. References on this mobile device to any names, marks, products, or services of any third-parties are provided solely as a convenience to Purchaser, and do not constitute or imply an endorsement, sponsorship, or recommendation of, or affiliation with the third-party or its products and services. Purchaser agrees that SAMSUNG shall not be responsible or liable, directly or indirectly, for any damage or loss caused or alleged to caused by, or in connection with, use of or reliance on any such third-party content, products, or services available on or through any such application. Purchaser acknowledges and agrees that your use of any third-party application is governed by such third-party application provider's Terms of Use, License Agreement, Privacy Policy, or other such agreement and that any information or personal data you provide, whether knowingly or unknowingly, to such third-party application provider, will be subject to such third-party application provider's privacy policy, if such a policy exists. SAMSUNG DISCLAIMS ANY RESPONSIBILITY FOR ANY DISCLOSURE OF INFORMATION OR ANY OTHER PRACTICES OF ANY THIRD-PARTY APPLICATION PROVIDER.

10. Disclaimer of Warranty Regarding Third-Party Applications. SAMSUNG DOES NOT WARRANT OR MAKE ANY REPRESENTATIONS REGARDING THE AVAILABILITY, USE, TIMELINESS, SECURITY, VALIDITY, ACCURACY, OR RELIABILITY OF, OR THE RESULTS OF THE USE OF, OR OTHERWISE RESPECTING, THE CONTENT OF ANY
THIRD-PARTY APPLICATION WHETHER SUCH THIRD-PARTY APPLICATION IS INCLUDED WITH THE PRODUCT DISTRIBUTED BY SAMSUNG, IS DOWNLOADED, OR OTHERWISE OBTAINED. USE OF ANY THIRD-PARTY APPLICATION IS DONE AT PURCHASER’S OWN DISCRETION AND RISK AND PURCHASER IS SOLELY RESPONSIBLE FOR ANY DAMAGE TO YOUR MOBILE DEVICE OR LOSS OF DATA THAT RESULTS FROM THE DOWNLOADING OR USE OF SUCH THIRD-PARTY APPLICATIONS. SAMSUNG EXPRESSLY DISCLAIMS ANY WARRANTY REGARDING WHETHER PURCHASER’S PERSONAL INFORMATION IS CAPTURED BY ANY THIRD-PARTY APPLICATION PROVIDER OR THE USE TO WHICH SUCH PERSONAL INFORMATION MAY BE PUT BY SUCH THIRD-PARTY APPLICATION PROVIDER. ANY THIRD-PARTY APPLICATIONS PROVIDED WITH THIS MOBILE DEVICE ARE PROVIDED “AS IS” AND ON AN “AS AVAILABLE” BASIS, WITHOUT WARRANTIES OF ANY KIND FROM SAMSUNG, EITHER EXPRESS OR IMPLIED. TO THE FULLEST EXTENT POSSIBLE PURSUANT TO APPLICABLE LAW, SAMSUNG DISCLAIMS ALL WARRANTIES EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTORY QUALITY OR WORKMANLIKE EFFORT, FITNESS FOR A PARTICULAR PURPOSE, RELIABILITY OR AVAILABILITY, ACCURACY, LACK OF VIRUSES, QUIET ENJOYMENT, NON-INFRINGEMENT OF THIRD PARTY RIGHTS OR OTHER VIOLATION OF RIGHTS. SAMSUNG DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE THIRD-PARTY APPLICATION, THAT THE FUNCTIONS CONTAINED IN THE THIRD-PARTY APPLICATION WILL MEET PURCHASER’S REQUIREMENTS, THAT THE OPERATION OF THE THIRD-PARTY APPLICATION WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE THIRD-PARTY APPLICATION WILL BE CORRECTED. PURCHASER ASSUMES THE ENTIRE COST OF ALL NECESSARY SERVICING, REPAIR, OR CORRECTION. SOME JURISDICTIONS DO NOT ALLOW EXclusions OR LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. NO ADVICE OR INFORMATION, WHETHER ORAL OR WRITTEN, OBTAINED BY PURCHASER FROM SAMSUNG SHALL BE DEEMED TO ALTER THIS DISCLAIMER OF WARRANTY REGARDING THIRD-PARTY APPLICATIONS, OR TO CREATE ANY WARRANTY.

11. Limitation of Liability. SAMSUNG WILL NOT BE LIABLE FOR ANY DAMAGES OF ANY KIND ARISING OUT OF OR RELATING TO THE USE OR THE INABILITY TO USE ANY THIRD-PARTY APPLICATION, ITS CONTENT OR FUNCTIONALITY, INCLUDING BUT NOT LIMITED TO DAMAGES.
CAUSED BY OR RELATED TO ERRORS, OMISSIONS, INTERRUPTIONS, DEFECTS, DELAY IN OPERATION OR TRANSMISSION, COMPUTER VIRUS, FAILURE TO CONNECT, NETWORK CHARGES, AND ALL OTHER DIRECT, INDIRECT, SPECIAL, INCIDENTAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES EVEN IF SAMSUNG HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU. NOTwithstanding the foregoing, SAMSUNG’S TOTAL LIABILITY TO PURCHASER FOR ALL LOSSES, DAMAGES, CAUSES OF ACTION, INCLUDING BUT NOT LIMITED TO THOSE BASED ON CONTRACT, TORT, OR OTHERWISE, ARISING OUT OF PURCHASER’S USE OF THIRD-PARTY APPLICATIONS ON THIS MOBILE DEVICE, OR ANY OTHER PROVISION OF THIS EULA, SHALL NOT EXCEED THE AMOUNT PURCHASER PAID SPECIFICALLY FOR ANY SUCH THIRD-PARTY APPLICATION THAT WAS INCLUDED WITH THIS MOBILE DEVICE. THE FOREGOING LIMITATIONS, EXCLUSIONS, AND DISCLAIMERS (INCLUDING SECTIONS 9, 10, AND 11) SHALL APPLY TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EVEN IF ANY REMEDY FAILS ITS ESSENTIAL PURPOSE.

12. U.S. Government End Users Restricted Rights. The Software is licensed only with "restricted rights" and as "commercial items" consisting of "commercial software" and "commercial software documentation" with only those rights as are granted to all other end users pursuant to the terms and conditions herein. All Software and Products provided to the United States Government pursuant to solicitations issued on or after December 1, 1995 is provided with the commercial rights and restrictions described elsewhere herein. All Software and Products provided to the United States Government pursuant to solicitations issued prior to December 1, 1995 are provided with RESTRICTED RIGHTS as provided for in FAR, 48 CFR 52.227-14 (JUNE 1987) or DFAR, 48 CFR 252.227-7013 (OCT 1988), as applicable.

13. APPLICABLE LAW. This EULA is governed by the laws of TEXAS, without regard to conflicts of laws principles. This EULA shall not be governed by the UN Convention on Contracts for the International Sale of Goods, the application of which is expressly excluded. If a dispute, controversy or difference is not amicably settled, it shall be finally resolved by arbitration in Seoul, Korea in accordance with the
Arbitration Rules of the Korean Commercial Arbitration Board. The award of arbitration shall be final and binding upon the parties.

14. ENTIRE AGREEMENT; SEVERABILITY. This EULA is the entire agreement between you and Samsung relating to the Software and supersedes all prior or contemporaneous oral or written communications, proposals and representations with respect to the Software or any other subject matter covered by this EULA. If any provision of this EULA is held to be void, invalid, unenforceable or illegal, the other provisions shall continue in full force and effect.
